THE VOICE

ITS PRODUCTION, CARE AND PRESERVATION

BY
FRANK E. MILLER, M.D.

WITH A NOTE BY
GUSTAV KOBBE

Pp. viii and 196. Price, Cloth, \$1.25 net

NO one could be better fitted to write with authority and understanding concerning the proper development and use of the vocal organs than a leading throat specialist, to whose medical knowledge is added the results of his own experience as a professional singer. The ability to consider his problem from two absolutely differing points of view is what gives his little volume a value quite out of the ordinary, for it allows him to indicate a correct and rational physiological method of voice-production, while making full allowance for the psychological factors involved, such as mentality, artistic temperament, and correct conception on the part of the singer of the pitch, quality of tone, etc., to be produced. In short, this book is not only a result of its author's scientific knowledge as a physician, but is also the outcome of his long observation and experience as a singer; an ideal combination which has enabled him to elucidate the natural functions of the vocal organs in a clear, convincing and eminently readable manner

GEORGE FRIEDRICH HÄNDEL THE MESSIAH

(Oratorio)

Edited by T. TERTIUS NOBLE

Revised according to Händel's original score by

MAX SPICKER

Price, Vocal Score:

Paper 75 cents, *net*; Boards \$1.00; Cloth \$1.75; Half morocco \$3.25

THE UNIQUE VALUE and importance of this new edition of *The Messiah* lies in its absolute and faithful agreement with the facsimile edition of Händel's original score, and with his conception of the work as crystallized in successive yearly performances under his direction in London, from 1743 on.

And it may fairly be considered the only really representative edition, in vocal score, of this choral masterpiece now available, for it is based upon the historically authenticated original which discloses the true Händel in the plenitude of his inspiration.

This authentic and representative character is lacking in practically all other editions now extant. Some are pianistic transcriptions, capriciously and arbitrarily made, rather than exact reproductions of the original score; others, again, are so disfigured by errors, both of omission and commission, as to directly impair their usefulness. Aside from these, some of the more recently issued scores are based on the Mozartean orchestral *partitur*; and the consequent increased difficulty of their piano-part makes them unpractical.

It is clear, therefore, that an edition which avoids the disadvantages instanced: one in which every question regarding interpretation,—dynamics, the proper treatment of the *appoggiatura*, both in recitative and aria, the respective authenticity and value of varying readings, etc.,—has been weighed, considered and passed upon by an editor—Max Spicker—who is an authority on the subject, may be recommended with the conviction that "it has been prepared with the thoroughness and reverent care due to an eternally beautiful master-work," and is in short, definitive.
