## PREFACE TO THIRD EDITION.

SEVEN months have elapsed since Tabor was first presented to the public, and during this period two large editions have been exhausted, and we now offer to the lovers of sacred song the third edition.

When, at the earnest solicitation of numerous, and perhaps too partial friends, we undertook the preparation of the work, we confess that we had many misgivings as to our ability to meet the requirements of the public taste. The rapid sale of the work, however, and the many flattering notices it has received from the profession and the press of every section of the country, induce the belief that it has been found to answer, in a higher degree than the friends of the enterprise anticipated, the demands which it was our aim to supply. For this liberal encouragement of our first attempt at authorship, a kind and indulgent public have our sincere thanks. We again acknowledge our obligations to all who have contributed music to its pages; cheerfully acknowledging that to them, more than to ourselves, its success is due. We are specially indebted to Messrs. Mason Brothers for permission to use many standard OLD tunes, chiefly the compositions of their father, Dr. Lowell Mason; and to the Messrs. Everett for the privilege of selecting *ad libitum* from their numerous works, as well as for a great amount of NEW MUSIC, never before published, and to which we invite special attention.

We solicit a careful examination of the book, by Teachers, Choristers, and musicians generally, with reference to the following distinctive features:

1st. ELEMENTARY DEPARTMENT.—This will be found concise and perspicuous, yet complete.

2d. METRICAL DEPARTMENT.—This comprises all the popular old tunes in general use, and perhaps a larger amount of NEW MUSIC, representing all the leading American authors of the present age, than the same department of any similar work. Great care has been taken to adapt good music to all the metres contained in the hymn-books of the various evangelical denominations.

3d. ANTHEM DEPARTMENT.—We have endeavored to make this as perfect as possible, and it will be found to include an unusual variety of new Anthems, Motets, Introits, Sentences, and Set Pieces, suited to nearly every occasion for which such music is used.

4th. CHANTS, &c.—Here we have had the able assistance of one of the leading divines of the Church, and it is believed that the Morning and Evening services are amply provided for.

Our feelings will not permit us to close this preface without a brief reference to the death of one who was endeared to us by many ties of friendship, and whose invaluable services in the cause of church music rendered him an object of profound respect and sincere affection to all the lovers of sacred song. We allude to Mr. L. C. EVERETT, whose whole life was sedulously devoted to the interests of this divine art, and whose voice, we have faith to believe, is now uniting in the chorus of the redeemed on high.

The work is again submitted to the Christian public, with the hope that it may continue an acceptable auxiliary in the worship of God.

R. M. McINTOSH.

## CHAPTER I.

### PRIMARY SOUNDS, DISTINCTIONS AND DEPARTMENTS.

§ 1. There are seven primary sounds from which all music is made up.

§ 2. These sounds have three essential properties, or, as some authors express it, there are three natural distinctions existing in them.

1. In point of Length, as Long or Short.

2. In point of Pitch, as High or Low.

3. In point of Power, as Soft or Loud.

§ 3. From the fact that these three natural distinctions are found to exist in musical sounds, it becomes necessary, for the sake of system, to divide the elements of music into three separate departments :

1. *Rhythmics*, treating of the Length of sounds.

2. *Melodics*, treating of the Pitch of sounds.

3. *Dynamics*, treating of the Power of sounds.

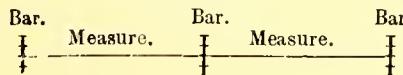

## CHAPTER II.

### RHYTHMICS.

§ 4. All pertaining to movement, length or duration of sound in music, comes under the department of Rhythmics. Everything, therefore, connected with regular time in music will be treated of under this head.

§ 5. Time, during the performance of a piece of music passes away ; and to aid in estimating time as it passes, written music is divided by perpendicular lines called Bars into equal portions called measures, which equal portions represent periods or divisions of time. Thus :

#### EXAMPLE 1.

§ 6. Time may be divided into smaller equal portions than measures, which are called parts of measures.

§ 7. Each measure may be divided into a certain number of parts.

§ 8. Each measure is named from the number of parts into which it is divided.

§ 9. A measure divided into two parts is called Double Time.

§ 10. A measure divided into three parts is called Triple Time.

§ 11. A measure divided into four parts is called Quadruple Time.

§ 12. A measure divided into six parts is called Sextuple Time.

#### EXAMPLE 2.

#### EXAMPLE 3.

#### EXAMPLE 4.

#### EXAMPLE 5.

NOTE.—The short lines and figures used in the foregoing examples to illustrate the number of parts into which each measure is divided, do not occur in written music. Other means, hereafter explained, are used to indicate the kind of time, or number of parts in each measure.

§ 13. To assist in acquiring the ability accurately to compute and count time, it is found necessary, in singing, to perform certain motions of the hand, called beats, or beating time.

## E L E M E N T A R Y D E P A R T M E N T .

§ 14. Each part of every measure has one beat or motion of the hand. Hence, there are two beats in each measure of Double Time—first, down—second, up.

§ 15. There are three beats in each measure of Triple Time—first, down—second, left—third, up.

§ 16. There are four beats in each measure of Quadruple Time—first, down—second, left—third, right—fourth up.

§ 17. There are six beats in each measure of Sextuple Time—down, down, left, right, up, up. But most music written in Sextuple Time is performed in Double, three parts being sung to each beat.

§ 18. In order to give proper expression to words as well as variety to music, it is necessary, in singing, to observe *accent*. By accent, in music, is meant that one part of a measure should be produced with more power, or sung louder, than another. The loud part being regarded as accented, and the soft as unaccented.

§ 19. The first part of each measure in Double Time is accented—the second part unaccented.

§ 20. The first part of each measure in Triple Time is accented—the second and third parts unaccented.

§ 21. The first and third parts of each measure in Quadruple Time are accented—the second and fourth parts unaccented.

§ 22. The first and fourth parts of each measure in Sextuple Time are accented—the second, third, fifth, and sixth parts are unaccented.

**Note.**—It is highly important that teachers training classes should not rapidly pass over the theory of time; but that they should impress the subject upon the minds of their pupils in various interesting forms and ways, until they (the teachers) positively know their explanations to be understood by all. The Black Board is the place for these and all other illustrations, and the only place where they can be brought out in an interesting way. I need not say to intelligent teachers that their illustrations, in order to be successful, should be interesting in style and variety.

### M E L O D Y .

§ 23. A series of seven tones, *with the first repeated*, making eight in all, is termed a scale, provided it be constructed in one of two ways with regard to the relative distances of its tones.

§ 24. The tones of the Scale are spoken of by the first eight numerals, 1, 2, 3, 4, 5, 6, 7, 8, the lowest being reckoned 1 and the highest 8.

§ 25. The distance between any two tones in the Scale is called an Interval.

§ 26. As there are eight tones in the scale, it follows that there are seven intervals. These intervals are not all alike; some are larger and some are smaller.

§ 27. The larger intervals are called steps; the smaller intervals, half steps.

§ 28. Five of the seven intervals are whole steps, and two of them half steps.

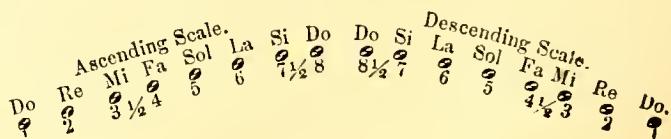

§ 29. The two half steps occur between the third and fourth and seventh and eighth tones. Between each two of the other tones the interval is a whole step.

§ 30. Beside the numerals, which are not always convenient for singing, we employ in the early cultivation of the voice and ear, the following syllables in connection with the tones of the scale.

Written, Do, Re, Mi, Fa, Sol, La, Si, Do.

Pronounced, Doe, Ray, Mee, Fah, Sole, Lah, See, Doe.

## CHAPTER IV.

### THE STAFF AND CLEFS.

§ 31. A character composed of five horizontal lines and four spaces called the Staff, is used to represent the relative pitch of sounds:

EXAMPLE 6.

§ 32. The lowest line of the Staff is called the *first line*. That next above the lowest is called the *second line*, &c.

§ 33. Each line and each space of the staff is called a degree. Hence, there are nine degrees in the staff—five lines and four spaces.

§ 34. When it becomes necessary to use sounds higher or lower than can be represented upon the staff, *added lines* or *added spaces* are employed above and below the staff. Thus :

EXAMPLE 7.

§ 35. The degrees of the staff, lines and spaces, are named from the first seven letters of the alphabet, viz : A, B, C, D, E, F, G, in two ways.

§ 36. Each letter may give names to two or more degrees, provided they be eight degrees distant from each other, inclusive.

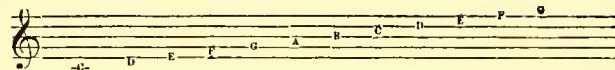

§ 37. A character called a Clef is used to determine which of the two ways of naming is to be observed.

§ 38. As each mode of naming the degrees in question is determined by a different Clef, it follows that we have use for two Clefs—the F Clef and the G Clef.

§ 39. The G Clef is used to represent the letter G, and locates that letter on the *second line* of the staff. It appears in written music, thus:

EXAMPLE 8.

G clef with letters on the staff.

**Note.**—The G Clef is generally used in modern music for three parts, Treble, Alto, and Tenor but when it is used for the Tenor, a part assigned to male voices exclusively, it represents G an octave (eight degrees) lower than when used for either of the other two parts, owing to the natural difference of an octave in the pitch of male and female voices.

§ 40. The F Clef is used to represent the letter F, and locates that letter on the *fourth line* of the staff. It appears in written music, thus :

EXAMPLE 9.

F clef with letters on the staff.

§ 41. Each Clef is used to show that the degree on which it is situated is named from that letter, this gives us a clue to the names of the other degrees ; for, having the name of one degree, and knowing how the letters follow each other in the alphabet, and that they follow each other in the same order on the staff, we can readily ascertain the name of any other degree.

§ 42. In the earlier part of musical exercises for beginners, when the G clef is used, the scale treated of in Chap. III, is based on C, the first added line below the staff. That is, *one* or *do* is placed on this degree, and the sounds follow each other in regular order up to C on the third space, the place for the eighth or octave of the scale. Thus :

EXAMPLE 10.

Names of the tones      1    2    3    4    5    6    7    8    8    7    6    5    4    3    2    1  
 Absolute pitch            C    D    E    F    G    A    B    C    C    B    A    G    F    E    D    C  
 Syllables                Do, re, mi, fa, sol, la, si, do, do, si, la, sol, fa, mi, re, do.

## ELEMENTARY DEPARTMENT

§ 43. When the F clef is used in these earlier exercises, one of the scale, or *do*, is not found on the first added line below the staff, as in the above example, but is placed on the second space. Thus :

§ 44. The letters upon the staff, are never changed from the positions assigned them by the clef. They, therefore, represent the absolute pitch of sounds, independently of any scale relationship to each other.

§ 45. The foregoing arrangements of the scale upon the staff are not permanent. The scale may begin upon any given line or space; hence, as will be seen, from the following examples, it may be changed to any position—higher or lower—upon the staff. Rules regulating all such changes will be presented in their proper place.

## CHAPTER V.

### RHYTHMICS.—*continued.*

§ 46. The kind of Time in which a piece of music is written, is generally indicated by a figure placed at the beginning, immediately to the right of the Clef, and on the *upper* part of the staff. Thus :

EXAMPLE 20.

NOTE.—Four double measures will make an *Eight-part measure*, four of triple, a *Twelve-part measure*, and three of triple, a *Nine-part measure*. These forms of measure are seldom used.

§ 47. There are two figures placed at the beginning of a tune always : the use of the one we have just explained, the use of the other will be explained presently.

\* 48. As tones have no positive or absolute length, duration, or value, characters called notes are used to represent their relative length.

§ 49. There are six notes commonly used for this purpose, each of which has its peculiar shape or appearance, by which it is known and distinguished from the others.

The following are the six notes most commonly used.

EXAMPLE 21.

Whole note. Half note. Quarter note. Eighth note. Sixteenth note. Thirty-second note.

§ 50. Any note may be used to represent a long tone, or any note may be used to represent a short tone ; but the relation which their names imply must always be sustained. For instance, if, in a piece of music, a quarter note be selected to represent a tone to which one beat is to be given, a half note will represent a tone having two beats, a whole note will represent a tone having four beats, &c.

§ 51. In our illustrations of time, its divisions, and subdivisions, Chap. II, we represented each part of a measure by a figure, because we had not then

explained the notes. In music, however, each part of a measure is represented by a note.

§ 52. In every piece of music a certain note is taken as the standard of measurement. That is, a certain note is assumed as having the time of one beat, and is called the *primitive note* ; and all the other notes in the piece must be dwelt on according to the relations which they sustain to this note. Therefore, when we speak of the primitive note, it must be remembered that we mean the note which represents such part of the measure, or which is taken as having the time of one beat.

§ 53. As figures are used to represent the different *kinds* of time, so they are used to represent the different *varieties* of time.

§ 54. The primitive note, or the note which occupies the time of one beat, and from which all the other notes in the exercise receive their actual value as to time or duration, is indicated by a figure placed at the beginning of the music on the *lower* part of the staff, and immediately to the right of the Clef.

§ 55. In every kind of time any note may be taken as the primitive note. Thus :

EXAMPLE 22.

§ 56. Any one note that has the time of one beat is to be dwelt on as long as any other note that has the time of one beat. For instance, when an

## ELEMENTARY DEPARTMENT

eighth note has one beat it is to be dwelt on as long as a quarter note when it has one beat, or a half when it has one beat. Therefore, the difference in the various kinds of time is sensible only to the eye; their effect upon the ear is the same.

§ 57. It will be perceived that when a half note is primitive, two quarter notes will be sung to one beat; and when a quarter note is primitive, two eighth notes will be sung to one beat, &c. Thus :

### EXAMPLE 23.

## CHAPTER VI.

### RHYTHMICS.—continued.

#### *Primitive and derived forms of measure.*

§ 58. A measure filled with primitive notes, as are all the measures in Ex. 22, is said to be in its Primitive Form, because it is the simplest form in which it can appear.

§ 59. A measure filled with, or containing any other kind of notes than primitive, is said to be in a Derived Form.

### EXAMPLE 24.

§ 60. In the above examples all the measures contain the same value of notes. The first measure in each example is in primitive form, while the other measures are all in derived forms. Similar arrangements can be had in all the varieties of time.

§ 61. A dot (.) or period placed to the right of a note adds to that note one half of its original value, or in other words it makes the note one half longer than it was before the dot was introduced. For instance, a dotted whole note is equal to three half notes; a dotted half note is equal to three quarter notes, &c. Thus :

### EXAMPLE 25.

§ 62. When three notes (sounds) occupy one part of a measure, two of which are sufficient to fill said part they are called Triplets; and are written thus :

### EXAMPLE 26.

NOTE.—Further explanations of Rhythmic arrangements may be obtained from "Everett's Elements of Vocal Music, Harmony, and Versification."

§ 63. A piece of music may commence on any part of the measure.

§ 64. When the first measure of a piece is not full, there will usually be found enough in the last measure to fill it. Thus :

## CHAPTER VII.

### RESTS, TIES, SLURS, AND OTHER CHARACTERS.

§ 65. It is sometimes desirable to pass over one or more parts or fractions of a measure—sometimes whole measures are left silent. This is indicated by characters called *rests*.

§ 66. Each note has its corresponding rest, and each rest has its peculiar shape or form by which it is known.

§ 66. The following rests correspond to the six notes that have been explained.

### EXAMPLE 28.

Whole note rest. Half note rests. Quarter note rests. Eighth note rests.

Sixteenth note rests.

Thirty-second note rests.

§ 68. The terminus of a period or strain of music, or of a line of poetry, is denoted by a Double Bar, (||).

§ 69. Two double bars standing together (||), show the end of a tune, or composition.

§ 70. When two or more notes on the same degree of the staff, are to be performed as one sound, and to one syllable, they are connected by a character called a Tie. (—).

§ 71. A character made thus, (—) is used to connect notes on different degrees of the staff, which are to be sung to one syllable—it is called a *Slur*.

§ 72. When a strain or any portion of music is to be repeated it is denoted by a row of dots (:) across the staff, called a repeat. Sometimes the repetition of a short passage is indicated by the word *Bis*.

§ 73. A Pause or Hold (⌚) over a note or rest, denotes that its time is to be prolonged beyond the usual length; and in performing the beats, the hand during such prolongation must remain at the point it may have reached, in describing the legitimate time of the note or rest.

§ 74. The letters D.C., which stand for *Da Capo*, placed at the end of a piece of music, over or under the staff, direct the performers to return to the beginning.

§ 75. When a degree has already been sharpened or raised a half step above its *natural* position, by a sharp in the signature, it may still be raised another half step by the use of the Double Sharp, made thus : (\*).

§ 76. A degree already depressed a half step, by a flat in the signature, may still be depressed another half step by the use of the Double Flat, made thus : (b).

§ 77. A Double Sharp is cancelled thus : (ff), and a Double Flat thus : (bb).

§ 78. The Brace shows the number of parts that move together or form the score. Thus :

### EXAMPLE 29.

Alto. For low female voices.

Treble. For high female voices.

Bass. For low male voices.

Brace.

§ 79. Sometimes two parts are written on one staff as in the second of the above examples. When the Treble and Alto are both written on the same staff, the Treble takes the *upper* and the Alto the *lower* notes. When Tenor and Base are written on the same staff, the Tenor takes the *upper* and the Bass the *lower* notes.

## CHAPTER VIII.

## MELODY—SOUNDS IN ANOTHER ORDER.

§ 80. The different tones of the scale, thus far, have been made to follow each other in their regular order of progression; but this is not always the case: sounds may proceed by skips as well as by degrees, and after a little practice, are easily measured by the eye.

## § 81. Rule for reading notes in all Clefs and Keys.

Observe that when Do, or one of the scale, occupies a *line*, Do, Mi, Sol, and Si, will occupy lines; placing Re, Fa, La, and Do (eight) on spaces.

When Do occupies a space, Do, Mi, Sol, and Si will occupy spaces; placing Re, Fa, La, and Do (eight) on lines. Thus:

*Note.*—Exercises similar to the above may be practiced in all the keys, without the signature. Too much attention cannot be paid to this subject by teachers. Accustom your pupils to read the notes in any and every position on the staff, and when you introduce transposition proper, you will have no trouble in getting them to read the notes readily.

## CHAPTER IX.

## EXTENDED SCALE.

§ 82. It has already been intimated that sounds of the scale may be extended *above* eight or *below* one.

§ 83. When sounds lower than one occur, one will be treated or regarded as eight of a *scale below*.

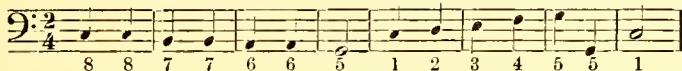

§ 84. When sounds higher than eight occur, eight will be treated or regarded as *one* of a *scale above*.

EXAMPLE 32.

## CHAPTER X

## CHROMATIC SCALE.

§ 85. A sign is used in music which, when placed immediately to the left of a note, indicates a tone a *half step higher* than the letter upon which the note is written would otherwise represent. This is called a *Sharp* ( $\sharp$ ). Another sign is used, which, when placed immediately to the left of a note indicates a tone a *half step lower* than the letter upon which the note is written would otherwise represent. This is called a *Flat*, ( $\flat$ ).

§ 86. By the use of flats and sharps we may divide all the intervals of the scale, that are a whole step distant from each other, into half steps, thus forming an entire scale of small intervals or half steps, called the Chromatic Scale. Thus :

EXAMPLE 33.

Ascending.

1  $\sharp$  1 2  $\sharp$  2 3 4  $\sharp$  4 5  $\sharp$  5 6  $\sharp$  6 7 8  
C C# D D# E F F# G G# A A# B C  
Do, di, re, ri, mi, fa, fi, sol, si, la, li, si, do.

Descending.

8 7  $\flat$  7 6  $\flat$  6 5  $\flat$  5 4 3  $\flat$  3 2  $\flat$  2 1  
C B B# A A# G G# F F# E E# D D# C  
Do, si, se, la, ie, sol, se, fa, mi, me, re, re, do.

§ 87. All of the whole steps (tones) of the scale being thus divided, either by means of the sharps or flat, we find the Chromatic Scale to consist of thirteen sounds, and twelve intervals.

§ 88. In singing by syllables, whenever a note occurs with a sharp, or flat before it, the *vowel* sound is changed. When a sharp appears, the syllable ends with *ee*; when a flat, with the long *a* or *ay*: thus, when one is sharpened or raised a half step, Di, (pronounced Dee) is substituted for Do; when seven is flattened, Se (pronounced Say) is substituted for Si, &c.

§ 89. A sharp or flat continues in force throughout the measure in which it occurs ; also through successive measures, *when the same tone is continuously repeated* ; but not otherwise.

EXAMPLE 34.

§ 90. The effect of a flat or sharp is cancelled by a character called a Natural, ( $\natural$ ).

## CHAPTER XI.

## TRANSPOSITION OF THE SCALE.

§ 91. A Scale is said to be based on that letter or degree which is taken as *one*, and the other tones proceeding from one must be represented on consecutive or conjoint degrees.

§ 92. When the scale is based on C, the first added line below, (G clef) as in Chap. IV, Ex. 10, it is said to be in its natural position ; because the intervals, (steps and half steps), as represented by the letters, correspond to the intervals which nature has established in the scale, and which are represented by the numerals.

§ 93. This relation, or order of intervals, between letters and numerals must always be preserved, which is done by the use of sharps or flats, introduced upon certain letters.

§ 94. When one or Do is placed on any other letter than C, the scale is said to be *transposed*, and the letter taken as *one* of the scale is called the *key*. Thus, if one be on C, the scale is said to be in the *Key of C*; if one be on G, the scale is said to be in the *Key of G*, and so on.

§ 95. There are two ways of transposing the scale; one way is by fifths, in which the sounds are all carried a perfect fifth higher, or a fourth lower, and the other is by fourths, in which the sounds are all carried a perfect fourth higher, or a fifth lower.

§ 96. When the scale is transposed by fifths, sharps are introduced to preserve the proper order of intervals between six and seven, and seven and eight of the scale.

*Note.—It is not our intention, in a book of this kind, to enlarge upon the theory of transposition. We do not suppose it to be necessary. Every intelligent teacher will be able to explain the subject according to the wants of his pupils; and if persons desire to try self instruction, we advise them to use works written expressly for their wants. There are many such published.*

§ 97. These sharps are placed immediately after the clef, and are called the *signature* or sign of the key.

§ 98. Each key has its signature or sign by which it is known.

§ 99. The Key of C is known by its having no sharps or flats—the key is said to be natural.

§ 100. The signature of the Key of G, is F sharp, or *one sharp*.

§ 101. The signature of the Key of D, is F and C sharp, or *two sharps*.

§ 102. The signature of the Key of A, is F, C and G sharp, or *three sharps*.

§ 103. The signature of the Key of E, is F, C, G and D sharp, or *four sharps*.

§ 104. The signature of the Key of B, is F, C, G, D and A sharp, or *five sharps*.

#### § 105. Rule for finding the Key Note in sharps

When two or more sharps appear as the signature of a piece of music, the key note or one of the scale to which the syllable Do is applied in solmization, will be found on the *first degree above the last sharp*—the sharp farthest from the clef. If there is but one sharp, the key note is the *first degree above it*.

#### ILLUSTRATION.

§ 106. When the scale is transposed by fourths, flats are introduced to preserve the proper order of intervals between *three* and *four*, and *four* and *five*.

§ 107. These flats are placed immediately after the clef, and are called the *signature* or sign of the key.

§ 108. Each key has its signature, or sign, by which it is known.

§ 109. The signature of the Key of F, is B flat, or *one flat*.

§ 110. The signature of the Key of B flat, is B and E flat, or *two flats*.

§ 111. The signature of the Key of E flat, is B, E and A flat, or *three flats*.

§ 112. The signature of the Key of A flat, is B, E, A and D flat, or *four flats*.

§ 113. The signature of the Key of D flat, is B, E, A, D and G flat, or *five flats*.

#### § 114. Rule for finding the Key Note in flats

When there is but *one flat*, the key note will be found *four degrees below*, or *five degrees above* the flat, including the degree upon which the flat stands.

## ELEMENTARY DEPARTMENT.

When there are two or more flats, the key note will be found on the same degree with the *last flat but one*; that is, *next to the last flat is Do*.

## CHAPTER XII.

### MINOR SCALE.

§ 115. The scale explained in Chap. III, is called the Major Diatonic Scale. The scale explained in Chap. X, is called the Chromatic Scale. Besides these, there is still another Scale, in which the order of intervals (steps and half steps) is different—this is called the *Minor Scale*.

§ 116. There are two forms of the minor scale in use; and in both forms the intervals differ from those of the major.

§ 117. The chief difference between the major and the minor scale is in the size of the *third*; that of the major being composed of two steps, or tones, while that of the minor is only a step and a half, or a tone and a half.

§ 118. In the first form of the minor scale the intervals are not the same in ascending as in descending. It will be observed, in ascending, that the *sixth* and *seventh* are sharped, in descending they are *restored* by the *natural*.

§ 119. In this form, ascending, the half steps occur between *two and three*, and *seven and eight*—descending, between *six and five*, and *three and two*.

### EXAMPLE 36.

#### MINOR SCALE—FIRST FORM.

§ 120. In the second form of the minor scale there are three intervals of a half step each, three of a step, and one of a step and a half.

§ 121. The intervals are the same in ascending as in descending. The half steps occur between *two and three*, *five and six*, and *seven and eight*; the step and a half between *six and seven*.

### EXAMPLE 37.

#### MINOR SCALE—SECOND FORM.

§ 122. When the major and minor scales have the same signature, they are said to be related.

The signature of C major and A minor is natural—therefore, the key of A minor is the relative minor to C major; and the key of C major is the relative of A minor.

§ 123. The relative minor to any major key is based on its sixth; and the relative major to any minor key is based on its third.

§ 124. The letters and syllables correspond in the major and its relative minor; thus, the syllable Do, both in the key of C major, and its relative A minor, is applied to the letter C, though C is *one* in C major, and *three* in A minor.

## CHAPTER XIII.

### DYNAMICS—SOFT AND LOUD SOUNDS, OR EXPRESSION.

§ 125. In order to give proper expression to words, or sentences, it is necessary sometimes to sing louder, and sometimes softer, according to the sense or character of the subject matter.

§ 126. The expression is generally indicated, though very imperfectly, by the Dynamical characters now about to be given. We avoid going into a lengthened explanation of these characters, as we deem it unnecessary—they appear in most of the books as they are given in this—in a tabular form

## CHAPTER XV.

## General Directions to Singers.

NOTE.—The following rules to singers have been gathered from the best writers on the subject, and are given here simply as *hints* to the vocal student. Very little importance is attached to them as a part of this book ; as almost every thing in the way of correct vocal exertion must be learned by imitation or example. Therefore, we recommend those who desire to become correct vocalists, to place themselves under the direction of a competent teacher of vocal music, and not to attempt the observance of any rules until they have received such training, lest they become confirmed in errors not easily corrected. We have no confidence in the various systems of “self instruction” which have become so popular of late.

## GENERAL DIRECTIONS.

1. Stand or sit erect, so as to use the vocal organs with ease
2. Keep the lungs well filled, by short, and silent inhalations.
3. Take breath at such places as will not injure the sense of the words ; at pauses, and after emphatic words.
4. Attack sounds without sliding to them.
5. The emission of tone should be free, open, round, full, pure and resonant ; it should be instantaneous, firm and decided ; without hesitancy, trembling, wavering or drawling.
6. Hold long sounds steadily, firm and equal, and do not yield to the desire to slide up or down to the following sound as a relief.
7. Endeavour to manage the swelling and diminishing of the voice, when required, with due gradual proportions.
8. Do not try to adopt the voice of some one else, but cultivate a free, open and correct use of your own
9. Pronounce words as in good speaking, having them prepared in the mouth, as it were, before utterance.
10. Make all prolongations on vowels, and avoid the extension of consonants.
11. Be cautious of wasting breath upon *h* and like *spendthrifts*.
12. The letter *a* by itself, or being on an unaccented syllable is pronounced *ä* as *ä-men*.
13. The word *the*, before consonants is pronounced *tha* as *tha* heavens : before vowels, *the*, as the earth.

Cheer the pilgrim's vision dreary,  
Far—from home.

2 Star of Love, our spirits lighting,  
Bless the desert land we roam,  
Heart with kindred heart uniting,  
Far—from home.

3 Star of Faith, in thee confiding,  
Ali our fears are overcome,  
On the waves securely riding,  
Far—from home.

4 Star of Hope, to mortals wailing  
O'er the dark and dismal tomb,  
Shine when earth and flesh are failing,  
Far—from home.

5 Star Divine, thy beam shall guide us,  
Till with joy the ransom'd come,  
Where no fate shall e'er divide us,  
Safe—safe at home!

*God of Heaven, to sinners loving.*

1 God of Heav'n, to sinners loving,  
Smile in peace upon our way,  
Cheer us while o'er earth we're roving,  
Far, far away.

2 God of Love, when sorrows press us,  
Teach us how, to thee, to pray,  
Woes remove, that do distress us,  
Far, far away.

3 God of Faith, our souls are weary—  
Beam on us a heav'ly ray,  
Lead us from the prospect dreary,  
Far, far away.

4 Prince of Peace, O, safely guide us—  
From our hearts no longer stay—  
Chase the sins that long have tried us  
Far, far away.

5 Jesus Christ, our dear Redeemed,  
From our sins, O, set us free—  
Take us from this world of sorrow  
Home, home to thee.

The lyrics describe the resurrection of Jesus Christ, mentioning the three days he spent in the tomb, his emergence as a conqueror, and his ascension into heaven. # WEEP NOT FOR ME. 8s & 4s Peculiar.

DR. A. B. EVERETT. 187

1. When the spark of life is wan-ing, Weep not for me; Weep not for me; When the languid eye is straining, Weep not for me; Weep not for me,

2. When the pangs of death as-sail me, Weep not for me; Weep not for me; Christ is mine, he cannot fail me, Weep not for me; Weep not for me;

When the feeble pulse is ceas-ing, Start not at its swift decreas-ing; 'Tis the fetter'd soul's re-leas-ing: Weep not for me, Weep not for me.

Yes, tho'sin and doubt endea-vor From his love my soul to sev-er, Je-sus is my Strength for-ev-er: Weep not for me, Weep not for me.

# SINNER! COME. 3s & 6s.

I. B. W. By permission,

1. Sin-ner! come, Mid thy gloom, All thy guilt con-fess-ing; Trembling now, Contrite bow, Take the offered blessing.

- 2 Sinner! come, While there's room--  
While the feast is waiting;  
While the Lord, By his word,  
Kindly is inviting.
- 3 Sinner! come, Ere thy doom  
Shall be sealed forever;  
Now return, Grieve and mourn,  
Flee to Christ, the Saviour.

1 O how happy are they Who their Saviour obey, And have laid up their treasures above; Tongue cannot express The sweet comfort and peace Of a soul in its earliest love.

2. That sweet comfort twas mine, When the favor divine I received thro' the blood of the Lamb; When my heart first believed, What a joy I received, What a heaven in Jesus's name!

1 { When the harvest is past and the summer is gone, And sermons and pray'rs shall be o'er; } When the beams cease to break of the blest Sabbath morn, And Jesus in - vites thee no more; } When the rich gales of mer - ey no long - er shall blow,

The gospel no message de - clare,— Sinner, how canst thou bear the deep wailings of woe, How suf - fer the night of des - pair?

1. There is an hour of peaceful rest To mourning wanderers given; There is a joy for souls distressed, A balm for every wounded breast, 'Tis found alone in heaven  
 2. There is a home for weary souls, By sins and sorrows driven, When tossed on life's tempestuous shoals, Where storms arise, and ocean rolls, And all is drear but heaven

## FARMVILLE. 8s &amp; 6s.

 2. Just as I am—and waiting not To rid my soul of one dark blot, To thee, whose blood can cleanse each spot, O Lamb of God, &c.  
 3. Just as I am—though toss'd about With many a conflict, many a doubt, With fears within and wars without—O Lamb of God, &c.

From "Church Peal." J. D. Hext.

1. Hark! to the solemn bell, Mournfully pealing, What do its wailings tell, On the ear stealing? Seem they not thus to say, Lov'd ones have pass'd away? Ashes with ashes lay, List to its pealing  
2. Earth is all vanity, False as 'tis fleeting; Grief is in all its joy, Smiles with tears meeting; Youth's brightest hopes decay Pass like morn's gems away, Too fair on earth to stay,

2. When our Deliv'rer comes, By and by, by and by, From Egypt's yoke set free, We will hail the ju - bi - lee, And to Canaan all re - turn By and by, by and by.  
3. And when to Jordan's flood We are come, we are come; Jehovah rules the tide, And the waters will divide, While the ransom'd host shall shout, "We are come, we are come."  
4. There friends shall meet again, Who have lov'd, who have, &c; Our embraces shall be sweet, When we each other greet, At our great Redeemer's feet, Who have lov'd, who, &c
