Philadelphia :

PUBLISHED BY J. G. AUNER—No. 331 MARKET STREET,
AND FOR SALE BY THE PRINCIPAL BOOKSELLERS THROUGHOUT THE UNITED STATES

Southern District of New-York, ss

BE IT REMEMBERED, That on the 12th day of February, A. D. 1828, in the fifty-second year of the Independence of the United States of America, Samuel Dyer, of the said District, hath deposited in this Office the title of a Book, the right whereof he claims as Proprietor in the words following, to wit:

"Dyer's New-York Selection of Sacred Music, consisting of about two hundred and sixty approved Psalm and Hymn Tunes from the Works of the most esteemed Authors, ancient and modern; arranged for four voices, and adapted to all the metres in general use amongst the various religious denominations. And a Concise Introduction to the Art of Singing, with Lessons and Examples, according to the English and Italian methods. Also, a Supplement, containing a variety of admired Tunes, not inserted in any former edition of this work. By Samuel Dyer. Fourth Edition, improved and enlarged."

In conformity to the Act of Congress of the United States, entitled "An Act for the encouragement of Learning, by securing the copies of Maps, Charts, and Books to the Authors and Proprietors of such copies, during the time therein mentioned." And also to an Act, entitled "An Act supplementary to an Act, entitled an Act for the encouragement of Learning, by securing the copies of Maps, Charts, and Books, to the Authors and Proprietors of such copies, during the times therein mentioned, and extending the benefits thereof to the arts of designing, engraving, and etching historical and other prints."

FRED. J. BETTS,

Clerk of the Southern District of New-York.

PREFACE.

The first edition of the present work was published in Baltimore, in 1817, connected with a selection of Anthems. The Hymn tunes being wanted separately, a second and large edition of them was printed in 1819, and a third in 1824. The demand for this edition of tunes appearing to be regular and increasing, the compiler has been induced to stereotype it, and now presents this fourth edition to the religious public with increased confidence, in the belief that they will unite with him in considering its appearance as being improved, as well as the arrangement of some part of its contents.

The Editor commenced his musical career in the United States, as Chorister and Teacher of Sacred Music, in the city of New-York, in 1812, and in the 27th year of his age—removed to Philadelphia in November of that year; when a Society was soon afterwards formed for the practice of Oratorio Music, and gave a series of Sacred Concerts, the direction of which was confided to him; here he remained until 1815, when considerable inducements being presented for going to Baltimore, he removed to that city in November of the same year. Here he was encouraged by the patronage afforded him, and which he will ever most gratefully remember, to undertake the publication (as before stated) of this selection of tunes. In 1818, the Editor, with a view of introducing his work to more general notice, visited and taught in a number of places south of Baltimore, until the summer of 1822, when he returned to that city and published his second and large edition of ANTHEMS, which has been favourably received, and extensively circulated. Soon after the completion of this last work, he removed to the city of New-York, from whence this present edition is issued, and where he expects to become a permanent resident.

When the Editor first commenced teaching Psalmody in Philadelphia, the want of a work similar to the present volume was very much felt. It was necessary such a publication should contain—1. A suitable Introduction to the Rudiments of Music. 2. As numerous a collection as could be inserted in the prescribed limits of the standard and popular tunes used in the principal cities and congregations throughout the Union. 3. A variety of tunes adapted to the peculiar metres in use, and also some of a more animated and brilliant style, for the exercises of practitioners, and the use of Singing Schools and Societies. To supply the wants of the religious community in these respects, the present work was therefore compiled, and adapted more particularly for the use of the Middle and Southern states: and it is satisfactory to find that this publication has appeared to answer the desired purpose in some good measure, and has been very generally approved wherever it has been introduced.

The scientific musician, and critical harmonist, will doubtless find much to censure in the following pages; to such persons, the Editor would merely remark, that had he compiled a work of this kind exclusively for their use, or, indeed, to

have answered exactly his own ideas and wishes, the selection of tunes, and arrangement of the parts, would have been different from that which is here given; but this would not have answered the purpose the compiler had in view, nor would it have accommodated the description of persons for whose use this work was specially designed; the brevity it is deemed expedient to observe in this preface, forbids any enlargement on this head.

The Introduction to Music, accompanying the present work, has been enlarged by the addition of nearly double the quantity of matter, contained in the former editions of this volume, and much attention has been given to render it as plain and explicit as possible. The explanation of the Gamut, and the manner in which the connexion of the several parts is shown, it is hoped will prove particularly acceptable, both to the teacher and pupil; as also, the division of the whole into separate lessons or chapters, with questions at the end of each of them.

A variety of new practical lessons for the exercise of the voice, are also inserted, which it is believed will be found well adapted for advancing the progress of those learners who will bestow the requisite attention upon them. It may be obtained separately from the body of the work, if desired.

In the selection of tunes, the object kept in view has been, to insert some of each of the grave, plain, flowing, animated and fuguing descriptions, that the different tastes of individuals might be gratified. Of the first kind which are particularly adapted for congregational use, it is believed a sufficient proportion will be found, both of those which have been in general use, and others which are entirely new, to form a pleasing variety in congregations where this work may be introduced.

The great variety of peculiar metre hymns in use in the Methodist, and some other denominations, has rendered it impracticable for the Editor, consistent with his plan, and in a publication of this size, to insert tunes suitable for all of them; for these, indeed, would alone fill a moderate sized volume: those which are introduced in this work, comprising a variety of nearly thirty different kinds, are such as are more generally called for, and which he trusts will prove acceptable and useful.

With sentiments of gratitude for the patronage hitherto afforded him, and in the hope that this publication may aid in promoting the improvement of this part of the public worship of God, this volume is humbly submitted to the candour and encouragement of teachers of Psalmody, leaders in congregations, and the religious public at large, by

THE EDITOR.

New-York, Feb. 1, 1828.

Fourth edition published, New-York, 1828.

N. B. The repeating and expressive Tunes are in Italics, being suitable only to particular Hymns.

INDEX OF TUNES ACCORDING TO THEIR MEASURES.

N. B. The Figures show the number of syllables contained in each line. Sup. refers to the supplement, at the end.

GENERAL OBSERVATIONS.

In the arrangement of the parts in the following work, the Air, or principal melody, has invariably been placed next above the Bass, and is always designed for female voices, and in the passages marked *Pia*, for them *exclusively*. The convenience of those persons who perform on the Organ, or other keyed instruments, has also been consulted in this arrangement. The Tenor is placed next above the Air, and the Alto, or Counter Tenor, on the upper stave, the more conveniently to find room for the ledger lines, which are so frequently used in this part. As this order of the vocal parts differs from that laid down in the Gamut, or General Scale, (see p. 3 of the rudiments,) it has been deemed expedient to show the connexion of the several parts as observed in this volume, by the following example, viz. :

SCALE OF THE TENOR AND ALTO.

The musical notation consists of three staves. The top staff is labeled "TREBLE--FEMALE VOICES." and shows a scale from C to C. The middle staff is labeled "BASS." and shows a scale from G to C. The bottom staff is unlabeled but follows the same scale pattern as the middle staff. All staves begin with a treble clef and have a common time signature. The notes are represented by small circles on the lines of the staves.

C D E F G A B C D E F G A B C
TREBLE--FEMALE VOICES.

C D E F G A B C
BASS.

G A B C D E F G A B C

It is deemed necessary to observe, that in *this* edition of the present work, additional parts have been arranged to nearly *all* the tunes which were inserted in *two* and *three* parts only, in the *former* editions—also, that a few tunes, which were believed to have been but little used, have been left out, and others put in their places which were *known* to be popular and useful.

Agreeably to the general wish expressed by those who have used this Work.

the Editor has been careful not to alter the *numbers* of the tunes from the order of the *former* editions; but in *some* few cases it was unavoidable; and it will also be seen, that on some pages containing *two* tunes, the *second* tune has no number at all; this occurs where the pages had *before* been filled by *one* tune, and is done that the succeeding numbers may be retained in their *former* order. In the Index, *both* tunes on the *same* page will be numbered *alike*. It is hoped no inconvenience will be caused by this trifling departure from the regular succession of numbers.

Although the present volume contains (including the supplement) about three hundred hymn tunes, yet many very valuable and popular melodies are necessarily excluded for want of room; and this will, therefore, it is hoped, be received as the Editor's apology for the omission of such tunes as may have been desired by any purchaser, who may feel disappointed in not finding some particular tune or tunes he might wish to have seen inserted.

It has been the particular care of the compiler, to avoid, as far as possible, altering the Air and Bass of tunes which have been long in use, and have become very familiar, well knowing the embarrassment and inconvenience it often causes to inexperienced singers; and when any deviation occurs from former copies, it has been made because deemed absolutely necessary, or as being greatly preferable. In the Tenor and Alto parts, more freedom has been used; but it is hoped that these parts, as here arranged, will be found suitable and pleasing.

The Editor has noticed, with much regret and mortification, in many publications of Psalmody, the *alterations* so frequently made in the *names* of tunes; and the rule he has prescribed to himself on this head is, to ascertain, when practicable, the *first*, or *original* name given to a tune, and to adhere to it in preference to any name which may afterwards be affixed to it.

The arranged Index is given for the convenience of finding a tune to any required metre with greater facility, as well as to furnish at one view, a list of *all* the tunes in each metre. It is believed this will be found peculiarly acceptable to leaders of Psalmody, and others who may be occasionally called on to act in that capacity. In this Index, the *repeating* tunes are put in Italics, that when the leader of singing is suddenly called on to set the tune, he may at once be able to distinguish those which are of this description, and thus avoid the mischievous effects of improper repetitions.

It is particularly recommended, that attention be paid to the terms *Pia*, and *For*, which very frequently occur in this volume, and when properly observed, produce a truly pleasing and beautiful effect. The other directive terms which are generally placed at the beginning of each tune, will also be found useful in denoting the style or manner of performing them, and which is of considerable importance. The explanation of the Italian terms, which are often used, will be found in the Musical Dictionary prefixed to this volume.

A Concise Introduction to Music.

THE practice of Sacred Music being in itself so agreeable and noble, a strong inducement is presented to those persons, who take delight in hearing or uniting in this pleasing exercise, to commence the study of the art: but as words cannot of themselves express sounds, notes have been invented for this purpose; yet few comparatively are able to attain any considerable proficiency in this science, without the help of a master. To assist the ideas of the pupil, and ease the labour of the Tutor, the following summary of the first principles of Vocal Music has been compiled, and pains have been taken to render the subject as easy of comprehension as possible.

LESSON 1st.

CHARACTERS USED IN MUSIC.

1. The first thing a learner ought to attain, is a proper knowledge of the characters by which Music is expressed; and these are to be committed to memory.

2. The first character is the Stave or Staff, which consists of five lines and their intermediate spaces, thus:

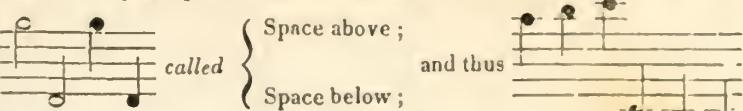

LINES.	SPACES.	LINES AND SPACES.
5	4	9
— 1 —	3	7
3	2	5
— 2 —	1	4
— 1 —	— 1 —	— 8 —

3. On these lines, and in these spaces, are the notes of Music written.

4. The lowest line is always reckoned as the first;—the spaces are counted in the same manner.

5. The lines and spaces are called degrees; thus the stave includes nine degrees, viz: five lines and four spaces.

6. When notes are required higher and lower than the compass of the stave, they are placed above and below it, thus:

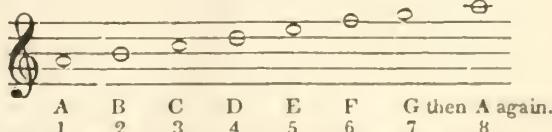

7. The short lines drawn through the heads of the notes in the last example, are called Ledger Lines, and may be added to any extent required.

8. The next essential direction in the study of Music, is to be informed of the *manner*, in which musical sounds are *expressed*; and this is effected, by using for this purpose, the first seven letters of the Alphabet, which number includes the whole of the primitive sounds in Music.

9. The first and most natural succession of sounds, used for exercising the voice, consists of the tones given to these seven letters; to which it is found necessary to add an eighth letter or note, to complete the series, and which, thus completed, is then termed an Octave.

10. This eighth letter or note is formed by adding the *first letter to the seven*, as will be seen by the following example, viz:

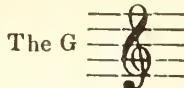

11. When the notes of a tune exceed the compass shewn in this example (which is constantly occurring,) they are to be repeated in the same order, ascending and descending, as far as may be required, or to the utmost extent of the voice.

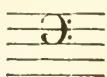

12. The ordinary compass of the human voice, from the lowest or gravest voices of men, to the highest or most acute voices of women, is found to be three Octaves, or twenty two sounds: but all further information on this head, will be found included in the explanation of the Gamut or General Scale: See page iv.

13. The character next to be explained, is the Cliff or Cleff, which is placed at the beginning of the Stave, and is used to determine the exact situation of the letters on the lines and spaces.

4. Of this character there are three or more kinds; but two only are now in general use for vocal music, and these are all that have been made use of in the present work:—they are as follows, viz.

The G Cliff.

The F Cliff.

The third is called the C, or Alto Cliff, in this form,

and was formerly always employed to express the Tenor and Alto parts, or the middle and highest voices of men; but is now grown so much out of use, as not to require a particular explanation in this compendium.

15. The Cliffs are called by the names of the letters which they represent; and the letters on the other lines and spaces of the stave, are reckoned from these Cliff letters or notes.

16. Thus the first of the above Cliffs is placed on the second line of the Stave, and the fixed name for that line is G—it properly belongs to the Treble part, or principal Air; but is now very generally used for the Tenor and Alto, or Counter parts, *in lieu* of the C Cliff.

The second of the two Cliffs represented as above, is placed on the fourth line of the Stave, to which it gives the name of F. This is the Cliff used for the Bass, or lowest voices of men.

The example which follows, of the Gamut or General Scale, will

explain the situation of the letters on the Stave, as governed by the several Cliffs.

QUESTIONS TO THE FIRST LESSON.

1. What is the first thing necessary, in order to understand Music?
2. What is the first character used in Music?
3. What is the particular use of the Stave or Staff?
4. Which of the five lines is considered as the first?
5. Of how many degrees does the Stave consist?
6. How are notes named, and written, when they are required to exceed the compass of the Stave?
7. What are the lines called in this last example, and what is their use?
8. In what manner are musical sounds expressed?
9. How many original sounds are there in Music?
10. What do you mean by the Octave, and how is it formed?
11. If the number of original notes is so few, how is the great variety of sounds expressed, which is produced by the different kinds of male and female voices?
12. What number of sounds are employed in the ordinary compass of male and female voices?
13. What do you understand by the Cliff or Cleff, and what is its use?
14. How many kinds of Cliffs are there, and how many used in this work?
15. How do you name the several Cliffs?
16. For what part in Vocal Music is the G Cliff used—and for what part the F Cliff?

LESSON 2nd.

THE GAMUT, OR GENERAL SCALE.

1. THE Gamut, is the name given to the Scale or Table, on which the notes are written, which is necessary to be well understood; and to learn the names and situations of these notes, constitutes what is called a knowledge of the Gamut.

As it is of the first importance to acquire this knowledge, the following explanation, it is hoped, will render it easy of comprehension to all who are disposed to give the necessary attention to the subject.

2. It may be necessary to premise, that Nature has divided the human voice into at least four kinds, the order of which is, 1st. the Bass, or lowest voices of men,—2nd. the Tenor, the next highest species of

male voices,—3rd. the Alto, or Counter, the highest pitch for male voices, and the lowest for boys or women,—4th. the Treble or Soprano, which is the highest species of female voice.

As the Bass part, or gravest sounds in Music, is the foundation on which all the others rest, we commence, in the above Scale, with the first line of that part, having F for its Cliff note and being the first or

lowest stave of the three, and *number* the several gradations of sound upward, in a regular succession, inserting also the proper *letter* and *syllable* to each line and space.

3. The Scale for the next highest grade of male voices, is on the second stave in order, has G for its Cliff note, and is termed the Tenor or Tenore. The scale assigned to this part, it will be seen, begins, or has its first line corresponding with the sixth gradation of sound, from the first Bass note, and is one and the same sound with the note on the third space of the Bass Stave.

4. The Scale for the Alto, or Counter, which is the next highest part, in regular order, is placed on the *same* stave with the Tenor, and the same Cliff is used to express it, as for the Tenor and Treble parts. As before stated, this is the highest of the parts sung by male voices, and is considered as commencing at the *third* space of the Tenor stave, or the *sixth* degree above the *first* line of that part, and corresponds with the *eleventh* degree from the first Bass note, and with the *first* ledger line *below*, on the Treble or highest stave,

5. The *upper* Stave in the above Gamut, comprises the scale for the Treble or highest species of female voices; and the *first* line on *this* stave, is the *third* degree above the *first* Alto or Counter note,—the *eighth* degree above the first line of the Tenor part, and the *thirteenth* degree above the first Bass note: it corresponds with the *fourth* space in the Tenor and Alto parts, and the *second* ledger line *above* in the Bass. It is considered as extending to G, first space above, which completes the *third* Octave, or twenty-second sound from the *first* Bass note.

6. The notes extending *beyond* the compass of the scale, as just explained, above and below, are comparatively seldom used in singing, altho' voices highly cultivated, or of great natural compass, have been known to ascend a fifth or Octave above in the Treble, and descend a fifth or more below in the Bass.

7. It will also, it is presumed, be perceived and understood on a reference to the foregoing general scale and explanation, that the *natural* compass of the female voice, is an Octave above that of men.

The notes having ledger lines in the Treble *above*, are called in **Alt**, and such as have ledger lines in the Bass *below* are called **Double**.

8. The natural order of the *single* series of the seven sounds, with the first letter repeated to complete the Octave, is as follows .

Treble,
Alto and
Tenor.

9. Bass.

Treble staff notes: C D E F G A B C
Bass staff notes: fa sol la fa sol la mi fa

Alto/Tenor staff notes: C B A G F E D C

Treble staff notes: C D E F G A B C
Bass staff notes: fa sol la fa sol la mi fa

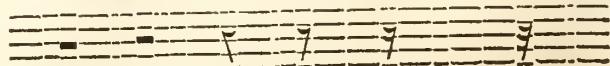

Alto/Tenor staff notes: C B A G F E D C
Bass staff notes: fa mi la sol fa la sol fa

OF THE NOTES AND RESTS.

10. There are in Music six marks of sound, called notes, which by their different forms, designate the proportion of time required in the performance of each of them. These have their corresponding marks of silence called Rests—They are as follow :

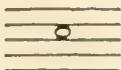

11. Rests.

2. The Semibreve is considered as the measure note, and the standard of time allowed to it, four seconds.
 13. The proportions which these notes and rests bear to each other, are shown in the following table.

One Semibreve is

RESTS.

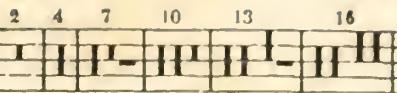

EQUAL TO		RESTS.
2 Minims, or	1	-
4 Crotchets, or	2	-
8 Quavers, or	1	-
16 Semiquavers, or	4	-
32 Demi-semiquavers.	1	-
	8	-
	16	-

The Rests denote a silence equal to the length of the note they represent, and are called by the same name. N. B. The Semibreve Rest is used to fill a bar in all the different kinds of time.

The forms and proportions of these notes and rests, should be strongly impressed on the mind—and it will be well to recollect, that a 4th, is another name for a Crotchet, an 8th, for a Quaver, a 16th, for a Semiquaver, and a 32nd, for a Demi-semiquaver.

14. The rests used for more Bars than one, are written thus,

15. A Point or Dot placed after each of these notes or rests, makes that note or rest, one half longer than without a Dot. Thus a Dotted Semibreve is held as long as three Minims; a Dotted Minim as three Crotchets; a Dotted Crotchet as three Quavers, &c. Ex.

QUESTIONS TO THE SECOND LESSON.

- What is to be understood by the Gamut?
- How many different kinds of voices has Nature produced?—and what is the order of them?
- At what degree from the first Bass note does the Tenor commence?—and with what note in the Bass does it correspond?
- At what degree from the first Tenor and Bass note does the Alto begin?—and with what notes in the Tenor and Bass does it correspond?
- At what degree from the first Alto note, does the Treble or highest part commence?—and with what degrees in the other parts, correspond?—and how far extend?
- To what compass will some voices in the Treble and Bass extend?
- What difference is discovered in the male and female voice?
- How are the seven letters applied to the Treble Stave?
- How are they applied to the Bass Stave?
- How many different notes are there in Music as it regards time?—and their names?
- What are Rests, and how many are there?
- What is considered the standard of time for a Semibreve?
- What is the proportion of the other notes to the Semibreve?
- How are the rests for more than one bar expressed?
- What is the use of a Point or Dot placed at the right-hand side of a note?

LESSON 3rd.

OF THE OTHER CHARACTERS USED IN MUSIC.

- 142. A Single Bar**  is used to divide the notes into equal proportions agreeably to the measure note, and all the notes contained between two Bars are one measure.
- 3. A Double Bar**  is used at the end of a line or strain; and at the close of a piece, when shorter lines are generally added, that the conclusion may be better known, thus : 
- 4. A Hold or pause**  placed over or under a note, denotes it is to be held longer than its usual time, and is sometimes used instead of a Double Bar.
- 5. A Slur,**  placed over or under any number of notes, signifies they are to be sung to *one* syllable, in a smooth and gliding manner.
- When Quavers and Semiquavers are united by a stroke across them at the bottom, the slur is considered unnecessary, and it is generally omitted ; but the manner of singing such united notes is the same, as if a slur was added. 
- 6. The Figure 3,**  when placed over or under three Crotchets, Quavers, &c. denotes they are to be sung in the time of *two* of the same kind, consequently one third quicker than without this figure. Notes having this figure over them, and grouped in 3's are also called *Triplets*.
- 7. A Sharp,**  set before a note, raises it *half a tone* higher than its natural or primitive sound

- 8. A Flat,**  set before a note, lowers it half a tone. 
- 9. A Natural,**  restores a note previously made flat or sharp to its original sound. 
- 10. Sharps or Flats placed at the beginning of a tune, (called the Signature)** affect the letters on which they stand throughout the piece, unless contradicted by the natural, which replaces them in their original state, for that Bar only in which it may occur.
- 11. Sharps, Flats and Naturals** are termed *accidental* when *occasionally* introduced in a piece of Music, and because they affect the sound of the notes before which they are set, no further than the *Bar* or *Measure* in which they are placed. If there be occasion for them in a *succeeding* Bar, they must be again renewed.
- 12. Staccato Marks,** when placed over or under a note or notes, show they are to be sung short and bold ; but a short cessation of sound is to be observed between such notes as have this mark over them, to prevent the increase of time—as for example :
- | | |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| WROTE. | SUNG. |
|  |  |
- The Spots show that the notes are to be performed equally distinct, but soft, or *Piano*.
- 13. A Repeat,**  or :S: or  shews what part of a tune is to be sung twice, and is placed at the beginning and end of the strain to be repeated.

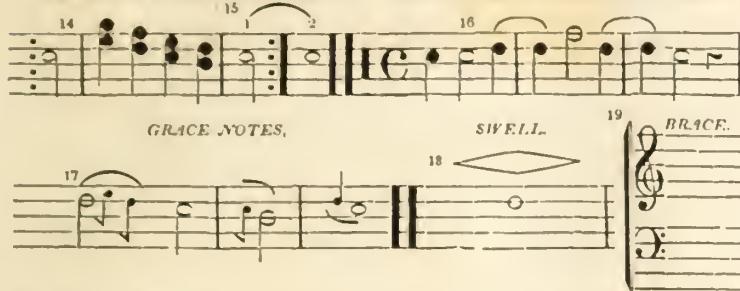

A Repeat of Words, ::||: shows the last words sung are to be repeated.

Other characters are comprised in the following examples :

CHOOSING NOTES.

FIGURES.

SYNCOPATED OR DRIVING NOTES.

14. Choosing Notes are placed in a direct line one above another, and denote that either or both, (if there are two performers,) may be sung at the same time.
15. Figures 1, 2, show that the note under 1 is to be sung the first time, and that under 2 the second—it has been generally understood that if the two bars are slurred together, both are to be sung : this is a false idea : the slur was only meant to designate the two bars.
16. Syncopated or Driving Notes, are so called on account of their being accented or driven out of their proper order in the bar, and require the hand to rise or fall while such notes are sounding.
17. Grace Notes or Appoggiaturas are small extra notes, placed before the larger ones of a longer duration, for the purpose of arriving at the real note with more taste.
18. The Swell intends an increase or decrease of sound in the notes over which it is placed. When thus marked, it begins Piano, gradually increasing to Forte, and then diminishes in the same manner.
19. A Brace connects two or more parts of the same tune together.

QUESTIONS TO THE THIRD LESSON

1. How is a single bar expressed, and what is its use ?
2. Which is the measure note, or standard of reckoning for the others ?
3. How is a double bar and close, written, and their use ?
- 4. A hold or pause?—5. A slur?—6. The figure 3?—7. The sharp?—8. The flat?—9. The natural?
10. What effect have sharps or flats, placed at the beginning of a stave ?
11. When are sharps, flats or naturals termed accidental ?
12. What is meant by staccato marks ?
13. Show how the repeat is expressed, and if more than one kind ?
14. What are choosing notes?—15. Figures 1 and 2?—16. Notes of syncopation?—17. Grace notes, or appoggiaturas?—18. The swell?—19. The brace ?

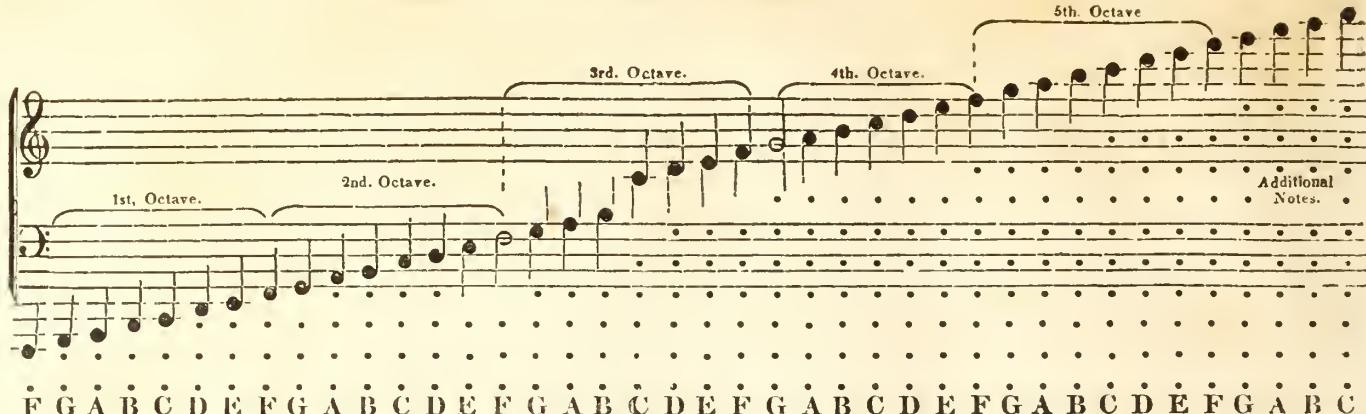

LESSON 4th.

OF SOUNDS.

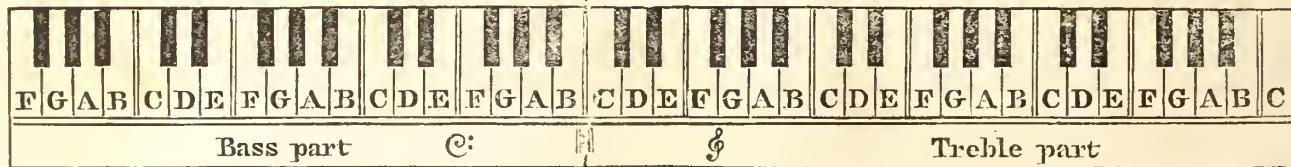

1. The first attempt that is generally made, in order to tune the voice, is by ascending and descending eight notes or sounds ; and this scale or succession of sounds, seems to be that which is the most natural and pleasing to the human ear.
2. This series of notes (as before remarked) is termed an Octave, and consists of sounds at an *unequal* distance one from the other.
3. This is readily distinguished by a good musical ear, and to the most uninformed, can always be explained by exhibiting the keys of the Piano Forte or Organ ; a plate of which is exhibited on the following page.
4. The only explanation it is deemed necessary to give of this plate here, is to state, that the white keys produce what are called the *natural tones*, and the black keys, the *flats and sharps*.
5. The greater distances from one note to another are called *whole tones*, and the smaller distances, *half*, or *semitones* there being nearly the same difference between them, as in the inch and half inch in measurement.
6. The compass of the Octave comprises *five whole tones and two semitones*.

KEY-BOARD OF THE PIANO FORTE

Treble.

KEYS of the
PIANO
FORTE.

7. The situation of these two semitones is *fixed*, and they lie naturally between the third and fourth, and the seventh and eighth, or between E & F and B & C, which is shown by a slur placed over these notes, in lesson No. 1, for tuning the voice.
8. To render this still more intelligible, we shall subjoin the Octave, divided in the manner here stated, and applied to a scale of inches and half inches, as in the following example, *viz*

Scale of Inches and half Inches in the natural key of C Major.

C	$\frac{1}{2}$	D	$\frac{1}{2}$	E	F	$\frac{1}{2}$	G	$\frac{1}{2}$	A	$\frac{1}{2}$	B	$\frac{1}{2}$	C
Fa	<i>sol</i>	<i>la</i>	<i>fa</i>	<i>sol</i>	<i>la</i>	<i>fa</i>	<i>sol</i>	<i>la</i>	<i>fa</i>	<i>sol</i>	<i>la</i>	<i>fa</i>	

9. This order or succession of tones and semitones in the Octave, is called the DIATONIC Scale, and must be perfectly familiar, and well understood, before the pupil proceeds to transposition.

10. It will be proper to observe farther, that this scale may be subdivided into semitones by means of Sharps and Flats, and it will be found, that the Octave consists of twelve semitones, the thirteenth sound completing it. This is shown in the following

EXAMPLE IN G. OR TREBLE CLIFF.

EXAMPLE IN F. OR BASS CLIFF.

SCALE OF THE ABOVE IN HALF INCHES.

C	#	D	#	E	F	#	G	#	A	#	B	C
<i>la</i>	<i>mi</i>	<i>fa</i>				<i>sol</i>		<i>la</i>	<i>fa</i>	<i>sol</i>	<i>la</i>	

11. This subdivision of the Octave into semitones is called the CHROMATIC Scale.

12. Remark, that as a Sharp raises a note half a tone, and a Flat lowers it the same, those (several) two notes in the above example that are connected by a slur, are to be considered as one and the same sound. For instance, C being made sharp is raised half a tone, which answers to D when made flat, which is thereby lowered the same.

OF THE KEY NOTE OR TONIC.

13. THE Key Note is a certain given sound or predominant tone, to which all the others have a particular reference—it may be called

the foundation on which every piece of harmony is erected. The last note in the Bass is always the Key of a tune; and in speaking of Distances or Degrees from the Key, we always reckon from the bottom.

14. There are two modes or keys in music, and but two, the major or sharp mode or key, and the flat or minor mode. The first of these is adapted to express the cheerful passions, and the latter is expressive of the mournful and pathetic.

15. These modes or keys differ from each other with respect to the situation of the semitones in the octave; the major mode having them between the third and fourth, the seventh and eighth, (which has already been shown in the preceding example,) whereas in the minor mode they are between the second and third, the fifth and sixth—see example here subjoined.

A											A
<i>la</i>	<i>mi</i>	<i>fa</i>		<i>sol</i>		<i>la</i>	<i>fa</i>	<i>sol</i>	<i>la</i>		

16. It must be observed farther, that the minor mode or scale, has this peculiarity, that the ascending scale (when extending a whole Octave) differs from the descending: for in ascending, it is necessary to make the sixth and seventh sharp; but in descending to sound them, as in their natural order. Ex.

MINOR SCALE, DESCENDING.

A											A
	G	F	E	D	C	B					

17. The most ready way of ascertaining whether a tune is in the Major or Minor Mode, is by examining the first ascending third from the key note; if it consists of two whole tones it is in the Major Mode; but if it contains only a tone and a half, it is in the Minor Mode.

QUESTIONS TO THE FOURTH LESSON.

1. What succession of sounds, is commonly employed, in the first attempts for tuning the voice?
2. What is this series of sounds called, and is the distance of sound between each note equal?
3. In what manner can this be shown?
4. What are the white and black keys of the Piano-Forte called?
5. What are the greater and smaller distances of sound in the Octave termed?
6. What number of tones and semitones does the Octave contain?
7. Between what degrees of the Octave, do these semitones lie, and is their situation fixed?
8. By what example besides, is this explained?
9. What other name is given to this scale of tones and semitones?
10. Can the Octave be divided into semitones, and how many does it contain?
11. What name is given to the Octave so divided?
12. Are those notes in the last example, which are there made sharp, of the same sound, as the next ascending note, when made flat?
13. What do you understand by the Key note, or Tonic?
14. How many modes or keys are there in music, as it regards expression?
15. What makes the difference in these two modes or scales?
16. What peculiarity is stated, of the Minor scale?
17. What is the most ready way of ascertaining whether a tune is in the Major or Minor mode or key?

LESSON 5th.

OF TIME AND ITS CHARACTERS.

1. TIME is the manner of regulating and measuring sound, with regard to its duration.
2. A Measure is what is contained between two bars.
3. Time, in Music, is quicker or slower, according to the nature of the piece or the design of its author. Each measure or bar of music, contains a certain number of Notes, or Rests, the amount of which is specified by a Mood, or mark of time, placed at the beginning of every tune, after the Cliff: These marks are of three kinds, viz. Common, Triple and Compound.

COMMON TIME.

First Mood  This Mood denotes the slowest movement, each measure containing one Semibreve for its quantity in either Notes or Rests; it has four beats to each measure. Ex.

Second Mood  is a C with a bar through it; contains also one Semibreve in the bar, and is sung faster than the first; four quick, or two slow beats in the bar. Ex.

Third Mood  or  is formed by two figures, placed one over the other at the beginning of the stave, which figures have a reference to the semibreve—the upper figure, showing how many parts or notes are contained in each measure; and the under figure explaining how many such notes constitute a semibreve,—2 signifying a minim, 4 a crotchet, 8 a quaver, &c. This mark shows there are to be two crotchets in each bar, generally understood to be sung more lively than the preceding mood, and is sung with two beats in the bar. Ex.

TRIPLE TIME.

First Mood  contains three minims, or their quantity, in each measure, and has three beats in the bar. Ex.

Second Mood  contains three crotchets, or their amount, in each measure, or Mark.  has also three beats in the bar.

Third Mood  has three quavers for its measure, and three beats in the bar, generally performed somewhat faster than the preceding mood. Ex.

COMPOUND TIME has two beats, or motions in the bar; but has three notes to each beat, and being thus made up, of Common and Triple Time, it is called Compound Time—Two moods or marks of this kind of time are in common use, which are as follow, viz.

Contains six crotchets in each bar. Ex.

Contains six quavers in each bar. Ex.

Practical lessons in most of the above kinds of time, will be found in their proper place in this work.

5. By Beating time is meant, a certain motion of the hand or foot designed to mark the precise movement intended for a piece of music; the mode of doing this is better understood from the instruction and example of a master, than from any written directions. One rule is, however, to be invariably observed; namely, that the hand or foot is to be put down at the commencement of every bar and to rise at the last division of the bar.

QUESTIONS TO THE FIFTH LESSON.

1. What is understood by *Time* in Music?
2. What is meant by a measure?
3. In what manner is time in Music regulated, and how are the notes divided into equal portions?—and how many kinds, or marks of Time, are there?
4. Describe them.
5. What is understood by beating time, and is there any one rule to be observed in all cases?

LESSON 6th.

OF SOLMIZATION OR SOLFEGGIO.

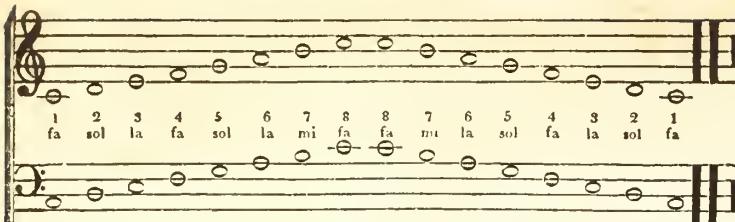

1. IN practising Musical lessons, it is customary to apply certain syllables to the Diatonic intervals of the Octave. The end proposed is, that the same name invariably applied to the same interval, may naturally suggest its true relation and proper sound.

The Italians used for this purpose, the syllables DO RE MI FA SOL LA SI DO; and they were applied in this order to the ascending Major scale, SI being the leading note. The English and Americans have retained only four of these syllables; and as these answer all the purposes designed, our remarks will be confined to them.

2. The seven sounds of the natural, or Diatonic Scale, are named by the syllables FA, SOL, LA, MI*; the first three being repeated, give names to the seven sounds: as for example.

* Pronounced Faw, sole, law, me.

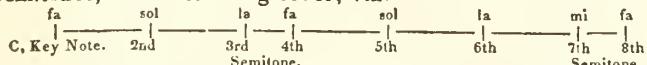

THE DIATONIC SCALE OR OCTAVE.

3. The *mi*, or *seventh* from the key, is the *leading note*, and its *natural place* is on *B*; the other notes are always in the same order from the *mi*, above and below, on whatever letter the *mi* may stand.

4. The first note of the Diatonic scale is a principal, or key, called also the *Tonic*, and the other notes are at natural fixed distances from, and sounded in strict reference to it.

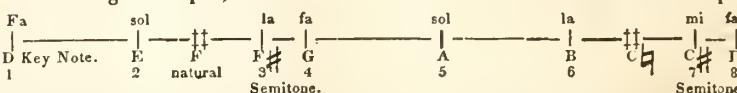

5. The ascending Diatonic scale is divided into five whole tones and two semitones, in the following order, viz.

3. The Key note in the above example, it will be seen, is *C*, and this is called the *natural major key*, because it is the *only* scale, in which the semitones are found in their *natural fixed order* in the octave, *without* the use of sharps and flats. But as this (one) natural major key or scale of *C*, is insufficient for all the purposes of musical composition, so great is the variety in melody and harmony, the other letters of the scale may be, and are made use of as a key note. When therefore any one of the letters besides *C*, is employed for this purpose, it will, on examination appear, that the semitones would then be out of their *regular and fixed order*; and it will, consequently, be found necessary to have recourse to sharps and flats to *restore* them to their proper position. The necessity for doing this, is not always apparent at a *first view*, to persons who only practise *singing*; but is perceived immediately, by any one who performs on the most simple instrument.

To furnish an example of this manner of applying sharps or flats for bringing the semitones into their right situation, when some *other* letter than *C* is the key note, we will suppose *D* is required for the key; it would then be found, that the situation of the *first* semitone would naturally be between the *second* and *third* degrees of the octave; whereas agreeably to a fixed law of nature, it is required to lie between the *third* and *fourth* degrees. The method of bringing this *first* semitone into its right position, is by *raising* the *F* one semitone, by means of a sharp, which will make *F* to be a *whole tone* from *E*, and two whole tones from the key, and thus bring it within *half a tone* of *G* the fourth, and restoring the semitones to their regular order; we have thus, the *first* of the two semitones in the octave made right.

In proceeding upward in this scale of *D*, it will also be found requisite to sharpen *C*, that the semitone may thus be removed from between *B* and *C*, or the sixth and seventh, to their fixed position between *C* and *D*, or the seventh and eighth; this is shown by the following example, which exhibits the scale of *D* with *two sharps*.

This process of removing the semitones in the Octave, is termed *Transposition*, and is effected by *Flats* as well as by *Sharps*. One example of this kind shall suffice: and the effect produced by two flats is herewith given, which is in the key of *B flat*.

B ^b	C	D	E ^b	F	G	A	B ^b

7. The ordinary transpositions of the key from *C*, are eight in number; and in every instance, the *key* is found by referring to the *mi*, the *leading note*; as the *key* is next immediately above it, except in the *minor scale*.

SCALE OF TRANPOSITION BY FLATS AND SHARPS.

111

8. The natural place for mi is always on B, and the Key on C :

- | | | |
|--------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| But if B be flat,
if B and E be flat,
if B, E and A be flat,
if B, E, A and D be flat, | mi is on E, and the Key on F.
mi is on A B flat.
mi is on D E flat.
mi is on G A flat. | Or if F be sharp, mi is on F sharp, and the Key is on G.
if F and C be sharp, mi is on C sharp D.
if F, C and G be sharp, mi is on G sharp A.
if F, C, G and D be sharp, mi is on D sharp. E. |

9. There is also a relative minor key to every major, which is always one third below it. Thus to C major the relative minor will be A ; to F major, the minor will be D, &c. As the major key is first above mi the leading note, the minor is the first below in every transposition.
10. The major and minor keys can be easily determined, by observing the last note in the bass, which is always immediately above or below mi; if above, it is a major key, if below, a minor key.
11. The scale of the minor key differs from that of the major, as the semitones in the major key are between the *third* and *fourth*, and *seventh* and *eighth* degrees ascending. In the minor key, they are between the *second* and *third*, and *seventh* and *eighth* ascending, and between the *fifth* and *sixth*, and *second* and *third* descending.

EXAMPLE OF THE NATURAL KEY OF A MINOR.

In ascending the minor octave in regular succession, the sixth and seventh are to be sharpened ; but in descending, they are to be sounded in their regular natural order.

QUESTIONS TO THE SIXTH LESSON.

- 1 & 2. What are the names of the seven sounds in the Diatonic scale ?
3. Which of the seven sounds is called the leading note ?
4. Which of the seven sounds is the principal or key to the others ?
5. In what manner is the Diatonic scale divided ? Between which of the degrees are the Semitones found ?

6. Which is the natural scale for the major key ?
How is the Key transposed from one letter to another ?
 7. How many ordinary transpositions of the key are there ? How is the key note found ?
What distance is the key from the mi or leading note ?
 8. Where is the natural place for mi ?
 9. Is there any other key in music but the major ?
 10. How is the situation of the keys determined ?
 11. What is the difference between the scale of the Major key and Minor ?
-

We have thus endeavoured to lead on the attentive learner step by step in acquiring a knowledge of the essential points, connected with practical vocal music. In so doing, it has been attempted, to render the subject as plain to be understood as the nature of it, will at all admit ; to enter into detail, where experience had proved it was necessary, and in other parts, to be as concise as was at all consistent with perspicuity. It may with safety be asserted, that there is nothing contained in this compendium, but should be well understood by those persons who are desirous of becoming correct singers, and of being able to sustain their parts with proper effect when performing in concert ; and those inclined to pursue their studies in this interesting art still farther, are referred to larger and more elaborate works, to which they can be recommended by any regular professional organist, or musician. We cannot, however, forbear offering, as the conclusion of this introductory work, some suggestions, which are very necessary to be attended to, on

GRACEFUL SINGING.

A person may be well acquainted with all the various characters in psalmody, he may also be able to sing his part in true time, and yet his performance be far from pleasing, if it be devoid of necessary embellishments : his manner and bad expression may conspire to render it disagreeable. A few plain hints may tend to correct those errors in practice.

It is by no means necessary, to constitute a good singer, that he sing very loud; yet the conduct of some would lead us to think, that this was the principal criterion, as they sing or rather bawl so exceeding loud, that their faces are quite distorted with the violence done to harmony; while not only the tone of the voice but the true sound of the note is destroyed by such undue exertions. The mouth should be opened freely, but if too wide, it would entirely destroy a good tone, and prevent just expression. In singing, imitate the elegant expression of the orator rather than the drawl of the clown. Some persons pronounce their words tolerably well in soft singing, but exceedingly bad when they sing louder; which is owing to the false idea, that they cannot make too much noise in the forte parts: if any do so, let them remember that expression is one of the greatest beauties in music, and that to spoil the expression of a word, in order to sing the louder, is truly absurd. Indeed, there are some words not so agreeable to express in singing as others: such as *bring, thing, &c.* which are often sung *breing, theung,* But there are a few words which should vary a little from common pronunciation; such as end in *i* and *y*; and these should vary two ways. The following method has been generally recommended.—In singing, it is right to pronounce *majesty, mighty, lusty, &c.* something like *majestee, mightee, loftee, &c.* but the sense of some other words will be destroyed by this mode of expressing them; such as *sanctify, justify, glorify, &c.*: these should partake of the vowel *O*, rather than *ee*, and be sounded somewhat like *sanctifoy, justifoy, glorifoy, &c.* It would indeed be difficult to describe this exactly; however, the extreme should be avoided on both sides. It may not be amiss to add, that the word *my* should partake of both the aforementioned variations according to the connection in which it stands. In all quick passing notes, it should partake of the *ee*; but of the *o* in longer sounds, and especially at the beginning of a line. For supposing the line to be, “My soul praise the Lord,” &c. how absurd it would be to sing *Mee soul praise the Lord &c.* Another fault, which should be guarded against, is the beginning a line with a consonant, with which the *last* foregoing line ended. This is owing to retaining the sound of the *last* note in the line, until the *first* note of the *next* line begins. There is nothing easier to correct than this; for a short cessation of sound between the lines, which ought to be observed, would prevent such a disagreeable practice.

In addition to the above remarks, the following directions are subjoined from an eminent author. There are many words in the English language, which are deserving of particular attention; and though of but one syllable, appear as if they were *two* when sung, and that having but one sound when spoken *short*, will have several different sounds when sung *slow*. In these cases the first sound or vowel should be dwelt upon longest in words like *Dear, Voice, &c.* and the last, in words like *Beauty, Dews, &c.* dwelling always on the *accented vowel*. The following example will shew how to pronounce or extend the syllables, sounding the vowels like the Italian, thus,

Italian Vowels sounded thus,		{ A E I O U	
		Ah	eh ee o oo
Words where the accent is given to the first vowel		Words where the accent is given to the last vowel.	
			
Fly, (to be sung) Fly	ai.	Adieu,	Adú-
I, or eye, A	ai.	Dews,	Dú-
Mine, Ma	ain.	Dwell,	Uwé
Dear, Di	ear.	Sweet,	Swé
Voice, Vo	oice.	Beauty,	Bíu
Our, A	uour.		
Sound, Sa	ound		
Praise, Pi	ise.		

The pronoun *my*, bearing a different pronunciation, according to its application, in singing, should be pronounced short, as *me*, when the note is short to which it is sung; but if it is sung to a long note, or to several notes, whether it is to have emphasis or not, it must be sung long, as *ma-i*, (like the word *fly* in the preceding example).

The vowels are to be dwelt upon, and not the consonants, as *N, M, F, R*, and particularly not on *L* or *S*, which is a great fault:—nevertheless, the consonants must be pronounced hard, so that they may be distinctly heard; as without them words would be unintelligible. The Italian language is so musical of itself, that it requires but one direction, Read well,—sing well.

I am indebted for many of the above directions, to my former teacher, Mr T. Walker of London, editor of Rippon's Tune-book; and also to an excellent practical work entitled a New Vocal Instructor, by Arthur Clifton, a distinguished professor of music residing in Baltimore. This excellent and judicious publication should be in the hands of every lady and gentleman desirous of acquiring a correct knowledge of the art of singing, and who, with this object in view, are disposed to practice a course of lessons with diligence and perseverance. It is to be had at the principal Music stores: Price, \$1.50.

Having thus given the most prominent and essential directions necessary for studying Vocal Music, our limits forbid any enlargement on many other interesting particulars, very necessary to be understood by the Chorister, Leader, or private singer. Should it be deemed requisite to make some additions to this Compendium at a future period, the Editor will have much pleasure, in submitting such farther suggestions as may occur to him, or may be recommended by his Musical friends. Meantime, it is hoped, this brief manual may prove useful and acceptable to those for whose use it is designed.

SAMUEL DYER.

New-York, Jan. 1st, 1822.

A Dictionary of Musical Terms.

ADAGIO, or *Ado.* slow.

Ad Libitum, at discretion.

Affetuoso, tenderly and affectionately—performed in moderate time.

Air, generally means what the ear realizes from a melody or harmony. In a special sense, it is the leading part.

Allegro, brisk, gay.

Allegretto, not so quick as *Allegro*.

Alto, or *Altus*, the Counter Tenor.

Andante, distinct, exact and soothing; *sung rather slow, when no other word is used with it.*

Andantino, in a similar style, but one degree quicker than *Andante*.

Anthem, a portion of Scripture, set to music.

BASS, the lowest part in harmony.

Breve, an ancient note, equal in duration to two semi-breves.

Bis, those bars over which this term is placed, should be performed twice.

CANON, a vocal composition in two or more parts, so constructed as to form a perpetual fugue.

Cantabile, in a graceful and melodious style.

Canto, or *Cantus*, the Treble. In a harmony of vocal parts, it denotes the leading part.

Chorus, full, all the voices.

Coda, an additional strain, not absolutely necessary to the piece or tune, but which may be sung or omitted at pleasure.

Con Spirito, with spirit.

Contra Tenor, the part assigned to the highest men's voices.

Crescendo, or *Cres.* to increase the sound.

DA CAPO, or *D. C.* to return to, and conclude with the first strain.

Del Segno, or *D. S.* from the sign.

Diminuendo, or *Di-*, to diminish the sound.

Doloroso, in a mournful or doleful style.

Dolce, sweetly and softly.

Duetto, } a composition written expressly for

Duett, } two voices or instruments.

Duo.

FINALE, the last movement of a piece of Music.

Fine, the end of a piece or book.

Forte, *For.* or *F.* loud.

Fortissimo, or *FF.* loud as possible.

Fugue or *Fuga*, a composition, in which a subject is successively repeated, or imitated in two or more parts.

GRAVE, or *Gravemente*, heavy; these words refer both to the style of the composition and the execution, and are frequently used for the term *Largo*.

Grazioso, gracefully; often used with *Andante*.

LARGO, *Lentemento*, or *Lento*, the slowest degree in the movements.

Larghetto, not quite so slow as *Largo*.

MAESTOSO, with strength, firmness and majesty.

Mezza, moderate; as *mezza piano*, moderately or rather soft.

Mezza Voce, moderate strength of voice and in a pleasing manner.

Moderato, moderately.

ORGANO, or *Org.* the organ part.

PIANO, *Pia*, or *P.* soft.

Pianissimo, or *PP.* very soft.

Plaintive, mournfully.

Presto, quick.

Prestissimo, or *Prestis^o*. very quick.

Primo, or *P.^{mo}*, or *I.^{mo}*. the first or leading part.

QUARTETTO, Music for four voices or instruments.

RECITATIVE, a kind of musical recitation, between speaking and singing.

SCORE, three or more parts, connected by a brace, are said to be in score.

Semi-tone, the smallest interval used in vocal music.

Semi-chorus, a selection of voices from a choir.

Secondo, or *2^{do}*. the second voice or instrument.

Solo, a piece of music for one voice or instrument.

Soprano the Treble, or higher voice part.

Spiritoso, or *con-spirito*, with spirit.

Staccato, very distinct, short and emphatic.

Symphony, or *Sym.* a part for instruments only.

TACET, silent.

Tempo, time; as, a tempo, in true time.

Tutti, full, or altogether; when all join after a Solo.

Trio, music for three voices or instruments.

UNISON, or *Unis*, when all parts unite in one sound, or succession of sounds.

VERSE, one voice to a part.

Vigoroso, with strength and energy.

Vivace, brisk and animated.

Volti, turn over.

Volti Subito, turn over quick.

LESSON No. 1.

Major Mode or Key Ascending

Descending.

Minor Mode or Key Ascending.

Descending.

A handwritten musical score for three voices (Soprano, Alto, Bass) in common time. The music is written on four-line staves. The vocal parts are labeled with their respective names above the staves. The lyrics are written below the notes, corresponding to the musical phrases. The score includes a key signature of one sharp (F#), a tempo marking of eighth note = 120, and dynamic markings such as forte (f), piano (p), and sforzando (sf).

The previous lessons have been written in the natural Key of C—but the other letters may be, and are employed for a Key-note, and a few examples will here be inserted, to be studied by the scholar. The *changing* of the key note from *one letter* to *another*, is termed **TRANSPOSITION**.

Lesson in the natural Key of C.

Lesson in the Key of G, requiring one sharp on F.

Lesson in the Key of D, requiring two sharps.

Lesson in the Key of A, requiring three sharps.

Musical score for 'Dome Sol' in G major, 2/4 time. The score consists of two staves. The top staff uses a treble clef and the bottom staff uses a bass clef. The lyrics are written below the notes in both staves.

Top Staff (Treble Clef):

1 3 5 8 7 8 6 5 5 5 3 4 2 1
Do me sol do se do law sol sol sol me fav ra do.

Bottom Staff (Bass Clef):

Do do so do sol do ra sol sol se sol do do fav sol do.
Do me sol do se do law sol sol sol me fav ra do.

Lesson in the Key of F, requiring one flat.

Lesson in the Key of B, requiring two flats.

Treble clef, 6/8 time, key signature one flat. The first staff consists of six measures of eighth notes followed by a repeat sign and a bass clef, 5/8 time, key signature one flat. The lyrics are: Do me sol do se do la sol sol sol me fav ra do. The second staff consists of six measures of eighth notes followed by a repeat sign and a bass clef, 5/8 time, key signature one flat. The lyrics are: Do me sol do se do law sol sol sol me fav ra do. The bass clef staff has two measures of eighth notes followed by a repeat sign and a bass clef, 5/8 time, key signature one flat. The lyrics are: Do do se do sol do ra sol sol se sol do do fav sol do.

Should earth against my soul engage,
And fiery darts be hurl'd;
Then I can smile at Satan's rage,
And face a frowning world.

Let cares like a wild deluge come,
And storms of sorrow fall;
So I but safely reach my home,
My God, my heav'n, my all.

There shall I bathe my weary soul,
In seas of heav'nly rest,
And not a wave of trouble roll,
Across my peaceful breast.

Remainder of Verses to Overton.
Then shall my disembodied soul,
View Jesus and adore;
Be with his likeness satisfy'd,
And grieve and sin no more.

Soon, too, my slumb'ring dust shall hear
The trumpet's quick'ning sound;
And by my Saviour's power rebuilt,
At his right hand be found.

If such the views that grace unfolds,
Weak as it is below;
What raptures must the church above,
In Jesus' presence know!

O may the unction of these truths,
Forever with me stay;
'Till from her sinful cage dismiss'd,
My spirit flies away.

JUDGMENT, L. M.

Hy. 376, Dobell's Coll. M. Luther

Musical score for the first stanza of 'JUDGMENT'. The music is in common time, key of C major. It consists of three staves: soprano, alto, and bass. The soprano and alto staves begin with a forte dynamic. The bass staff begins with a half note followed by a quarter note. The lyrics describe the sound of the Last Judgment.

Me-thinks the last great day is come, Me-thinks I hear the trum-pet sound, That shakes the earth, rends ev' - ry tomb, And

Musical score for the second stanza of 'JUDGMENT'. The music continues in common time, key of C major. The soprano and alto staves begin with a half note followed by a quarter note. The bass staff begins with a half note followed by a quarter note. The lyrics describe the resurrection of the dead.

Musical score for the third stanza of 'JUDGMENT'. The music continues in common time, key of C major. The soprano and alto staves begin with a half note followed by a quarter note. The bass staff begins with a half note followed by a quarter note. The lyrics describe the final judgment and the fate of the wicked.

wakes the pris' - ners un - der ground, And wakes the pris' - ners un - der ground.

Musical score for the fourth stanza of 'JUDGMENT'. The music continues in common time, key of C major. The soprano and alto staves begin with a half note followed by a quarter note. The bass staff begins with a half note followed by a quarter note. The lyrics describe the final judgment and the fate of the wicked.

The mighty deep gives up her trust,
Aw'd by the Judges' high command,
Both small and great now quit their dust,
And round the dread tribunal stand.

Behold the awful books display'd,
Big with th'important fates of men'
Each word and deed now public made,
Written by heav'n's unerring pen

Lord when these awful leaves unfold,
May life's fair book my soul approve
There may I read my name enroll'd,
And triumph in redeeming love.

FOR.

On earth ye knew his won'drous grace, His beau - teous face in heav'n ye view-

When all array'd in light,
The shining cong'ror rode ;
Ye hail'd his rapt'rous flight,
Up to the throne of God.
And wav'd around your golden wings,
And struck your strings of sweetest sound

The warbling notes pursue,
And louder anthems raise ,
While mortals sing with you,
The great Redeemer's praise
And thou my heart with equal flame,
And joy the same, perform thy part.

Hy. 109, 2d Bk. Dr. W.

BETHESDA, P. M. 148TH.

N^o 190. 2d.

The Lord Jehovah reigns,
His throne is built on high,
The garments he assumes,
Are light and majesty.
His glories shine with beams so bright,
No mortal eye can bear the sight.

Ps. 136. Ch. Pr. Bk.

ST. PHILIP'S, P. M. 148TH.

Levesque. N^o 190. 3d.

To God the mighty Lord,
Your joyful thanks repeat,
To him due praise afford,
As good as he is great.
For God doth prove our constant friend,
His boundless love shall never end.

N^o 190. 4th.

RESURRECTION, P. M. 148^{TH.} Hv. 140, Rip. Sel. Dr. Green.

Musical notation for the 4th setting of Hymn 190, "Resurrection". The music is in common time, treble clef, and consists of two staves of eight measures each. The notes are primarily eighth and sixteenth notes.

Yes the Redeemer rose,
The Saviour left the dead,

And oe'r his hellish foes,
High rais'd his conq'ring head.

In wild dismay, the guards around,
Fall to the ground, and sink away.

Musical notation for the 4th setting of Hymn 190, "Resurrection". This section continues the melody from the first staff, maintaining the same key signature and time signature.

N^o 190. 5th.

DALSTON, P. M. 122^{ND.}

Ps. 122, Dr. W. A. Williams.

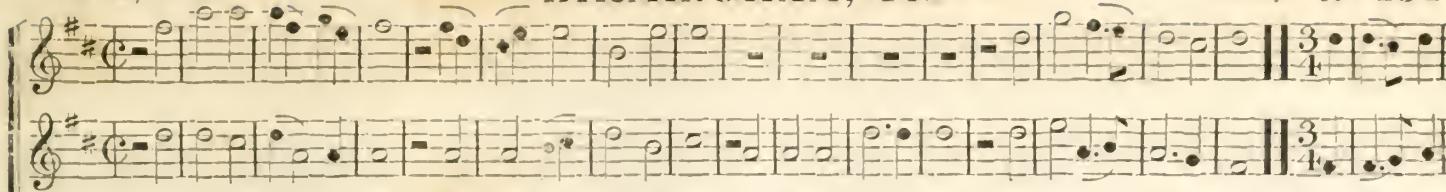

Musical notation for the 5th setting of Hymn 190, "Dalston". The music is in common time, treble clef, and consists of two staves of eight measures each. The notes are primarily eighth and sixteenth notes.

How pleas'd and blest was I,
To hear the people cry,

Come let us seek our God to day ; Yes with a cheerful zeal,
We'll haste to Zion's hill,

And there our vows and honours pay.

Musical notation for the 5th setting of Hymn 190, "Dalston". This section continues the melody from the first staff, maintaining the same key signature and time signature.

pass o - ver Jor - dan, We'll praise him, a - gain, When we pass o - ver Jor - dan.

Now Jesus our King
Reigns triumphantly glorious,
O'er sin, death and hell,
He is more than victorious.
With shouting proclaim it—
O trust in his passion,
He saves us most freely,
O glorious salvation.
Hallelujah, &c,
With joy shall we stand,
When escap'd to the shore,
With harps in our hands,
We'll praise him the more,
We'll range the sweet plains,
On the banks of the river,
And sing of salvation,
For ever and ever.
Hallelujah, &c.

8.7.4. O'er the gloomy hills of dark-ness, Look my soul be still and gaze, All the pro - mi - ses do tra - vail With a glo - rious day of grace,

8.7. Praise the Sa-viour all ye na-tions, Praise him all ye hosts a - be-ve, Be his king - dom now pro - mo - ted, Let the earth her mon-arch know.
Shout with joy - ful ac - cla - ma-tions, His di-vine vic - to - ri-ous love. **PIA.**

Bles - sed Ju - bilee, Bless-ed Ju bilee, Let thy glo - rious morn-ing dawn.

Be my all to him de - vo - ted, To my God my all I owe.

FOR.

* This favourite national air. is named as above. after the birth place of the composer.

8.7. DBLE.

2. See how beau-teous on the mountains,
Are their feet, whose grand design,
Is to guide us to the fountains,
That o'flow with bliss divine.
Who proclaim the joyful tidings,
Of salvation all around ;
Disregard the world's deridings,
And in works of love abound.

8.7.4.

Fly abroad, thou mighty gospel,
Win and conquer, never cease ;
May thy lasting wide dominion,
Multiply and still increase ;
Sway thy sceptre,
Saviour, all the world around.

Hy. 253, Rip. Sel.

GRAZIOSO.

Hy. 295, Rip. Sel.

TABERNACLE, P. M.**8.7.**

Double.

C. Cross.

The musical score consists of two staves. The top staff is in common time (indicated by a 'C') and has a key signature of one flat (indicated by a 'b'). The bottom staff is also in common time and has a key signature of one flat. Both staves feature a mix of eighth and sixteenth note patterns.

Je - sus full of all com-pas-sion, Hear thy hum-ble sup-pliant's cry, Let me know thy great sal - va - tion, See I lan-guish faint and die.
 Sweet the moments, rich in blessing, Which be-fore the cross I spend, Life and health and peace pos-sess-ing, From the sinner's dy - ing friend,

The musical score continues with two more staves. The top staff is in common time with a key signature of one flat. The bottom staff is in common time with a key signature of one flat. The music continues the melodic line established in the previous staves.

The musical score concludes with two staves. The top staff is in common time with a key signature of one flat. The bottom staff is in common time with a key signature of one flat. The lyrics 'PIA. FOR.' are centered above the staves.

GUILTY, but with heart re-lent-ing, O-verwhelm'd with helpless grief, Prostrate at thy feet re-penting, Send, O send me, Send, O send me quick re-lief
 Here I'll sit for - ev - er viewing, Mercy's streams in streams of blood, Precious drops my soul bedewing, Plead and claim, Plead and claim my peace with God.

The musical score ends with two staves. The top staff is in common time with a key signature of one flat. The bottom staff is in common time with a key signature of one flat. The music provides a fitting conclusion to the hymn.

BANQUET, P. M. 5.6.9.

Hy. 414, Meth. & 385 Nettleton's Coll.

Come and let us as-cend, My com-pa-ni-on and friend, To a taste of the ban-quet a-bove, To a taste of the ban-quet a-bove,
How hap-py are they, Who the Saviour o-be-y, And have laid up their treasure a-bove, And have laid up their treasure a-bove.

PIA. TREBLES.

FOR.

If thy heart be as mine, If for Je-sus it pine, Come up in-to the chariot of love, Come up in-to the chariot of love.
O what tongue can express, The sweet comfort and peace, Of a soul in its ear-li-est love, Of a soul in its ear-li-est love.

Hy. 43, Nettleton's Col.

ENTREATY, P. M. 7.6.

(Double.)

N^o 42.

Musical score for "Entreaty, P. M. 7.6." featuring two staves of music. The first staff uses a treble clef and common time, while the second staff uses a bass clef and common time. The music consists of eighth and sixteenth note patterns. The lyrics are as follows:

Stop, poor sin - ner stop and think, Be - fore you far - ther go,
Will you sport up - on the brink, Of e - ver - last - ing wo?

On the verge of ru - in stop, Now the friend - ly warn-ing take.
Da Capo.

Stay your foot-steps ere you drop, In - to the burn-ing lake.

Hy. 150, Nettleton's Col.

CONTRITION, P. M. 78. Single, or 6 lines.

N^o 43.

Musical score for "Contrition, P. M. 78." featuring three staves of music. The first staff uses a treble clef and common time, the second staff uses a bass clef and common time, and the third staff uses a bass clef and common time. The music consists of eighth and sixteenth note patterns. The lyrics are as follows:

Hearts of stone re - lent, re - lent, Break, by Je - sus' cross sub - du'd, See his bo - dy mang-led rent,

Cov - er'd with a gore of blood, Sin - ful soul what hast thou done, Mur - der'd God's e - ter - nal Son.

Come sinners attend, and make no delay.
Good news from a friend I bring you to-day ;

Glad news of salvation, come now and receive,
There's no condemnation to them that believe.

The design of this Supplement is to supply a number of the old stand'd and favourite Tunes, for which no space can be found in the preceding volume, without omitting others, perhaps equally useful and excellent; and, also, to furnish a variety of new and interesting airs, which have long been admired and sought after, but are not published in any collection of Sacred Music, of extensive circulation in the United States. A select number of peculiar metres are also inserted, adapted to the Village Hymns, and other collections of Sacred Poetry; and these, with the tunes of this description, which appear in the body of the present work, it is believed, will comprehend tunes of all the metres in general use, and will be found adequate for all the ordinary purposes of public and social worship.

PREFACE.

The first edition of the present work was published in Baltimore, in 1817, connected with a collection of Anthems. The Hymn tunes being wanted separately, a second and large edition of them was printed in 1819, and a third in 1824. The demand for this edition of tunes appearing to be regular and increasing the compiler has been induced to stereotype it, and now presents this edition to the religious public with increased convenience, in the belief that they will unite with him in considering its appearance as being improved, so far at the arrangement of some parts of its contents.

The Editor commenced his career in the United States, as Chorister and Teacher of Sacred Music, in the city of New-York, in 1812, and in the 27th year of his age—removed to Philadelphia in November of that year; when a Society was soon afterwards formed for the practice of Oratorio Music, and gave a series of Sacred Concerts, the direction of which was confided to him; where he remained until 1815, when considerable improvements being presented for giving to Baltimore, he removed to that city in November of the same year. Here he was encouraged by the patronage afforded him, and which he will ever most gratefully remember, to undertake the publication (as before stated) of this selection of tunes. In 1818, the Editor, with a view of introducing his work to more general notice, visited and taught in a number of places south of Baltimore, until the summer of 1822, when he returned to that city and published his second and large edition of A. THIEM, which has been favourably received, and extensively circulated. So that, on the completion of this last work, he removed to the city of New-York, in which this present edition is issued, and where he expects to become a permanent resident.

When the Editor first conceived the idea of publishing in Philadelphia, the want of a work similar to the present volume was very much felt. It was necessary such a publication should be made. A suitable Introduction to the Rudiments of Music, 2^d. As in most collections as could be inserted in the prescribed limits of the standard and popular tunes used in the principal cities and congregations throughout the Union. 3. A variety of tunes adapted to the peculiarities in use, and also some of a more animated and brilliant style, for the exercises of practitioners, and the use of Singing Schools and Societies. To supply the wants of the religious community in these respects, the present work was therefore compiled, and adapted more particularly for the use of the Middle and Secondary schools; and it is satisfactory to find that this publication has performed its intended purpose in some good measure, and has in every place where introduced.

The scientific musician, and critical harmonist, will doubtless find much to centre in the following pages; to such persons, the Editor would merely remark, that he has compiled a work of this kind exclusively for their use, or, indeed, to

have answered exactly his own ideas and wishes, the arrangement of the parts, would have been different from this; but this would not have answered the purpose the compiler had in view; for it would have accommodated the description of persons for whom this work was specially designed; the brevity it is deemed expedient to make, forbids any enlargement on this head.

The Introduction to Music, accompanying the present work, is enlarged by the addition of nearly double the quantity of former editions of this volume, and much attention has been given to it, so as to make it plain and explicit as possible. The explanation of manner in which the connection of the several parts is shown particularly applicable, both to the teacher and pupil; and the whole into separate lessons or chapters, with question and answer.

A variety of new practical lessons for the exercise of the learner, which it is believed will be found well adapted for all those learners who will bestow the requisite attention, and obtained *separately* from the body of the work, if desired.

In the selection of tunes, the object kept in view has been to supply each of the grave, plain, flowing, animated and fuguing styles, so that different tastes of individuals might be gratified. Of these, particularly adapted for congregational use, it is believed will be found, both of those which have been in general use, and entirely new, to form a pleasing variety in congregations, may be introduced.

The great variety of peculiar metre hymns in use in the other denominations, as rendered in practical form with his plan, and in a publication of this size, to serve them; for these, indeed, would alone fill a moderate size. These are introduced in this work, comprising a variety of kinds, are such as are most generally called for, and which are acceptable and useful.

With sentiments of gratitude for the patronage bestowed, and the hope that this publication may aid in promoting the part of the public worship of God, this volume is submitted, without discouragement of teachers of Psalmody, leaders of choirs, and the religious public at large, by

New-York, Feb. 1, 1828.

Fourth edition published, New-York, 1828.
