To the student.....

Congratulations! You are about to begin the next part of your musical training. I hope that you will find it exciting, entertaining and valuable. The reason that this book is fun to use is that it makes you part of a real string ensemble right from page one. Whether you are in a small group or a large one, you will have responsibilities as an individual musician in making the group perform at its best. In fact, you will have the most fun if you can find several classmates or string-playing friends who can form a quartet or quintet so that you can practice together as a *Chamber Music* group.

Keep in mind that as a member of a string orchestra, string class or string ensemble the part you play is as important as any other part. What you need to remember is that you are making real music as both an individual player and as a member of a larger organization.

In this book you will come across new words and phrases, ideas, musical styles and technical terms. Please do not hesitate to ask your teacher to explain them to you. It will make for more interesting class lessons.

Good luck!

Herbert S. Gardner

HOW TO USE THIS BOOK!

The Intermediate String Class is organized into 15 key-centered chapters divided into two volumes. These are developmentally linked by a series of graduated steps.

The **Teachers Manual** contains a full score and an overview of the new work to be covered in each chapter. This materially aids in the preparation of lesson plans. Each numbered line lists the new work to be introduced in that line, teaching suggestions specific to the new work, and on-going reminders to the teacher. Many additional exercise lines and familiar tunes are provided for extra drill and reinforcement. A sample of a portion of a score page appears below. (Note that in the actual score the identifications of the instruments and the accompaniment staves are *not* included in the interest of space economy.)

		(Title of Line, if any)	
<u>(NEW WORK PRESENTED IN THIS LINE)</u>			(Student Book pg.)

(Teaching suggestions follow in this space)	(Violin)		
	(Viola)		
	(Cello)		
	(Bass)		
	(Basic Harmonic Support)		
	(Enriched Harmonic Support for Piano)		

Compare the foregoing sample with the first score page to see how an actual work, with teaching suggestions, is formatted.

The success which this book promises is based upon two central ideas: (1) that real music, supported by correct harmonies, counterpoint and voice leading promotes the musical growth of the student, and, (2) that, at this point in the development of young players, the fingers of the left hand have been freed of the constrictions previously imposed by tapes on the fingerboard, finger patterns or the habituation of holding fingers down on the string past the correct rhythmic value of the pitch being played. In other words, "one note, one finger!"

Chapter 1, in C major, has been designed to assist teachers in the accomplishment of this sometimes daunting task. Take this opportunity to enable your students break out of the "D major mold" by requiring them to be responsible for their own intonation. Basically, this is facilitated by asking them two questions: (a) Does it sound right? and (b) How can it be improved?

The teacher must now focus on the ear-training aspects of string teaching and playing. This is a central purpose of the book. Teaching suggestions for achieving this are included throughout. The two piano parts support this goal.

The single staff, **Basic Harmonic Support**, is included for teachers whose piano skills may be limited, or who prefer to use a "one-hand" technique. The full piano, **Enriched Harmonic Support**, provides complete accompaniments

GETTING STARTED

Begin with Chapter I (C Major) and continue in sequence. Drill material, tunes and review exercises are included in each chapter. It is a good idea to occasionally go back to previously learned work for review and reinforcement.

When preparing performance materials, it has been found useful to return to the appropriate chapter in *The Intermediate String Class* to get the players warmed up in a "new" key prior to introducing a new piece.
