the Sun Tavern in Holborn; and Dan:
Wright Junr. at the Golden Bass in S^t
Pauls Church Yard

THE
Newest Instructions
For the
GERMAN FLUTE.

Of the Situation of the Body.

As a graceful Posture, in playing on this Instrument, no less engages y^e Eyes of y^e Beholders, than it's agreeable Sound does their Ears; I shall therefore begin this Treatise, by describing one proper to use in playing thereon. Whether you sit or stand, the Body must be erect, y^e Head rather rais'd than inclin'd, and somewhat turn'd to the left Shoulder, y^e Hands high, without raising the Elbow's or Shoulder's, y^e left Wrist turn'd inwards, and y^e left Arm close to y^e Body. If you play standing, Stand firm, with y^e left Foot a little advanc'd, and rest y^e Weight of your Body on the right Leg, all without any Constraint: and observe never to make any Motion with the Body or Head as some do in beating Time.

Altho a great many are of Opinion y^e filling of y^e Flute cannot be taught by Rules.

2
 Rules, but must be acquir'd by Practice,
 there are nevertheless some Rules & may
 very much facilitate the finding out the
 Method, the Instructions of a good Master,
 together with shewing his Manner of blowing
 into it, may save & Learner much Time
 & Trouble in acquiring of it: I shall there-
 fore do both as far as possible by writing
 as to the Manner of blowing into it, Observe
 therefore that the Lips ought to be joyn'd
 close together except just in & Middle where
 a little Opening is form'd for & Passage of y
 Wind, the Lips must not pout out, but rather be
 contracted toward the Corners of & Mouth, so
 that they may be smooth & even: let the hole of
 & Flute be plac'd just opposite to this Opening
 of & Lips, & resting & Flute upon & under Lip,
 blow moderately, turning & Flute outward, or
 inward, till you find the true Point.
 You need not think of placing your Fingers
 at first, but only blow into & Flute with all &
 holes open, till you are able to fill it, & bring out
 a right Tone: then place the Fingers of & left
 Hand in Order, one after another & blow to
 each Note, till you are well assur'd of the
 Truth of & Tone, then put down & Fingers of the
 right Hand in like manner: You need not trouble
 your self to fill & first Note, because it can't be done
 without stopping all & holes perfectly well which is
 harder to do than one would imagine, & must be
 attained by Practice when you have arri-
 ved at filling the rest, then proceed to
 learn your Scale which is as follows

A

D

F

A

A SCALE of all the Notes & half Notes Musically & Tabularly

Ascending scale of D major (D Ionian mode). The musical staff shows notes D, E, F, G, A, B, C, D, E, F, G, A, B, C, D, E, F, G. The guitar fretboard diagram below shows the fingering for this scale on the D string (1-2-3-4-5-6-7) and subsequent strings.

Notes: D, E, F, G, A, B, C, D, E, F, G, A, B, C, D, E, F, G

Descending scale of D major (D Ionian mode). The musical staff shows notes F, E, D, C, B, A, G, F, E, D, C, B, A, G, F, E, D. The guitar fretboard diagram below shows the fingering for this scale on the D string (7-6-5-4-3-2-1) and subsequent strings.

Notes: F, E, D, C, B, A, G, F, E, D, C, B, A, G, F, E, D

3

This Scale represents two Things (Viz)
first y^e Notes of Musick plac'd on 5 paralel
Lines. as you see in y^e upper Part of the
Scale distinguish'd by y^e Letters D, E, F, &c
The G. sol. re. ut Cliff. which is set down at
y^e Beginning of these 5 Lines is most in use
for Flute Musick, it gives its Name to y^e 2^d
Line on which tis plac'd by which we find
y^e Place of every other Note according to y^e
Order set down in this Scale; Secondly a Ta-
blature, which shews how to stop each Note
upon the Flute, this has 7 paralell Lines
which represent y^e 7 holes on y^e Flute. You
may observe on these 7 Lines a Parcell of
round black & white Dots, which shew whether
the holes answering those Lines are to be
stopt or open; The black Dots signifie those
holes stopt, and y^e white ones those w^{ch} ought
to be open to express such a Tone.

You may by this Scale discover y^e whole
compass of y^e German Flute (Viz) all the
Notes Natural, Flat, & Sharp, this Compass
consists of two Octaves & some few Notes
from y^e first Note to y^e thirteenth contains
y^e first Octave, and from y^e thirteenth to y^e
25th contains y^e 2^d Octave, this 2^d Octave
is stopt much after y^e same Manner of y^e
first, except in some few Notes, so y^e there
is nothing but y^e Manner of blowing that
makes y^e Difference, as you may observe
by y^e Scale. I have distinguish'd y^e natural
Tones

Tones by Minims, & ♭ Flats & Sharps by
 Crotchets. let Beginners trouble themselves
 at first with ♭ natural Notes only, till they
 are somewhat more advanc'd You must blow
 but gently for ♭ lower Notes; but blow
 stronger as you ascend. You may observe
 by this Scale that ♭ first Note D, is all the
 holes stop't, the next is E, and is play'd by
 unstopping ♭ 6th hole as appears by the
 white Dot on ♭ 6th line; you must strike
 every Note with ♭ Tongue as if you pronounc'd
 ♭ Syllable Tu. F is made by unstopping ♭ 5th
 hole, and stoping again ♭ 6th this Tone ought
 to be adjust'd by ♭ Manner of blowing
 (Viz) by turning ♭ Flute inward to flatten
 it, because ♭ Sharp is sometimes made on
 ♭ same hole; you must remember to place
 ♭ little finger between ♭ 6th hole and the
 moulding of ♭ bottom piece as I told you
 before, which serves to hold ♭ Instrument
 steady. G, by raising all ♭ Fingers of
 ♭ lower hand, and keeping ♭ little Fin-
 -ger where I told you. You must not raise
 the Fingers high and let them fall plump
 on the holes. As you were oblig'd to
 turn ♭ Flute inward for F you must
 restore it to its former Situation for
 G-sol-re-ut &c as in the Scale.

I must here inform Beginners, that as
 they ascend on this Instrument, they will
 find the filling more difficult, therefore
 to

to sweeten the high Notes, & fill them
 more easily, you must take care to close ♭
 lips more & more, to contract them towards
 the corners of ♭ Mouth, to advance the
 Tongue towards ♭ lips & increase ♭ strength
 in blowing by little & little, the Tones a-
 -bove E-la-mi are forc'd Tones and are
 seldom us'd, however since sometimes they
 happen in Preludes, I shall shew you
 such as I could discover; yet you must not
 trouble your self with them at first, till
 you are further advanc'd, nor will it be
 necessary during ♭ first Days to ascend
 higher than G-sol-re-ut, unless you find
 them very easy to fill, then you may ascend
 higher but with Discretion, otherwise you'll
 give your self much Trouble to little Pur-
 -pose, because you must fill your low Notes
 perfectly well before you can fill ♭ others.
 F-la-ut in alacissimo for ♭ most Part can-
 -not be blown, however I have found some
 Flutes on which I could blow it after the
 following Manner; but you must not expect
 to find it indifferently on all Flutes; no
 more than Shakes or Cadences which pro-
 -ceed from it. 'tis play'd by stoping at once
 ♭ first, 2^d and 4th and half ♭ 5th & open-
 -ing ♭ 3^d 6th and 7th and blowing very
 sharp. Yet I have not inserted it in my
 Scale, by reason 'tis not a Note on which

we may depend. F- fa. wt sharp is made easier. you must stop all y^e holes except y^e 2^d. G-sol is made by stopping y^e first & 3^d holes & opening all y^e rest. we might find Notes yet higher than these. but they are so forced and so useless. that I would not advise any one to trouble himself about them.

When you are well vers'd in filling y^e natural Tones. you may begin with those call'd Flat & Sharp. but as there are many of these Semitones that are adjusted by y^e manner of blowing into y^e Flute I shall explain each in particular. I begin with D natural y^e first Note. in order to link all y^e natural Notes with the Flats & Sharps. that y^e Ear may be early accusom'd to distinguish their Difference. D sharp is made by pressing the little Finger on the Key. to open y^e 7th hole. E & F natural are made as I told you already (in describing y^e natural Notes.) the reason why there is no Sharp between these two Notes is because they are but a Semitone distant from each other. for this reason when you find a Sharp on E-la-mi. you play it as F natural. which has the same Effect as a Sharp. I shall say no more of placing the Fingers. because I suppose by this Time you understand y^e Nature pretty well which is sufficient to inform you of the rest.

Of Shakes or Cadences.

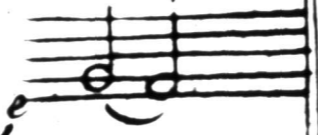

The

The first Shake in y^e Scale. which is on D below. is made by opening y^e 6th hole before you blow. in order to take it from E-la-mi. which is y^e next above. You tap this Note with your Tongue. & then shake your finger several Times upon y^e 6th hole without taking Breath or tonguing the 2^d Note. In short the finger which you shake must rest upon y^e hole to end y^e Shake. The number of Shakes you make with y^e finger is determin'd only by y^e Measure of the Note on which you shake. you must not press y^e shaking too quick. but rather suspend it about half y^e value or Measure of y^e Note. especially in grave movements as I show in y^e Scale of Shakes. y^e fewest beats you can well give with y^e finger are three. as on Grotchets in y^e Movement of two & three. would be needless to explain all y^e Shakes one after another since you have a Demonstration intelligible enough in y^e Scale. since you ought already to know all y^e Notes which compose them. you must observe then y^e same Rules throughout all y^e Shakes as I gave you for y^e first. I ought only to distinguish the Shake on C natural because in Effect it differs from y^e rest. you must begin it by stopping all y^e holes but y^e first. then blow & after shake y^e finger on y^e 4th hole & end by raising the finger you shook with which is contrary to

8

to what you observe in all other Shakes. as to y^e Shake on C in alt^o Note y^e 2³^d is very difficult to adjust, & is not much in use. you may see in y^e Scale that y^e D which preceeds it is stopt after an extraordinary Manner. you must shake on y^e 4th & 5th holes at y^e same Time, and cover half y^e 6th hole. you may also perform this Shake by shakeing on y^e 3^d & 6th holes all at once. then all y^e holes ought to be stopt except y^e first. and you must in ending this Shake raise y^e Finger wherewith you shook. we commonly soften this Note instead of shakeing it.

A further Explanation of y^e Shakes or Cadences.

For the better understanding some Characters commonly us'd in Musick, & over some of y^e Dots in y^e Tablature of the 2^d Scale. I shall here give an Explication of them: first, y^e little curve line over, or under y^e heads of two or more Notes commonly call'd a Slur, and markt as  you see in this Example on y^e right hand. signifies that you must only tip y^e first of them with your Tongue, which here serves only as a Preparation, (or what in French is call'd a Port de voix) to y^e Cadence or Shake, and you are to continue y^e same Wind without drawing your Breth. to y^e end of y^e Cadence or Shake as I have already shewn you. The little Cross above

9

above the 2^d Note shews that 'tis on this Note you must shake. y^e Slur which joynts two Dots in y^e Tablature shews from w^{ch} hole you take y^e Shake, & on which it ends. you may thereby see y^e borrow'd Shakes i.e. those Shakes that don't end on the same hole where you make y^e Port de voix, which hereafter I shall call a Sigh, as for Example that of D taken from E-la-mi flat begins from E-la-mi flat by putting y^e little Finger on y^e Key & ends from E-la-mi natural in shakeing with the 6th Finger on y^e 6th hole, & leaving y^e 7th hole stopt, you may also see y^e Slur curled on y^e 2^d Dot which shews that 'tis on this hole you must shake. The Shake on E-la-mi natural taken from F sharp is begun by opening y^e 5th, 6th & 7th holes to make F sharp which serves it as a Sigh or Port de voix and 'tis ended by stoping the 5th & shakeing on y^e 4th which removes y^e Superior Tone further off, & shews y^e Cadence more, instead of shakeing on y^e 5th which would not be sufficient, you must observe to raise y^e little Finger from off y^e Key when you shake, because that would heighten y^e E-la mi, & render it false as is shew'd in y^e Tablature. E-la-mi flat and D sharp, are stopt alike yet you see y^e Shake on E flat is taken from F natural & that
of

of D sharp is taken from E natural, & first is a whole Notes distance & 2^d of a Semitone only, which makes all y^e difference, 'tis the same in all y^e other Notes. You must observe that y^e Shakes are not always mark'd in Pieces of Musick as I have describ'd them here, they are only markt with a little Cross, thus +, or thus Tr. There is no Mark for the Sigh or Port de voix, but you must never omit doing it, & observe what I have said thereon. There are some high Tones on which one can't shake, I have shew'd those which can be shook, but you must observe that those above B in alt (Note y^e 22^d) are seldom practis'd. I have not yet spoke of y^e Manner of adjusting y^e Cadences or Shakes, this would be but a Repetition of what I have already said concerning y^e simple Notes, since that these Cadences are compos'd of y^e same Notes, I shall only tell you that there are some of them which must be begun by turning y^e Flute inwards, and ended by turning it out: such is y^e Shake on F sharp taken from G sharp because y^e two Tones which compose this Shake are to be differently adjusted: there are others in which you must observe quite y^e contrary which you will know by y^e explication already given on all y^e Notes, you'll find some which are begun by stopping y^e hole on which you ought to shake, & end in opening y^e same hole, such

is y^e Shake on C y^e 11th Note) of which I have spoken already, you may know this Difference by y^e Dots in this Example y^e black Dot being before y^e white one which is contrary to the rest.

Remarks on some Semitones & on some Cadences. To omit nothing, I shall treat here of some Semitones, & some Shakes that may be play'd after different Ways to what I have here shew'd. I shall begin with G sharp in alt Note y^e 10th, altho I have shew'd in y^e Scale y^e most simple manner of playing it, but as 'tis a little too sharp when made after that manner there are several Ways used to flatten it. First, having stop't y^e 1st, 2^d, & 4th holes as you see in y^e Tablature, you must stop also y^e 6th, & open y^e 7th with y^e little Finger, this Way is frequently used, & some shake thereon with y^e 4th, & 6th fingers at y^e same Time, but 'tis not well articulated because 'tis difficult for a Shake made by two Fingers so distant from each other to be very distinct. I am therefore of Opinion that one shou'd always borrow y^e Shake from y^e 2^d Finger, as I have shew'd in y^e Scale of Cadences, by adjusting it by turning y^e Flute inwards you must also observe not to raise y^e Finger high in shakeing. 2^{dly}, you stop y^e First, 2^d & 4th holes, and afterwards y^e half of y^e 5th but with Discretion, this Way is somewhat easier than y^e other because it only employs

two

two fingers of y^e lower Hand, which being close together shakes more intelligibly; the Shake is always taken from y^e 2^d Finger in turning y^e Flute inwards also. There are certain Passages where one ought to make this Semitone as I have shew'd in y^e Tablature, & that to avoid a very great Difficulty, what I have said on G sharp may also serve for A flat. (Note y^e 39th) except y^e Shake which is different, as you see in y^e Scale of Shakes; y^e Shake on C in alt sharp (Note y^e 24th) is also made after different manners which I shall here explain as well as some others more to satisfie your Curiosity, then to prescribe a constant Use thereof for these sort of Shakes are not found on all Flutes with y^e same Facility y^e first Way is perform'd by stopping y^e 2^d & 3^d holes & shakeing on y^e 4th & 6th at the same Time, all y^e other holes ought to be open, & y^e 7th also, and y^e Fingers you shake with must rest upon their holes in finishing y^e Shake; y^e 2^d way is by stopping all y^e holes except the first & fifth, then you must shake on y^e 6th hole, ending with y^e Finger off, you may also shake on y^e Key, and observe the same thing. C sharp without a Shake may also be play'd by stopping y^e 3^d & 4th holes, and leaving y^e rest open, D flat is made y^e same Way. I shall also observe concerning y^e Shake on B natural above (Note y^e 22th) that it may be play'd by stopping y^e 3 holes of the
lower

lower Hand & shakeing as usually on the first hole, tis easily made after this Manner but tis a little too sharp, to remedy y^e which turn y^e Flute inwards to adjust it; that of B in alt flat (Note y^e 37th) may be made by stopping half y^e 2^d hole, & shakeing on y^e first, y^e shakeing on y^e first & 3^d holes at the same time is also practis'd leaving all y^e other holes open, but this Way is not very natural. The Shake on A sharp (Note the 21th) may be made by stopping all y^e holes except y^e 3^d & 7th. you must shake on y^e 2^d hole, & turn y^e Flute inward. That of D natural in altissimo (Note y^e 25th) taken from E flat may be also made on y^e 5th & 6th holes, at y^e same time keeping y^e 3 first stop't & opening y^e 4th & 7th. you ought to force the wind & end y^e Shake with y^e fingers off; There are some Flutes on which you must open y^e first hole. I shall further observe concerning C natural below (Note y^e 11th) of y^e first Scale, that some make it by stopping y^e 2^d, 4th & 5th holes. I don't approve of this Way because in makeing it thus tis not far enough distant from its Sharp and the Semitone is found false.

Of the double Cadences, Accents, Port de voix & tonguing y^e German Flute & other wind Instruments To render y^e playing more agreeable, & to avoid too great a Uniformity in tonguing will be proper to use two particular articulations

lations, (Viz) Tu & Ru, the Tu is most in use, & is used in all cases as to Semibreves, Minims, Crotchets, and to the greatest number of Quavers, for when these last are on the same line, or such as leap you pronounce Tu, when they ascend or descend by Degrees and joynd we use also Tu, but intermix Ru with it as you may observe by the following examples where these two Syllables do succeed each other.

EXAMPLES

Common Time.

Example 1: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, ru, tu, ru, tu, ru, tu, ru, tu, ru, tu, ru, tu, tu' are written below the staff.

Example 2: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, tu, ru, tu, ru, tu, tu, ru, tu, tu, tu, tu' are written below the staff.

tu, tu, ru, tu, ru, tu, tu, ru, tu, tu, tu, tu.
 Observe that Tu Ru are regulated by y^e number of y^e Crotchets, when y^e number is odd you pronounce Tu Ru alternately as you see in y^e first example; when y^e Quavers are even you pronounce Tu to y^e two first, then Ru alternately, as you see in y^e 2^d example observe also that Quavers are not always to be play'd equally, but you must in certain movements make one long & one short, which also regulated by their Number for when they are even, you must make y^e first long

y^e 2^d short and when they are odd you do quite y^e reverse, that is call'd pointing, the movements in which tis most commonly used is common Time, Triple Time, & Jigg Time, or $\frac{6}{8}$ you must pronounce Ru on y^e Note which follows y^e Quaver, when it ascends or descends by one step only.

EXAMPLES.

Triple Time.

Example 1: A musical staff in triple time (3) with a melody of eighth notes. The syllables 'tu, tu, ru, tu, tu, ru, tu, tu, ru, tu' are written below the staff.

Example 2: A musical staff in triple time (3) with a melody of eighth notes. The syllables 'tu, ru, tu, tu, ru, tu, tu, ru, tu' are written below the staff.

There also are certain movements where you only use Tu for y^e Quavers as for

EXAMPLES.

Example 1: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, tu, tu, tu, tu, tu, tu, tu, tu, ru, tu' are written below the staff.

Example 2: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, tu, tu, tu, tu, tu, tu, tu, tu, ru, tu, tu' are written below the staff.

Example 3: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, tu, tu, tu, tu, tu, tu, tu, tu, ru, tu, tu' are written below the staff.

Example 4: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, tu, tu, tu, tu, tu, tu, tu, tu' are written below the staff.

Example 5: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, tu, ru, tu, ru, tu, ru, tu, tu' are written below the staff.

Example 6: A musical staff in common time (C) with a melody of eighth notes. The syllables 'tu, tu, ru, tu, ru, tu, ru, tu, tu' are written below the staff.

You pronounce *Tu* on all these Quavers, and you don't use *Ru* but on *y* Semiquavers because in these movements a Quaver is to be supposed a Crotchet, and a Semiquaver a Quaver; (that is) held as long in playing, as well as in those of $\frac{3}{8}$ & $\frac{2}{4}$ you must also in these movements pass the Quavers equally & point *y* Semiquavers. Observe that you use *Ru* on *y* Semiquavers according to *y* Rules I gave of *y* Quavers & more frequently for you don't omit it whether they are on *y* same line or whether they skip.

EXAMPLES.

tu, tu, ru, tu, tu, tu, tu, tu, tu, ru, tu, tu, tu, ru, tu.

tu, tu, ru, tu, ru, tu, ru, tu, ru, tu, ru, tu.

Although these Rules are general yet they admit of some Exceptions in certain Cases as for

EXAMPLE

tu, tu, ru, tu, tu, tu, ru, tu, ru, tu.

tu, ru, tu, tu, tu, ru, tu, tu.

tu, tu, ru, tu, tu, ru, tu, tu, ru, tu, tu, tu, ru.

tu, tu, ru, tu, tu, ru, tu, tu, ru, tu, tu, ru, tu.

You understand that you must pronounce *Tu* *Ru* on *y* two first Quavers, or Semiquavers of an even number which is frequently practic'd when two Quavers are intermixt with Crotchets, or else two Semiquavers with Quavers, 'tis done for a greater Sweetning & 'tis *y* Relish of the Ear that must decide it: you ought therefore to consult *y* Ear when *y* tongueing appears harsh; use *y* way which shall seem most agreeable, without respecting *y* ranging of *y* Notes or *y* different Movements. You must observe never to pronounce *Ru* on a Shake, nor on two successive Notes, because *Ru* ought always to be intermixt alternatively with *Tu*. In Triple Time of $\frac{3}{4}$ you pronounce *Tu* *Ru* between *y* Crotchets, and *Ru* to *y* Minims that are preceded by a Crotchet in ascending or descending by one Notes distance, as for

EXAMPLE

tu, tu, ru, tu, ru, tu, tu, tu, ru.

tu, tu, ru, tu, tu, ru, tu, ru, tu, tu.

All Triple Time is like *y* single Triple Time, & that in double triple Time (i.e) $\frac{3}{2}$ *y* Minims are to be accounted Crotchets, & *y* Crotchets Quavers &c for which reason you point Crotchets in this movement

according to y^e Explication I gave you of Quavers. 'twill be proper to observe that tipping with y^e Tongue ought to be more or less articulate according to the Instrument on which you play, for 'tis soften'd on y^e German Flute more distinct on the Common Flute, and very strong on the Hautboy.

Of Sliding or Slurring.

Slurring is when two or more Notes are pass'd over with only one tip with the Tongue, which is mark'd by a curve line over or under y^e Heads of y^e Notes.

EXAMPLES

Of the Port de voix and Slides. The Port de voix is a tipping with y^e Tongue anticipated by one Note below y^e Note on which we design to make it. y^e Slide is taken a Note above & is never practic'd but in descending to a third.

EXAMPLES

Ports de voix

Slides

tu tu tu tu tu tu tu tu
These little Notes which denote y^e Port de voix & Slides, are accounted as nothing in y^e Time, you tongue them nevertheless, & slide y^e principal Notes, we often joyn a beat with y^e Port-de-voix as you may see above

Of the Accents, & double Cadences. The Accent is a Sound borrow'd from y^e end of some Note to give them a greater expression. y^e double cadence is an ordinary Shake follow'd by two Semiquavers slur'd or tip't.

EXAMPLE

Accents.

Double Cadences.

Of the softening of Notes or the lesser Shakes and of the Beats.

The softning or lesser Shake is made almost like y^e usual Shake, there is this difference that you always end with y^e Finger off, except on D la sol-re, for the most

most part they are made on holes more distant, & some on y^e edge or half y^e hole only, it participates of a lower Sound which is contrary to y^e Shake. y^e Beat is y^e hitting once or twice as quick as we can full on y^e hole, & as near y^e Note we beat upon as possible, we ought also to end a beat with y^e finger off except on D as I shall shew hereafter, it also partakes of a lower Tone. To begin with y^e Sweetening or softning of D y^e first Note in order. I say it must be done but by Artifice, because tis y^e lowest Note & you have no finger left unemploy'd to do it with, therefore must be done by shaking y^e Flute which imitates a softning; as for y^e Beat this Note has none for y^e same Reason. The softning of D sharp or E-la-mi flat is done as D natural y^e Beat is made upon y^e key with y^e little finger ending with it on. The softning of E-la-mi natural is made on y^e edge of the 6th hole, y^e Beat on y^e same hole full. The softning & Beat on F sharp & natural are made on y^e 5th hole, Viz. the Beat full on y^e hole, y^e other on the edge. The softning of G natural may be perform'd two Ways Viz. on y^e edge of y^e 4th hole or full on y^e 5th. y^e beat is made on y^e 4th hole. G sharp or A flat is softned on y^e edge

Edge of y^e 3^d hole y^e Beat on y^e 3^d hole full. The softning of A natural is on y^e 4th hole full, or on y^e edge of the 3^d hole. the beat upon y^e 3^d hole. y^e softning of A sharp or B flat is upon y^e 6th hole full y^e Beat upon y^e same hole or on y^e 2^d when tis preceded by a Port-de-voix. y^e softning of B natural is made on y^e 3^d hole full. y^e beat upon y^e 2^d. y^e softning of C natural is made on y^e 4th hole full. The Beat on y^e 4th & 5th at y^e same time, or on the first when tis preceded by a Port-de-voix. The softning of C sharp or D flat is made on y^e 2^d hole full. y^e beat upon y^e first. The softning of D natural is made on y^e 2^d. hole full. it differs from y^e rest in it's beginning & ending with y^e finger on. you must observe not to raise y^e finger high. y^e Beat is made on the 4th hole when you play in a natural Key, & upon y^e 2^d & 3^d at y^e same time when you play in a key where C is sharp y^e holes ought also to be stop't as well in beginning as in ending it. y^e softning D sharp or E flat is made on the first hole which ought to remain stop't before, and after. y^e beat is made upon the Key for E-la-mi after y^e manner I shew'd you in speaking of it below. as to D sharp tis beat upon y^e 2^d & 3^d holes at y^e same

same time if first hole ought to be open & you must stop if 2^d & 3^d in ending the Beat. The softnings & Beats between this Note & A sharp or B flat are made as their Octaves below. if softning of this last is made on if edge of the 4th Hole, the Beat may be made on if same hole or else on if 2^d especially when tis preceeded by a Port de voix. The softning of C natural is made two ways Viz. on the 6th hole or on if 3^d if beat is made on if same and also on the first when tis preceeded by a Port-de-voix. The softning of D natural is made on if 2^d hole as its Octave. if beat is made on if 2^d & 3^d holes at if same time. if softning of D sharp or E la-mi flat is done as its Octave. if Beat is made if same way or else on the 5th & 6th holes at once. you must hold if 4th & 7th holes open, and replace your fingers in ending. if softening of E la-mi natural is made on if edge of if 3^d hole. if Beat on the same hole full. I shall omit if Notes higher than this because they are too much forc'd, nor must you make these till you are pretty far advanced. these Graces are not commonly set down in all Pieces of Musick but only in such as Masters write for their Scholars
observe

observe the following
EXAMPLE.

A softening a Beat.

'Twould be hard to teach a method of knowing exactly all if Notes whereon these Graces ought to be play'd. what can be said in general thereupon, is that if softnings are frequently made on long Notes as on Semibriefs, Minims & pointed Crotchets. if Beats are made more commonly on if short Notes as on Crotchets in light movements, & on Quavers in movements where they pass equally. we can give no certain Rules for placing these Graces, 'tis if Ear & Practice which must teach you to use them in proper time rather than Theory. what I would advise you to, is to play only (for some time) such Pieces of Musick as have these Graces mark'd thereby to accustom your self by little and little to use them to such Notes as they agree best with.

Of Time

There are two Sorts of Time Common and Triple.

Common Time is known by some one of these Characters. C or C or $\frac{2}{4}$ if first of

of these Marks denotes a slow Movement, if next a little faster, & if other two a very brisk & airy movement.

○ Semibreve of three first of these Characters always con-

-tain to if Value of a Semibreve in a Bar which must

be held as long as you can

moderately tell four. if last of these Marks never contains more than a Minim or 2 Crotchets or four Quavers, &c in a Bar, this is called retortive Time.

Triple Time is known by these Characters 3. or $\frac{3}{2}$, $\frac{3}{4}$, or $\frac{3}{8}$. if two first are used when there are three Minims in a Bar, this is if slow: -est Sort of Triple Time in use.

$\frac{3}{4}$ is used when there are three Crotchets in a Bar, this is quicker than if former. the last Sort which is the quickest of all is known by this Character $\frac{3}{8}$, & contains three Quavers in a Bar, or other Notes to their Value.

there

There are three other Sorts of Common Time which are compounded of Triple Time mark'd thus $\frac{6}{4}$, $\frac{6}{8}$ and $\frac{12}{8}$ the first contains six Crotchets in a Bar, which is the same as two Bars of Triple Time $\frac{3}{4}$. the second contains six Quavers in a Bar, this is also the same as two Bars of $\frac{3}{8}$ put in one. The third contains twelve Quavers in a Bar. these are called Jigg Times.

There are also two other Sorts compound Triple Times as $\frac{9}{4}$ and $\frac{9}{8}$ the first contains to the Value of nine Crotchets in a Bar, and the other nine Quavers.

Of other Characters used in Musick. A Point or Dot added to the right Side of any Note makes it half as long again as for Example ○. is as long as three Minims ○ as long as three Crotchets &c for if rest.

Where you see these Marks which are called Rests you are to cease playing if length

or Time of these Notes over them, from which Notes they take their Names.

Coxetown.

1

8
The dandling the Irish Bears

10

This page contains a handwritten musical score for the piece 'The dandling the Irish Bears'. The score is written on ten staves. The first staff begins with a treble clef, a key signature of one flat (B-flat), and a 3/8 time signature. The music consists of a single melodic line with various rhythmic values, including eighth and sixteenth notes, and rests. The notation is clear and legible, with some slurs and phrasing marks.

9
Scotch Jemmy.

This page contains a handwritten musical score for the piece 'Scotch Jemmy'. The score is written on seven staves. The first staff begins with a treble clef, a key signature of one flat (B-flat), and a 12/8 time signature. The music is a single melodic line with a mix of eighth and sixteenth notes. The notation includes various ornaments and phrasing marks.

Irish Lads of Dunces..

12

This page contains a handwritten musical score for the piece 'Irish Lads of Dunces'. The score is written on seven staves. The first staff begins with a treble clef, a key signature of one flat (B-flat), and a 6/4 time signature. The music is a single melodic line with a mix of eighth and sixteenth notes. The notation includes various ornaments and phrasing marks.

Sanny's Farewel.

13

Handwritten musical notation for 'Sanny's Farewel'. It consists of five staves of music in treble clef with a key signature of one sharp (F#) and a common time signature (C). The notation includes various note values, rests, and bar lines.

Fairly shot of her.

14

Handwritten musical notation for 'Fairly shot of her.'. It consists of four staves of music in treble clef with a key signature of one sharp (F#) and a common time signature (C). The notation includes various note values, rests, and bar lines.

Welch Richard.

15

Handwritten musical notation for 'Welch Richard.'. It consists of three staves of music in treble clef with a key signature of one sharp (F#) and a common time signature (C). The notation includes various note values, rests, and bar lines.

The last Time I came over the Moor.

16

Handwritten musical notation for 'The last Time I came over the Moor.'. It consists of four staves of music in treble clef with a key signature of one sharp (F#) and a common time signature (C). The notation includes various note values, rests, and bar lines.

12

The bonny Scot.

17 *Slow*

Handwritten musical notation for 'The bonny Scot'. It consists of five staves of music in a single system. The first staff is marked with the number '17' and the word 'Slow'. The music is written in a treble clef with a key signature of one flat (B-flat). It features a melody with various note values, including eighth and sixteenth notes, and rests. There are several trills marked with 'Tr.' above the notes. The piece concludes with a double bar line.

Fy gar rub her o'er with Strae.

18

Handwritten musical notation for 'Fy gar rub her o'er with Strae'. It consists of four staves of music in a single system. The first staff is marked with the number '18'. The music is written in a treble clef with a key signature of one flat. It features a melody with various note values and rests. The piece concludes with a double bar line.

13

Muirland Willie.

19

Handwritten musical notation for 'Muirland Willie'. It consists of four staves of music in a single system. The first staff is marked with the number '19'. The music is written in a treble clef with a key signature of one flat. It features a melody with various note values and rests. The piece concludes with a double bar line.

Peggy I must love thee.

20

Handwritten musical notation for 'Peggy I must love thee'. It consists of four staves of music in a single system. The first staff is marked with the number '20'. The music is written in a treble clef with a key signature of one flat. It features a melody with various note values and rests. The piece concludes with a double bar line.

14 *Wapnat the Widow.*

21

Moggy Lauther.

26

Irish Lostum Ponia. 19

27

The little House under the Hill.

28

A musical score for a single melodic line. It begins with a treble clef, a key signature of one sharp (F#), and a 6/4 time signature. The piece starts at measure 28 and ends with a double bar line. The melody is characterized by a mix of eighth and sixteenth notes, with some rests and a final cadence.

A Bonny Lad.

29

A musical score for a single melodic line. It begins with a treble clef, a key signature of one sharp (F#), and a 3/4 time signature. The piece starts at measure 29 and ends with a double bar line. The melody is lively, featuring many eighth and sixteenth notes with frequent beaming.

O'er Boggie.

30

A musical score for a single melodic line. It begins with a treble clef, a key signature of one sharp (F#), and a common time signature (C). The piece starts at measure 30 and ends with a double bar line. The melody is rhythmic and features many eighth and sixteenth notes.

22

The Lass of Patties Mill.

31

Handwritten musical notation for 'The Lass of Patties Mill'. It consists of five staves of music in treble clef with a key signature of one sharp (F#). The notation includes various rhythmic values, slurs, and trills. The first staff begins with a treble clef and a sharp sign. The piece concludes with a double bar line and repeat dots.

Bonny Jean.

32

Handwritten musical notation for 'Bonny Jean'. It consists of five staves of music in treble clef with a key signature of one sharp (F#). The notation includes various rhythmic values, slurs, and trills. The first staff begins with a treble clef and a sharp sign. The piece concludes with a double bar line and repeat dots.

23

Bonny Christy.

33

Handwritten musical notation for 'Bonny Christy'. It consists of four staves of music in treble clef with a key signature of one flat (Bb). The notation includes various rhythmic values, slurs, and trills. The first staff begins with a treble clef and a flat sign. The piece concludes with a double bar line and repeat dots.

Peggy grieves me.

34

Handwritten musical notation for 'Peggy grieves me'. It consists of five staves of music in treble clef with a key signature of one sharp (F#). The notation includes various rhythmic values, slurs, and trills. The first staff begins with a treble clef and a sharp sign. The piece concludes with a double bar line and repeat dots.

24

Woods Lamentation on y Refusal of his ^{nence.} Half

35

Handwritten musical notation for 'Woods Lamentation on y Refusal of his Half'. It consists of five staves of music in treble clef with a key signature of one sharp (F#). The notation includes various note values, rests, and dynamic markings. The piece concludes with a double bar line and repeat dots.

Da mihi Manum.

36

Handwritten musical notation for 'Da mihi Manum.'. It consists of four staves of music in treble clef with a key signature of one sharp (F#). The notation includes various note values, rests, and dynamic markings. The piece concludes with a double bar line and repeat dots.

25

Handwritten musical notation for 'Cramonea.'. It consists of four staves of music in treble clef with a key signature of one sharp (F#). The notation includes various note values, rests, and dynamic markings. The piece concludes with a double bar line and repeat dots.

Cramonea.

37

Handwritten musical notation for 'Cramonea.'. It consists of four staves of music in treble clef with a key signature of two flats (Bb, Eb). The notation includes various note values, rests, and dynamic markings. The piece concludes with a double bar line and repeat dots.
