L O N D O N.

Where Books of Instructions for any Single
Instrument may be had.

[1765]

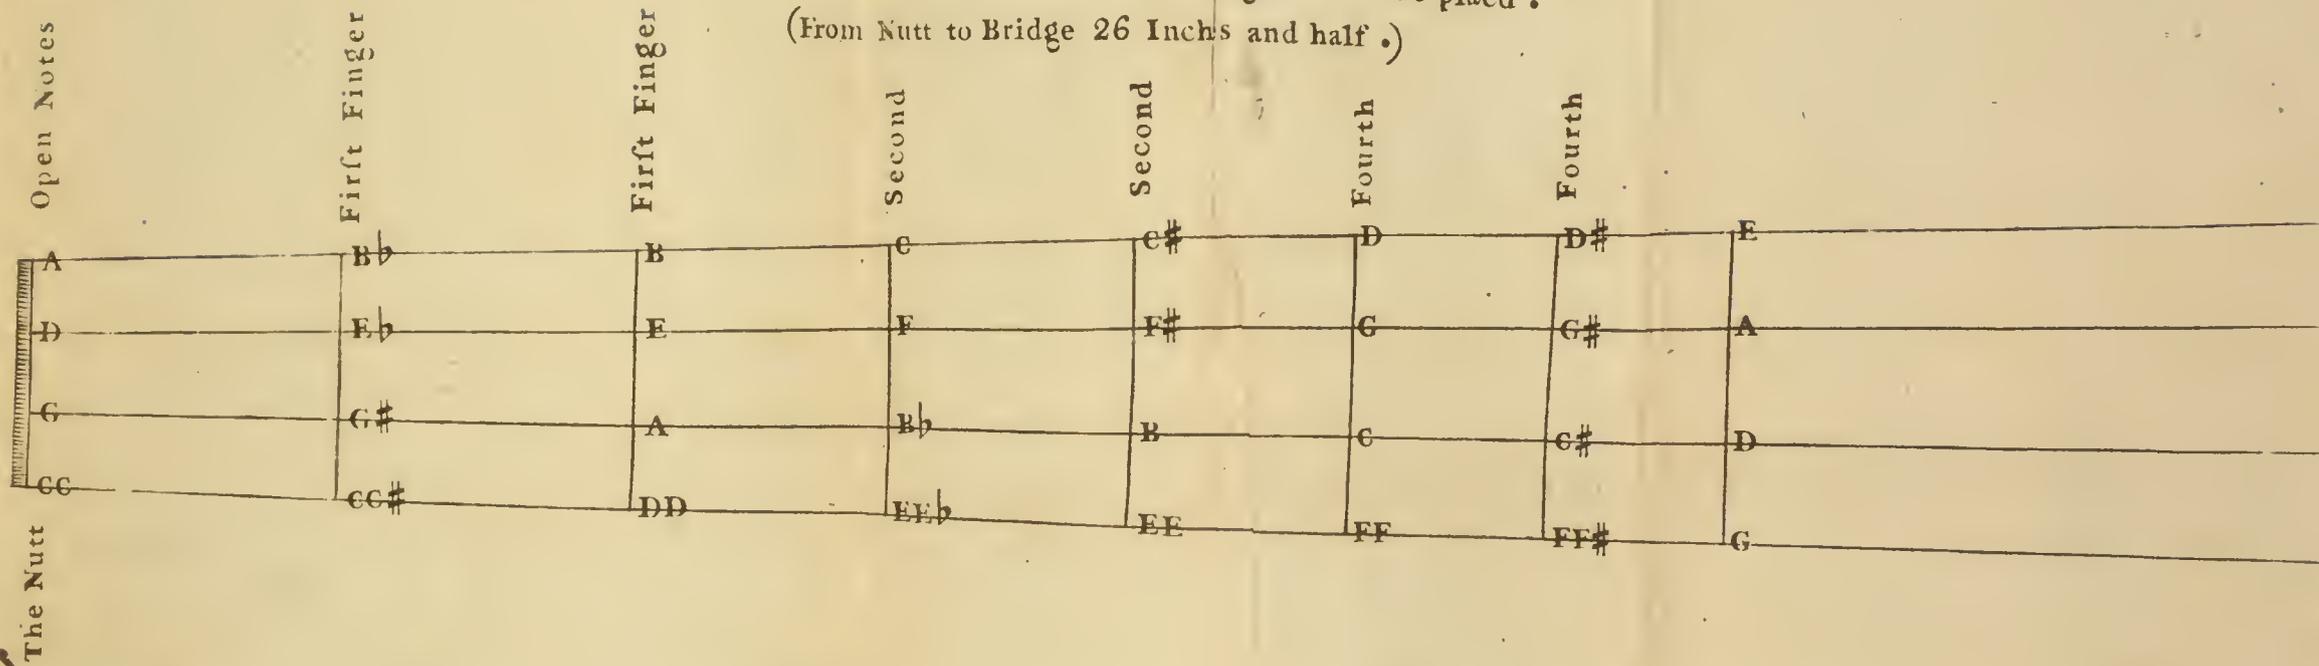

P R E F A C E

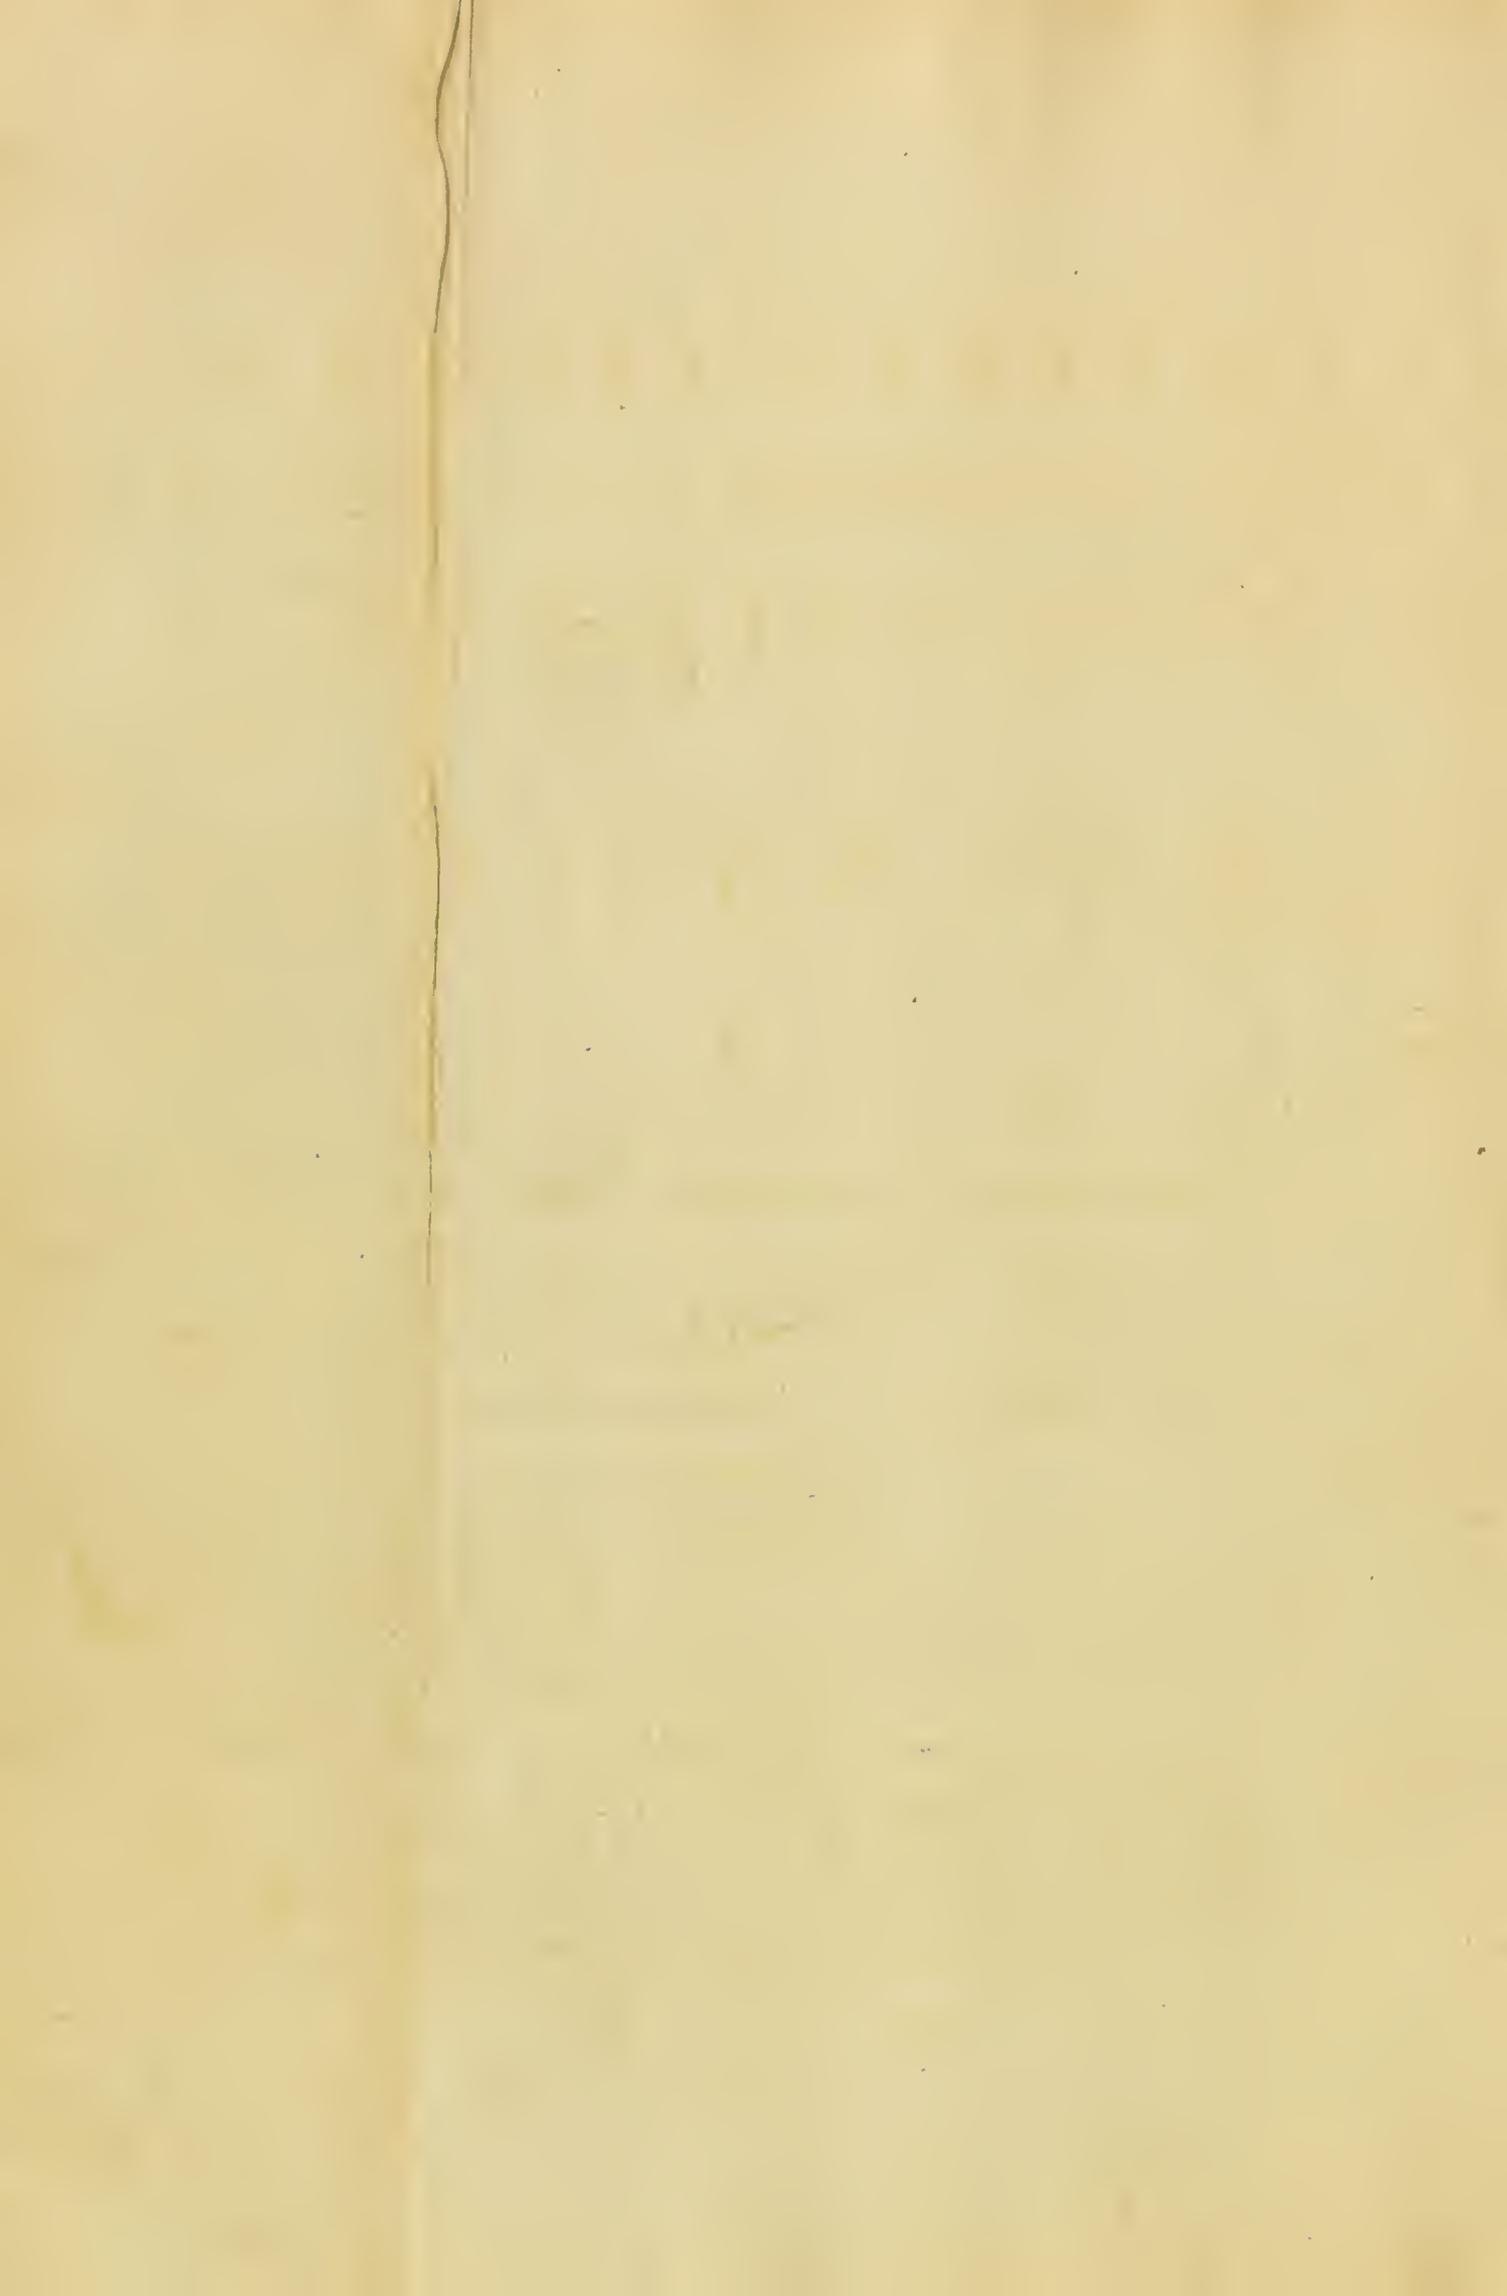

As the Bass Violin is in great Esteem I have here given some useful and plain Instructions for the Learner, as this Instrument appears to be Built on the Ruins of another; I mean the Viol or six string'd Bass, which in the last Century was held in great Esteem, and of general use in Concerts. Viols where of three sorts, Viz. Bass Viols, Tenor Viols, and Treble Viols; The Violin in those Days was look'd on as a contemptible Instrument; it was harsh and too loud, they cou'd not bear to have their Viols over power'd; however as the Violin became more general it was Judg'd necessary to use Bass Violins or Violoncello's, (that is four string'd Basses) as being much more powerful and suitable to the Fiddle, and since these last have been in such frequent use, the former have been entirely laid aside, Tho' there are Books of Instructions in all the liberal Sciences and Grammars in all Languages, yet the Learner will advance but slowly without a Preceptor; but as Verbal Instructions will be of great use when seconded by A Tutor, so these Instructions, I flatter myself will be of great Service to those, who from their situation or circumstances in Life cannot conveniently have the assistance of a good Master.

A Scale for the Finger-board of a Violoncello

Shewing the Distances where the Fingers are to be plac'd .

(From Nutt to Bridge 26 Inches and half .)

INSTRUCTIONS

for the

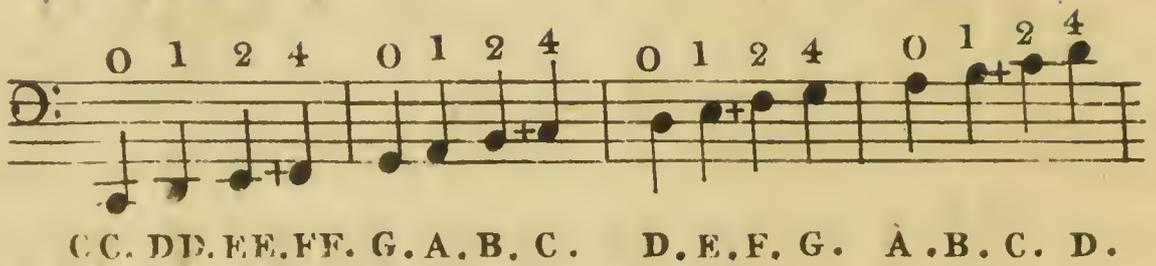

VIOLONCELLO.

or

BASS VIOLIN.

The Violoncello is an Excellent Instrument, not only in Concert, but also for playing Lessons &c. This Instrument may be Consider'd as a Large Fiddle only held the contrary way, and the fourth String is next the Bow-Hand, as the Body is turn'd downward, the lower part is to rest on the Calves of the Leggs supported with the Knees, but for the greater ease of a Learner we wou'd advize him to have an hole made in the Tail-pin and a Wooden Peg to screw into it to rest on the Floor which may be taken out when he Pleases. And first. it will be very necessary for the Learner to get the Names of the Notes in the Gamut, also what line and space each Note stands on, as describ'd in the manner following .

The Gamut for the Violoncello

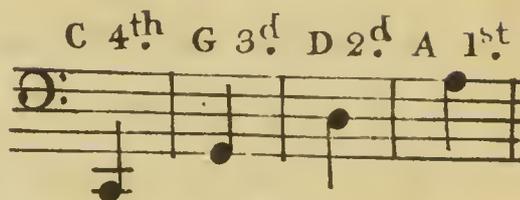

The Learner will observe that O over any Note in the Gamut is open, or no Finger: the figure 1 is the fore Finger: 2 the second: and 4 the little Finger. the reason we omit the third Finger is, because the distance is great, and the Finger shorter. If your Instrument is perfectly in Tune, (for 'tis to be supposed the Learner is not able to tune it himself,) you may try to play off the Natural Notes of the Gamut; you must observe there are four Notes belonging to each String, Those on the 4th or great String are Double C, double D, double E, and double F. the lowest Note, or double C, is play'd open, which is done by drawing the Bow cross the 4th String about 2 Inches from the Bridge; double D is stop'd with the first Finger about three Inches from the Nut; Double E is stop'd with the Second Finger nearly the same distance from the first Finger or rather less, Double F is stop'd with the fourth Finger about an Inch and quarter from the Second, the reason why the distance of the last is short is, because it is but a Semitone or half Note.

Those on the third String are G, A, B, and C. G, is play'd open: A, is stop'd with the first Finger: B, with the Second: and C, with the 4th Finger, at the same distance as on the 4th String. Those on the Second String are D, E, F, and G. D, is play'd open: E is stop'd with the first Finger about three Inches from the Nut; F, with the Second Finger about an Inch and half from the first, F being but a Semitone or half a Note above E: G, is stop'd with the little Finger about two Inches and quarter from the Second. Those on the first String are A, B, C, and D. A, is play'd open: B, with the first Finger: C, with the Second: and D, with the little Finger at the same distance as on the Second String. By these directions the Learner may soon stop the Notes in tune: The Learner must observe that the + between the Notes E and F, likewise between B and C are only Semitones, or half Notes, as they fall in the Natural Gamut: but we will hereafter introduce a perfect Scale of Natural and Artificial Semitones, which we may compare to a Magazine or Store House of Sounds, and to take and dispose of Occasionally; for the Scale must be form'd into Keys and then the fingering will alter as the Key changes: All Music is known by the first seven letters of the Alphabet, and the Eighth is the same, such as from C to C, from D to D, from E to E, from F to F, from G to G, from A to A, and from B to B, together with their Semitones.

Of tuning the Violoncello

The Violoncello (as the Fiddle) is tun'd by fifths in the following manner: the 4th or biggest String open when in tune is double C. the 3^d open is G. the Second is D. and the First is A.

Example

But if you can't put your Instrument in tune by these directions you must have recourse to the Representation of the Finger Board following (which from Nut to Bridge should be 26 Inches and half) with lines drawn across and measure out the 7th or last line from the Nut, and when you have got the exact distance, tie a piece of Fiddle String tight on the Neck under the Strings, which will make a Frett, and will be a standard for tuning all the Strings. And first, you must screw up the first String till it is in tune with the upper A in the Bass of the Harpsicord, or the upper A of the Bassoon, or an Eighth below an A, tuning Fork. then screw up the Second till by putting the Finger just below the frett on the Second String it has the same sound as the first String open; then if you strike the Second open it will be D. the same Method will do for the Third and Fourth Strings. But the best way of learning to tune is by the Ear, that is, by Solmifation if the Learner has any kind of Ear or Voice to Sol-fa five Notes ascending or descending, if he has not, we can give him but small encouragement to learn this Instrument. If he

has an Ear, in the first place he must screw up the Second String to be in tune with the middle D in the Bass of the Harpsicord, or Baffoon, which is the sound required, next he is to get the first String in tune to the Second, Solfaing thus

Example

Proof

Do Re Mi Fa Sol Do Sol

Do, the sound given, Sol the sound required; the Learner must practise continually till he can fing the five sounds well in tune which are ascending, and then fing them descending, thus

Proof

Ex:

Sol Fa Mi Re Do Sol Do Sol Fa Mi Re Do Sol Do

Proof

Now by Singing the Notes descending the Learner will be enabled to tune the third and fourth Strings by fixing the Sol on D, thus, for tho' the Voice might not reach so low as G, yet he will be able to distinguish the sound required. The only thing now is to prove whether the Second and first Strings are in tune to each other, which is done by the Ear distinguishing what we call Concord or a perfect agreement of sounds between the two first Strings, and is done by drawing the Bow across the two Strings at the same time thus

are acquainted with the Finger board, have the Fretts filed down; but for playing off the Gamut, and to shew the right use thereof, we will form it into Octaves, which are call'd Keys, in order to introduce all the Semitones properly, ascending, & descending, thus

The image displays twelve musical staves, each representing a different key signature. Each staff begins with a treble clef and a common time signature (C). The notes are written in a sequence that covers two octaves, with accidentals (sharps and flats) indicating the specific key signature. The keys are labeled as follows:

- Staff 1: C Key (C major)
- Staff 2: D Key (D major)
- Staff 3: E \flat Key (E minor)
- Staff 4: F Key (F major)
- Staff 5: G Key (G major)
- Staff 6: A Key (A major)
- Staff 7: B \flat Key (B minor)

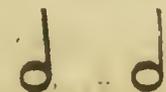

These are the practical Keys where the Learner may see how the Fingers differ in stopping the Notes in the different Keys; which this Representation of the Finger board will explain as having all the Semitones or half Notes drawn cross with lines. and tho' we have sufficiently explain'd the tuning part, it is not possible to teach it by rule.

Of Time

Time is the great Foundation on which all Musical Performances are Built, and the want of it is the reason why so many are cast away, having no foundation to build on. Time in Music is difficult except it is begun very early, but Time in itself is simply plain, such as in our ordinary Walking, for tho' we think nothing of it when we Walk, yet we keep pretty regular Motion. we shall call each step a unit, or one time, but before we proceed further we will introduce a Time Table of Musical Notes, with the proper Name and the Length of each Character.

Time Table .

A Semibreve  is as long as one can moderately count. 4 or (walk 4 steps.

Minims  as 2 each

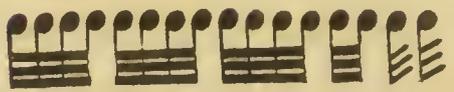

Crotchets  as 1 each or the unit

Quavers  as $\frac{1}{2}$ each or 2 to a time

Semiquavers  as $\frac{1}{4}$ each or 4 to a time

But this is no fix'd Rule, as the Notes often increase and decrease in their value of Time, for which Reason it will be necessary to introduce a Second Time Table where the longest Note will be the Minim, as follows

A Second Time Table .

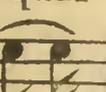

A Minim		as 4
Crotchets		as 2
Quavers		as 1
Semiquavers,		as $\frac{1}{2}$
Demifemiquavers		as $\frac{1}{4}$

Example of Rests or marks of Silence .

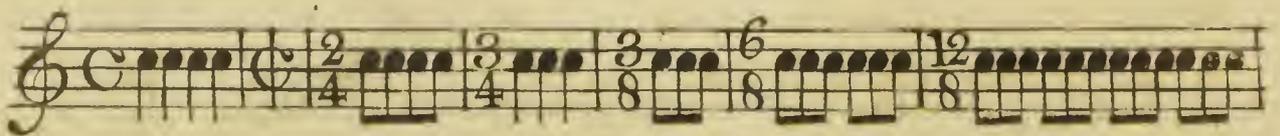

Semibreve	Minim	Crotchet	Quaver	Semiquaver	
					
Rest	Rest	Rest	Rest	Rest	
1 Bar Rest	2	4	8	9	10
					

A Point or Dot (•) after any Note makes it half as long again as before .

Example

equal	equal	equal	equal
			

The reason of the Notes increase, and decrease in the Time is by introducing new Characters instead of the old ones, which in a course of many Years are quite out of use and the shape almost forgot, for in the Antient Music their longest Character was call'd a Large, 2^d a Long, 3^d a Brief, which by the appellation is short, 4th a Semibrieve, 5th a Minim little or shortest Time but tho' the Characters differ yet we may suppose Time to be always the same, and now most modern Music is play'd by the Second Table. Time must be equal, even, exact, like the ballance of a good Clock, whether the Notes be long or short or none at all: Common Time, or even Time contains 4 units or steps of Time which are call'd Bars so ^ty the whole tune is divided into four's, and is the stand-ard of Time; it has this C Sign. Triple Time, or odd Time is a Fraction or part of the Common, and has this $\frac{3}{4}$ Sign., the others differ but little except in appearance .

The Learner will see that all other Times are a Fraction of Com-mon Time, that they are of two sorts proper and improper, and indeed we may make any number in a Barr with an improper Fraction such as $\frac{6}{4}$ $\frac{9}{4}$ $\frac{9}{8}$ $\frac{16}{8}$ $\frac{24}{8}$ &c. only they contain so many more in a Barr but Fractions are generally play'd from the Second Table of Time. A Pause is mark'd thus \frown it is for all Instruments to stop short a moment in order to join again with

the greater effect, it is also set at the finishing of a Song or Lesson .

The Single Barrs divide the Time equally, the Double ends the part, and if dotted that part is to be play'd twice .

Of Bowing .

As the use of the Bow is practis'd various ways by different performers and being of the greatest Consequence we will endeavour to put the Learner in a regular way; The Bow may be consider'd as the Tongue of the Instrument as all the Expression is from the Bow; the Bow in playing is always in Action, but the Fingers are often of no use; there are various ways of using the Bow, but the principal ways are four. Bowing, which is drawing the Bow backward and forward for every Note, Slurring, which is by drawing the Bow but once for two or any number of Notes; Feathering the Bow, which is done like the Slur, only it must be taken off the String after touching it : The Spring, which last can't be explain'd but by Demonstration. the Bow must be held near the Nutt with the Thumb and fore Finger, and supported with the other Fingers near the end at a small distance from each other, The Bow must be drawn cross the Strings parallel to the Bridge at the distance of an Inch & half or thereabouts backward and forward as smooth as you can to bring the Tone out, but without any Fingers on the Strings at first, that you may not strike two Strings together, for in so doing you will feel each String out, and not strike one String for another .

Of Beating and Counting Time .

There are two ways of Learning Music, that is, by Rule of Time keeping, and by Ear, if by Rule, the Performer can't fail of becoming a just Player, if by Ear, he can never play but by himself. All Musical Performances must be done by the Rule of Time keeping either with the Hand or Foot, but on an Instrument with the Foot, In Common Time you must beat down the fore part of the Foot when you count one, and let it remain till you have counted two, then take it up and count three, and remain up till you have counted four, thus

Common Time by the first Table .

b.f.b.f. b. f. b.f.b.f.b.f.b.f.b.f.b.f.b.f. b. f. b.f.b.f. b.f.b.f. b.

d. u. d. u.

The letters over the Notes are for the bowing, b, for drawing the Bow backwards, and the f, for drawing it forwards, the letters under the lines d, for beating the Foot down, and u, for taking it up, which the Learner must practice continually, for if he neglects at first he will find it very difficult to do hereafter ; the Learner may observe this Example is play'd from the first or Common Time Table, we will now set the same by the Second Table, thus

Common Time by the Second Table .

b.f.b.f. b. f. b.f.b.f.b.f.b.f.b.f.b.f.b.f. b. f. b.f.b.f.

d. u. d. u.

G Key by the First Table

D Key by the Second Table

We will now give some further directions for the Bowing, the Slurring, and the Feathering the Bow. When the number of Notes in a Barr are equal or even, such as 2, 4, 8, &c. the Bow must be drawn backward and forward continually, the Arm keeping in motion like the Pendulum of a Clock. The first Note in each Barr is to be play'd with a back Bow as may be observ'd in the foregoing Examples. we will now set an Example for Slurring and Feathering the Bow; the Slur is known by this semicircle put over the number of Notes it contains, thus  the same sign serves for the Feather, only dotted  the difference is this, for the Slur; the Bow is to keep on the String, and for the Feather; it is just taken off the String, but with the same Bow. We will set an Example which will explain both, in the manner following .

Minuet in C Key by the Second Table .

Da Capo, or begin & end with the first Part .

By this Example it will appear how necessary it is to regulate the Bow, and tho' some may think the Bow is of no great Consequence they may be assur'd 'tis much more difficult than the Fingering, after the Fingers have rightly found their places, for the Fingers ripen much sooner than the Bow, and indeed we can perform with the Fingers what is not possible to be done with Bowing, which we can make appear by the following Octave .

A Shake. explain'd . Apoggiatura above Apoggiatura below

the same the same

Of Ornaments or Graces .

The Notes in Basses should be always play'd plain, Tune, and Time are all that is requir'd; the only and principal Grace we should make use of is the Shake, which borrows the sound from the Note above it. as in the foregoing Example. The Apoggiatura is a kind of Slur, sometimes from the sound above, and sometimes from the sound below, and takes half the Time of the Note it stands before; which if it does, would it not be the same without? I mean to set it plain. as in the Example. for suppose it is a Minim with an Apoggiatura, is not two Crotchets with a Slur the same? most certain. for we look upon the Apoggiatura as unnecessary and Answer no end except puzzling the cause, the Apoggiatura generally is a retardation of some Discord, and may be done. as well with the plain Notes .

Of Sharp Keys and Flat Keys .

We have sufficiently explain'd what is meant by the Key, namely, the degrees of an Octave in which are two Semitones. But properly speaking, there are two Natural Keys in Music, that is, the Flat Key, and the Sharp Key, which two Keys are to produce two Melodies or Harmonies in order to express the two Passions, Chearful, and Melancholy, the Sharp Key to express the Chearful, and the Flat Key the Melancholy Music. Sharp Keys are proper for Trumpets and Horns, which are confin'd to the Sharp Key only. The Flat Keys are more soothing and complaining, yet they are frequently mix'd one with the other in the Modulation. All Keys are known, not by the Flats, nor the Sharps set at the beginning of the Staves, but by the third and sixth of the Key, a greater third,

or Third Major contains five Semitones, and is call'd a Sharp Key. a leffer Third, or Third Minor, contains but four, and is call'd a Flat Key, which we fhall explain by the following Examples

C, Natural # Key. Proof. A, Natural b Key. Proof.

1 2 3 4 5 Third Major 1 2 3 4 Third Minor

All other Keys are only a Tranfition from thefe Natural Keys, it is to be obferv'd that in afcending in a Flat Key, the 6th and 7th of the Key must be Sharp, but in defcending all must be Natural, thus

As we have fet a Number of Examples in the Natural Key of C, Major, or greater Third, we will fet one in the Natural Key of A, Minor, or leffer Third, thus

Minuet in A, Minor Key. by the 1st Time Table.

Jigg in A, Minor Key

It may be observ'd that we have set but few Lessons that require the shifting the hand, yet we will form each String into an Octave, which is done by Transporting or shifting the hand higher up the Finger Board, as will be seen by the following Example, which will give the Learner an Idea of Shifting.

An Octave on the 4th String. the same on the 3^d

1 2 3 4 1 2 3 4

the same on the 2^d the same on the 1st

1 2 3 4 1 2 3 4

The image shows two staves of musical notation. The first staff is labeled 'An Octave on the 4th String' and 'the same on the 3rd'. It shows a sequence of eight notes: C4, D4, E4, F4, G4, A4, B4, and C5. The first four notes are on the 4th string, and the last four are on the 3rd string. Fingerings 1-4 are indicated above the notes. The second staff is labeled 'the same on the 2nd' and 'the same on the 1st'. It shows a sequence of eight notes: C4, D4, E4, F4, G4, A4, B4, and C5. The first four notes are on the 2nd string, and the last four are on the 1st string. Fingerings 1-4 are indicated above the notes.

To play the Eight Notes of C, Key on the fourth String, the Learner must play the lowest four as they stand as before mention'd, then he must Shift his hand so as to make the fourth String an unison with the Third String open, which 4th String is to be stop'd now with the first Finger; the Second Finger is stop'd almost two Inches from the first, the third Finger is to be stop'd about an Inch and half from the 2^d and the little Finger is to be stop'd about an Inch from the Third Finger. As forming the Octaves on all the other Strings are done the same way, they need no further Explanation.

Minuet. C Major

First system of musical notation for Minuet in C Major. It consists of two staves. The top staff is in treble clef with a 3/4 time signature. The bottom staff is in bass clef. The music features a simple melody with some trills (tr) and a repeat sign at the end.

Minuet. F Major

First system of musical notation for Minuet in F Major. It consists of two staves. The top staff is in treble clef with a 3/8 time signature and a key signature of one flat (F major). The bottom staff is in bass clef. The music includes dynamic markings like *f* and *b*, and trills (tr).

Jigg. G Major

First system of musical notation for Jigg in G Major. It consists of two staves. The top staff is in treble clef with a 6/8 time signature and a key signature of two sharps (G major). The bottom staff is in bass clef. The music is characterized by a fast, rhythmic melody with many sixteenth notes.

Gavot. C Major

First system of musical notation for Gavot in C Major. It consists of two staves. The top staff is in treble clef with a common time signature. The bottom staff is in bass clef. The music features a lively melody with first and second endings (1st and 2^d) indicated by brackets and repeat signs.

Minuet. A Major

First system of musical notation for Minuet in A Major. It consists of two staves. The top staff is in treble clef with a 3/8 time signature and a key signature of three sharps (A major). The bottom staff is in bass clef. The music includes dynamic markings like *f* and trills (tr).

Gavot. B b Major

Musical notation for the Gavot in B-flat Major, measures 1 through 12. The piece is in 2/4 time and features a melodic line with eighth and sixteenth notes, and a bass line with eighth notes. A dynamic marking of *f.* (forte) is present at the end of the first line.

Foots Minuet

Musical notation for the Foots Minuet, measures 1 through 12. The piece is in 3/4 time and features a melodic line with eighth and sixteenth notes, and a bass line with eighth notes. Dynamic markings of *f.* (forte) are present throughout the piece.

Marionets

Musical notation for the Marionets, measures 1 through 12. The piece is in 6/8 time and features a melodic line with eighth and sixteenth notes, and a bass line with eighth notes. A dynamic marking of *f.* (forte) is present at the beginning. The piece concludes with a trill (*tr.*) and a repeat sign.

Cotillon

Musical notation for the Cotillon, measures 1 through 12. The piece is in 3/2 time and features a melodic line with eighth and sixteenth notes, and a bass line with eighth notes. A dynamic marking of *f.* (forte) is present at the beginning.

Joes Hornpipe

Musical notation for Joes Hornpipe, measures 1 through 12. The piece is in 3/2 time and features a melodic line with eighth and sixteenth notes, and a bass line with eighth notes. A dynamic marking of *f.* (forte) is present at the beginning.

Mulbery Tree

Musical notation for the Mulbery Tree, measures 1 through 12. The piece is in 6/8 time and features a melodic line with eighth and sixteenth notes, and a bass line with eighth notes. A dynamic marking of *f.* (forte) is present at the beginning. The piece concludes with a trill (*tr.*) and a repeat sign.

Cotillon Les Portraits a la Mode

Cotillon La Rofalia

La Nanoine

La Promenade

Cotillon

Musical notation for 'La Promenade' Cotillon, consisting of four staves. The key signature is one flat (B-flat) and the time signature is 6/8. The music features a rhythmic melody with eighth and sixteenth notes, including repeat signs and a double bar line at the end.

La Nouvelle Hollandoise

Cotillon

Musical notation for 'La Nouvelle Hollandoise' Cotillon, consisting of four staves. The key signature is two sharps (F# and C#) and the time signature is common time (C). The melody is characterized by eighth and sixteenth notes with repeat signs and a double bar line at the end.

Masquerade Minuet

Musical notation for 'Masquerade Minuet', consisting of four staves. The key signature is two sharps (F# and C#) and the time signature is 3/4. The piece includes triplets and slurs, with repeat signs and a double bar line at the end.

See the Conquering Hero

Musical notation for the first piece, 'See the Conquering Hero'. It consists of four staves of music in D major (one sharp) and common time (C). The melody is written on a single staff with various note values, rests, and dynamic markings such as 'h' and 'm'. The piece concludes with a double bar line.

Ye Fair Poffess'd

Musical notation for the second piece, 'Ye Fair Poffess'd'. It consists of four staves of music in D major (one sharp) and common time (C). The melody is written on a single staff with various note values, rests, and dynamic markings such as 'h' and 'm'. The piece concludes with a double bar line.

This cold flinty Heart

Musical notation for the third piece, 'This cold flinty Heart'. It consists of four staves of music in D minor (two flats) and 3/4 time. The melody is written on a single staff with various note values, rests, and dynamic markings such as 'h' and 'm'. The piece concludes with a double bar line.

Lovely Nancy with Var's

The musical score is written on ten staves. The first staff begins with a treble clef, a key signature of one sharp (F#), and a 3/4 time signature. The music consists of a series of eighth and sixteenth notes, often beamed together. The first staff includes a '4' below the time signature. The second staff contains a repeat sign. The third staff is marked with a 'tr' (trill) above the first measure and 'Var: 1' above the eighth measure. The fourth staff continues the melodic line. The fifth staff also features a repeat sign. The sixth staff is marked '2 Var:' above the final measure. The seventh and eighth staves continue the main melody. The ninth staff is marked 'Var: 3.' above the final measure. The tenth staff concludes the piece with a final melodic phrase.

Come haste to the Wedding

Duet

The Priest in his Boots

Musical notation for 'The Priest in his Boots' consisting of four staves. The key signature is one sharp (F#) and the time signature is 6/8. The melody is written on a single staff with a treble clef. The music features a series of eighth and sixteenth notes, with some slurs and accents. The piece concludes with a double bar line and repeat dots.

Water Parted

Musical notation for 'Water Parted' consisting of ten staves. The key signature is one sharp (F#) and the time signature is 3/4. The melody is written on a single staff with a treble clef. The music features a series of quarter and eighth notes, with many slurs and accents. The piece concludes with a double bar line.

1770 Adams when first created

Farewell ye green Fields

Musical score for 'Farewell ye green Fields'. It consists of three staves of music in G major, 6/8 time. The first staff begins with a treble clef, a key signature of one flat, and a 6/8 time signature. The melody is simple and features a repeat sign at the end. The second and third staves provide accompaniment, with the second staff including a 'tr' (trill) marking.

Let Gay ones and Great

Musical score for 'Let Gay ones and Great'. It consists of three staves of music in G major, 6/8 time. The first staff begins with a treble clef, a key signature of one flat, and a 6/8 time signature. The melody is more complex, featuring sixteenth notes and slurs. The lyrics 'Sy So' are written below the notes. The second and third staves provide accompaniment, with the second staff including a 'tr' (trill) marking.

Belleisle March

Musical score for 'Belleisle March'. It consists of six staves of music in G major, common time. The first two staves are grouped together with a brace on the left. The first staff begins with a treble clef, a key signature of one flat, and a common time signature. The melody features triplets and slurs. The second staff provides accompaniment. The third and fourth staves are also grouped with a brace on the left. The third staff begins with a treble clef, a key signature of one flat, and a common time signature. The melody continues with triplets and slurs. The fourth staff provides accompaniment. The fifth and sixth staves are also grouped with a brace on the left. The fifth staff begins with a treble clef, a key signature of one flat, and a common time signature. The melody continues with triplets and slurs. The sixth staff provides accompaniment. The score concludes with a repeat sign.

Lady Coventry's Minuet

The musical score for "Lady Coventry's Minuet" consists of six staves. The first two staves are a grand staff with a treble and bass clef, both in G major (one sharp) and 3/4 time. The first staff begins with a treble clef and a 3/4 time signature, followed by a key signature of one sharp. The second staff begins with a bass clef and a 3/4 time signature, followed by a key signature of one sharp. The remaining four staves are single-line staves, each with a treble clef and a 3/4 time signature, and a key signature of one sharp. The music features various rhythmic patterns, including eighth and sixteenth notes, and includes several triplet markings (indicated by a '3' above a group of notes) and an eighth-note triplet (indicated by an '8' above a group of notes). The piece concludes with a double bar line and repeat dots.

The Echoing Horn

The musical score for "The Echoing Horn" consists of six staves. The first staff is a single-line staff with a treble clef, in B-flat major (two flats) and 3/8 time. The following five staves are also single-line staves with a treble clef and a 3/8 time signature, and a key signature of two flats. The music is characterized by a steady eighth-note rhythm and includes several triplet markings (indicated by a '3' above a group of notes). The piece concludes with a double bar line and repeat dots.

Hand

Handels Gavot

Musical score for 'Handels Gavot' in D major (one sharp) and common time (C). The piece consists of six staves of music. The notation includes various rhythmic values such as eighth and sixteenth notes, and rests. A repeat sign is present at the end of the sixth staff, followed by the instruction 'Da Capo'.

Coldstream March

Musical score for 'Coldstream March' in D major (one sharp) and common time (C). The piece consists of six staves of music. The notation includes various rhythmic values such as eighth and sixteenth notes, and rests. The score features several trills, indicated by the 'tr' symbol above certain notes. The piece concludes with a double bar line and repeat dots.

The Sun from the East

Musical score for 'The Sun from the East'. It consists of five staves of music. The first staff is the treble clef with a key signature of one sharp (F#) and a 3/4 time signature. The subsequent staves are bass clef. The music features a variety of note values, including eighth and sixteenth notes, and rests. There are some dynamic markings like 'h' and 'f'.

The Queens Minuet

Musical score for 'The Queens Minuet'. It consists of five staves of music. The first staff is the treble clef with a key signature of two sharps (F# and C#) and a 3/4 time signature. The subsequent staves are bass clef. The music includes a 'Trio' section starting on the third staff, where the time signature changes to 3/4. The piece concludes with a 'Da Capo' instruction on the fifth staff.

Lovely Nymph

Musical score for 'Lovely Nymph'. It consists of two staves of music. The first staff is the treble clef with a key signature of two sharps (F# and C#) and a 3/4 time signature. The second staff is the bass clef. The music features eighth and sixteenth notes, with some triplets and a 'w' marking at the end.
