1750. MDCCL.

THE AUTHOR'S NAME IS UNKNOWN.

T H E
P R E F A C E.

MODULATION is universally acknowledged to be one of the most important Branches of the Science of Musick, and to which it owes some of its greatest Beauties, and principal Powers; and yet no Branch of that Science hath been more neglected. So that in the many Volumes which have been written upon the Subject of Musick, very little hath been said of Modulation; while Matters very well known, and of much less Importance have been largely insisted on.

The ancient Composers however, perfectly understood the Art of Modulation, as is evident from their Works: But it must be confessed, their Method of modulating was not altogether proper for Instrumental Musick.

B. Lulli, *A. Corelli*, and *J. Bononcini*, were the first Improvers of Instrumental Musick; and had Genius and natural Abilities sufficient to draw from the Ancients, such a Variety of Modulation, as they judged sufficient to render their Compositions delightful and spirituous. But they are greatly mistaken who imagine that the vast Foundation of universal Harmony can be established upon the narrow and confined Modulation of those Authors. If those Authors had introduced more of the Substance of the ancient Modulation into their Compositions, they would have had greater Variety in them, and consequently would have been more entertaining.

The Rules for Modulation, which have been received by many within these Forty Years, are extremely short and defective; and, by leaving out the greatest Part of the Science, have reduced it within the narrowest Limits; and render'd it poor, jejune, and sterl, to the last Degree. It will not be expected that I should here enter into a formal Proof of this Assertion; were it necessary, I might refer, for Proof, to a Multitude of Compositions, which have appeared in different Parts of *Europe*, within these Forty Years, and which, though composed by different Persons, yet in Point of Modulation, are all exactly alike. But I shall only observe, that although there is not an ordinary Performer upon any Instrument, in any Part of *Europe*, who does not boast his having composed Sonatas, Concertos, Cantatas, &c. Yet there are but few modern Composers, even of a much higher Clas, who can be truly said to have produced any thing new with respect to Melody, Harmony, and Modulation. What can this be owing to, but imperfect and defective Rules? Which instead of guiding the Students of Harmony, mislead them; instead of assisting, improving, and exalting natural Genius, confine and deprest it.

These

The P R E F A C E.

These Considerations, and the Advantage I conceived a more just and extensive System of Modulation, would be to the Science of Musick, induced me to compile the following Work, a Work of no small Difficulty, the Labour of many Years, and not a few of them almost wholly spent therein. I have the Satisfaction however to think my Time well spent, and my Labour well bestowed; I am perswaded this Work will be of the greatest Use to the Students of Harmony, by enlarging their Ideas, and giving them just and compleat Notions of Harmony and Modulation. I mean such of them as will not be wanting to themselves, but by a diligent Study and Application, endeavour to lay up in their Memories the Substance thereof. But as Memory cannot always be depended upon, the Work is so disposed, that the Student, whenever he has any Doubts or Difficulties in composing, with Respect to Modulation or Harmony, may recur to it as a Dictionary.

I do not pretend that every thing which regards the general Combination of Sounds, and Modulation are contained in this Book. I declare that the Composition of the Tone Major, and the Modulation by the Scale ascending and descending, and by Imitation are not contained therein. These I intend to print in a short Time, by Way of Supplement thereto, if my Health permit.

Directions for the Use of this Book.

WHEN you have written the Mark of the Clef ♩; and the Mark of the Time ♩; and chosen indifferently any one of the five Notes represented in the Beginning of the first Page, and written the same down, and the Figures over it, if any, You are to observe the Number under that Note, and turn to the Page marked with the same Number ; there you will find several Passages beginning with the same Note, and with the same Figures over it, or without Figures over it, if there be no Figures over the Note you have chosen ; choose any one of those Passages, and write it down with the Figures exactly, except the first Note, which must be omitted, being already written. When you turn to the Page marked with the same Number ; there you will find several Passages beginning with the same Note with which the last Passage you have written down endeth, and with the same Figures over it, or without Figures over it, if there be no Figures over the last Note of the Passage you have written down ; choose any one of those Passages, and write it down as before, omitting the first Note. And thus proceed from Passage to Passage to what Length you please, always finishing with a Passage marked ↘ being a final Cadence, for the other Mark ↙ signifies an indefinite Cadence, or Cadence of Suspension. But it is to be observed, that this Mark ↘ does not mean that you must necessarily end whenever you choose a Passage marked with it, for you may still proceed, but then if you find No. 22 at the End of the final Cadence, it will be best to go on with some one of the Passages in the two last Lines of Page 22.

When you have proceeded as far as you please, you will find several Notes without any Perpendicular Lines (called Bars) between them. You must then add so many Perpendicular Lines, that there may be one Note without a Tail (called a Semibreve) or two Notes with Tails (called Minims) between every two perpendicular Lines, so that where there are two Notes without Tails together, and no perpendicular Line between them, you may either add Tails to those Notes, or draw a perpendicular Line between them. After this if you find a little circular Line croſs any Bar or perpendicular Line (called by Musicians a Ligature) you must take Care that the Note which precedes the Bar, or perpendicular Line, may be either of greater or equal Duration with the Note following the Bar or Line, and never of les. A Note without a Tail (called a Semibreve) is of double the Duration of a Note with a Tail, called a Minim.

By observing the foregoing Directions it is impossible for the most Ignorant to err. But the good Effect of the Melody and Harmony will be greater or les, according to the Choice of the Passages.

NB. Great Care must be taken to write the Figures over the several Passages, with the utmost Exactness.

The Letters C, T, Pr, and P. over and under the Staff, in the Beginning of the first Page, are of no Importance. The Letter C, means Clef, T, Time, Pr, Principal, and P, Page.

Handwritten musical score for two voices, featuring two systems of music. The first system consists of 12 measures, and the second system consists of 12 measures. The music is written on four-line staves with various note heads (circles, squares, triangles) and rests. Measure numbers are placed below each staff. The key signature changes frequently throughout the piece.

(17)

Handwritten musical score with five-line staves. The notation uses numbers (6, 3, 5, 7, 8, x3, b3) and symbols (b, x) to indicate pitch and rhythm. Measures are numbered at the end of each line: 13, 10, 29, 18, 13, 27, 32, 18, 7, 23, 13, 17, 28, 11, 27, 20, 28, 20, 7, 13, 14, 27, 20, 16, 18, 23, 7, 13, 14, 27, 20, 14, 18, 23, 20, 28, 17, 19, 10, 19, 18, 17, 25, 31, 16, 23, 7, 12, 24, 7, 10, 18, 8, 18, 25, 31, 12, 18.

28/

A handwritten musical score page featuring 12 measures of music for a single voice part. The music is written on a single staff with a common time signature. Measures 1 through 6 are grouped by a brace, and measures 7 through 12 are grouped by another brace. Measure numbers are placed at the beginning of each group: 8., 28., 8., 16., 8., 7. for the first group, and 23., 8., 28., 33., 28., 29. for the second group. The music consists of various note heads and stems, with some notes having horizontal dashes or dots indicating specific performance techniques. The handwriting is in brown ink on aged paper.

32

A handwritten musical score for six voices, likely for a choral or organ piece. The score consists of six systems of music, each with two staves. The voices are labeled with Roman numerals and Greek letters (e.g., I^a, I^b, II^a, II^b, III^a, III^b) above the staves. The music is written in common time (indicated by '8'). The notation includes various note heads (circles, squares, triangles) and rests, with some notes having vertical stems and others horizontal. Measure numbers (18, 20, 23, 16, etc.) are placed below the staves. The score is written on aged, yellowed paper.
