The instruments of the orchestra

Preface

Text en music of this piece are meant to help a young audience recognize and identify the sounds of instruments and instrument groups of the orchestra. Goal is a maximum playing time of around 30 minutes. That can be well combined in one show with the performance of for instance a musical fairytale. For every instrument or group a short musical fragment is presented where the sound characteristics of the different instruments are well exploited. The short explaining text blocks are at basic level and only meant as a guideline. Parts of the material can be skipped at choice when for instance some instruments are not active in a particular concert. That applies also to the Finale piece that has been added as a slot parade. In the table at the last page speaking and playing times are given. Involvement of the young audience can be stimulated by inviting them to look at (or eventually play) the different instruments.

Arie van Hoek

Introduction

Hello everybody, in a symphony orchestra like this all musicians play together on a choice of instruments. Every instrument has its own specific sound or color. And that is what we want to show you; the different sound colors, properties and habits of these instruments.

The instruments can be divided in groups as for instance the stringed instruments (**play all strings, chaos, 5 sec.**), the wind instrument (**play winds, 5 sec.**) and the percussion instruments (**play percussion, 5 sec.**). The first thing that catches the eye is that some instruments are very small (**show piccolo or flute**) and others very big (**show double bass, tuba and/or contrabassoon**). And what do you think, will the high notes sound from small or big instruments? (**play for instance a piccolo and a double bass**).

Sound is in fact vibrating air or varying air pressure. Playing an instrument starts with making something going to *tremble* or *vibrate*. That can be the string of the violin or piano, the reed of the clarinet, the lips of the trumpet player or hitting the drumhead; *that is the source of the sound*. Then what happens is that the vibrations of that sound source are efficiently transferred to another part of the instrument. On a violin that is the violin body, the piano has its soundboard and on a wind instrument and the drum that is the air column inside the instrument. Because of that, the instrument is generating a much louder sound than with just a single vibrating string, just vibrating lips or just an unmunted drumhead.

Now we will walk along these instruments so that you can recognize the different sounds when they are playing together in the orchestra.

String instruments

Let us start with the string instruments (**play all strings, chaos, 5 sec.**). In fact, these are wooden boxes with some stick at one end, dressed up with a few strings. The string is firmly stretched and connected to the wooden box. In this way the surface that can vibrate is largely increased, resulting in more sound production as compared to a single vibrating string. When on a particular instrument notes from the lowest to the highest pitch sound at even or comparable loudness, the instrument is called of good quality.

There are different ways to make sound with the strings; by drawing the bow across the strings (**concertmaster plays arco**) or plucked with the fingers, that is called pizzicato (**concertmaster plays pizz.**). In particular for playing with the bow, a choice of techniques has been developed for playing notes in different ways, making intriguing sounds.

With the tuning pegs at the top of the instrument the strings can be tuned to the proper pitch. By stopping the strings to the fingerboard with the fingers of the left hand the sounding length of the strings can be regulated. In this way on one string different notes can be played (**concertmaster plays scales**).

In this orchestra the violin is the smallest string instrument (**show**), slightly bigger is the viola (**show**), then comes the cello (**show**) and the biggest is the double bass (**show**). Now all strings together will play a short piece for you where every instrument shows its own qualities and sound colors and abilities for a joint performance.

The harp

The strings of the harp or pedal harp (**show harp**) are sounded by plucking with the fingers. The vibrations of the strings are transferred to the large body of the harp, so increasing the vibrating surface, leading to more sound volume. A harp has almost fifty strings so a range notes from low to high can be played (**harp plays arpeggios**). Furthermore, this harp has a set of pedals. With these pedals the length of the strings that vibrates can be decreased and increased a semitone allowing every string to sound at three different pitches upon controlling the pedals (**harp plays a single string with different pedal positions**). That makes the harp a rather complicated instrument but the beautiful sound colors will attract to every music lover.

(Harp plays the following piece).

Andante $\text{♩} = 124$

Harp

3/4 time signature. Treble clef. Bass clef below. Dynamics: **f**, **p**. Measures 1-5 show eighth-note patterns.

3/4 time signature. Treble clef. Bass clef below. Dynamics: **mf**. Measures 6-10 show eighth-note patterns, with measure 10 ending on a half note.

3/4 time signature. Treble clef. Bass clef below. Measures 11-15 show eighth-note patterns.

3/4 time signature. Treble clef. Bass clef below. Measure 16 starts with a bass note. Measure 17 has a bass note. Measure 18 has a bass note. Measure 19 has a bass note. Measure 20 has a bass note. Dynamics: **rall. poco a poco**.

3/4 time signature. Treble clef. Bass clef below. Measures 21-25 show eighth-note patterns. Measure 25 ends with a bass note.

The wind instruments

At the back of the orchestra the wind instruments have found a place (**play winds, 5 sec**). Some wind instruments have been made of wood (**show**) and others are made of metal (**show**). Just like the string instruments the different wind instruments vary in size from very small (**show piccolo**) to big (**show tuba or contrabassoon**).

With string instruments, the vibrating string is the source of the sound, with wind instruments different ways are used to force the air to vibrate. At the flute mouthpiece (**show flute**) with the lips some airflow from breathing-out is directed towards a rather sharp edge causing some sound. With the so-called reed instruments (**show reeds**) a thin reed is forced to vibrate, and with the brass instruments a slight air flow between the lips causes vibration (**show brass mouthpiece**).

Then, *very important*, after the mouthpiece a piece of tube is mounted. And the air column inside that tube might vibrate as well, the so-called *resonance*. That only happens when the vibrations in the mouthpiece are at a pitch that is able to resonate in the specific length of air column. A much louder and more defined sound is then generated (**play trumpet mouthpiece separately and mounted**). That resonance happens at a *short* tube for *high pitch* (**play piccolo**) and at a *long* tube for *low pitch* (**play tuba**).

The flutes

We start with the flutes. Flutes are members of the woodwind family and have been built in many different shapes and configurations. Normally, in a symphony orchestra the transverse flute is used and this flute is held perpendicular to the blowing direction (**show flute playing position**). Sound is generated here by directing an airflow from breathing-out towards an edge with the lips (**flute plays mouthpiece**). Then *resonance* occurs in the air column inside the tube that is next to the mouthpiece. Along that tube a range of holes is made, most of them fitted with keys. By opening or closing these holes the length of the resonating air column inside the tube can be varied so changing the resonance pitch (**flute plays a series of scales**).

These flutes are also a family of instruments of different sizes. The piccolo (**show**) is the smallest instrument of the orchestra and can play notes at a very high pitch (**piccolo plays some high scale**). The most common flute is the treble flute (**show**) and that is twice as long as the piccolo (**flute plays some scales as well**). The flute can perform very fast notes and in the lower range produce a very romantic sound. And because playing a trill is easy on the flute it can perform the bird whistle in the orchestra very well (**play trills on the flute**).
(Now the flutes will play some short piece).

Andante grazioso $\text{♩} = 80$

Piccolo 1

Piccolo 2

This section shows two staves for piccolo. The top staff is labeled 'Piccolo 1' and the bottom 'Piccolo 2'. Both staves are in 3/4 time. The music consists of eighth-note patterns with grace notes and dynamic markings 'mf'.

This section continues the musical score for Piccolo 1 and Piccolo 2. The staves remain the same, showing eighth-note patterns with grace notes and dynamic markings 'mf'.

This section shows the musical score at measure 11. The top staff is labeled 'change to flute' and the bottom staff is also labeled 'change to flute'. The music consists of eighth-note patterns with grace notes and dynamic markings 'mf'.

Adagio $\text{♩} = 60$

This section shows the musical score for the 'Adagio' section. The top staff starts with a rest followed by a melodic line with dynamic 'mf'. The bottom staff has a sustained note followed by a melodic line. The instruction 'rall.' appears above the top staff.

This section continues the 'Adagio' section. The top staff shows a melodic line with dynamic 'rall.'. The bottom staff shows a melodic line with dynamic 'rall.'

Oboe and English horn

The oboe is a double reed woodwind instrument (**show oboe**). For producing sound, two pieces of reed are bound together and air is blown through the tiny space that is left between these two reeds. The result is a very penetrating sound (**oboe blows mouthpiece**). The reed is made from cane and is very vulnerable; the smallest disruptions may result in a useless reed.

The resonator tube of the oboe is made of a tropical hardwood and like with the flutes; equipped with a series of holes and keys, allowing the fast performance of many different notes (**oboe plays some scales**). The sound of the oboe is very special and can range from a steady and cutting forte to a nasal and melancholic sound in the lower range of the instrument. Because of that solid sound of the oboe it is used to tune the whole orchestra at the beginning of a concert. The melancholic sound of the oboe is the proud characteristic of the bigger brother in the oboe family in particular; the English horn (**show and play English horn**). When a sad or pitiful melody has to be performed, the English horn is the favorite. He is quite a bit longer than the oboe and the mouthpiece has a slight bent for a more practical playing position.
(Now the oboes will play a short piece).

Andante ♩ = 80

Musical score for Oboe 1 and Oboe 2 in 3/4 time. The score consists of two staves. Oboe 1 starts with a rest, followed by a melodic line with dynamic markings *mf* and *mf*. Oboe 2 enters with a rhythmic pattern marked *mp*, followed by *mp* and *mf*.

Continuation of the musical score. The first oboe part ends with a melodic line marked *mp*. The second oboe part continues with a rhythmic pattern marked *mf*. The score then transitions to "Cor Anglais" with the instruction "change to Cor Anglais". The first measure of the transition is marked "rubato". The measure number 6 is indicated below the staff.

Continuation of the musical score. The first oboe part begins with a melodic line marked *mf*. The second oboe part begins with a rhythmic pattern marked *mp*. The tempo changes to "Adagio" with a tempo marking of ♩ = 60. The measure number 10 is indicated above the staff. The instruction "molto rall." appears above the first oboe's melodic line.

Continuation of the musical score. The first oboe part continues its melodic line. The second oboe part continues its rhythmic pattern.

Continuation of the musical score. The first oboe part concludes with a melodic line marked *p*. The second oboe part concludes with a rhythmic pattern marked *mp*.

The clarinets

The clarinet is a single-reed woodwind instrument (**show clarinet**). Like with the saxophone a piece of reed is fixed on a mouthpiece and when blowing a slight flow of air along the reed that will vibrate (**clarinet blows the mouthpiece**). When the mouthpiece is mounted onto the resonance tube of the clarinet distinct tones can be played. The tube of the clarinet is equipped with a lot of holes and keys allowing the clarinet to play very advanced and virtuoso performances (**clarinet plays a series of scales**).

Like the flutes and oboes, the clarinets are members of a family of instruments and the clarinet family has the largest pitch range of all wind instrument families. There is a piccolo clarinet, the “normal” clarinet, the alto clarinet, the bass clarinet, the contralto clarinet, contrabass clarinet, together forming the clarinet choir (**show the different sizes of clarinets**).

The clarinet not only plays important parts in the orchestra, it has distinct roles in jazz music, gipsy and klezmer music and military bands. The clarinet sound has a wide dynamic range, it can play loud and aggressive as well as soft and smooth. The sound color of the clarinet ranges from a sentimental slobbering in the lower pitch range to a brutal yapping in the high range; a broad range of sounds, very attractive to every composer. (**Now the clarinets will play a duet and/or a trio, depending on the availability**).

Andante $\text{♩} = 70$

Clarinet in B \flat 1

Musical score for two clarinets in B-flat. The top staff is for Clarinet in B-flat 1, and the bottom staff is for Clarinet in B-flat 2. Both staves are in common time (indicated by '8'). The key signature is one flat (B-flat). Measure 1: Clarinet in B-flat 1 starts with a eighth note followed by sixteenth-note pairs. Clarinet in B-flat 2 enters with eighth notes. Measure 2: Both instruments continue with eighth-note patterns. Measure 3: Both instruments continue with eighth-note patterns. Measure 4: Both instruments continue with eighth-note patterns.

5

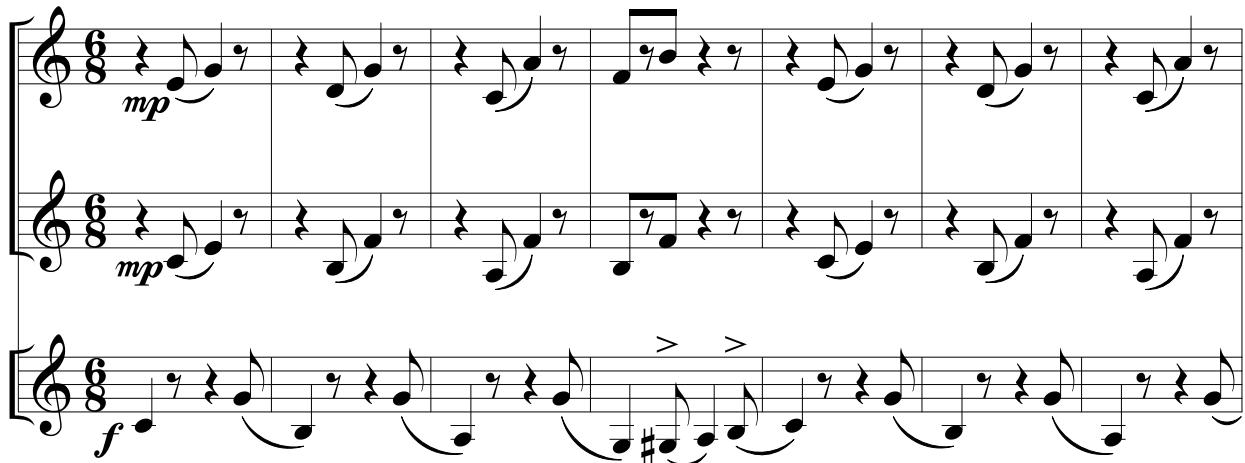

Musical score for two clarinets in B-flat. The top staff is for Clarinet in B-flat 1, and the bottom staff is for Clarinet in B-flat 2. Both staves are in common time (indicated by '8'). The key signature is one flat (B-flat). Measure 5: Both instruments play eighth-note patterns. Measure 6: Both instruments play eighth-note patterns. Measure 7: Both instruments play eighth-note patterns. Measure 8: Both instruments play eighth-note patterns.

11

Musical score for two clarinets in B-flat. The top staff is for Clarinet in B-flat 1, and the bottom staff is for Clarinet in B-flat 2. Both staves are in common time (indicated by '8'). The key signature is one flat (B-flat). Measure 11: Both instruments play eighth-note patterns. Measure 12: Both instruments play eighth-note patterns. Measure 13: Both instruments play eighth-note patterns. Measure 14: Both instruments play eighth-note patterns.

Andante ♩. = 80

Clarinet in B \flat 1

8

15

The bassoons

Like the oboe a bassoon is a double reed woodwind instrument (**show bassoon**).

Only, the resonator tube of the bassoon is much longer and the tube has been folded for convenience purposes. It starts with the metal mount for the mouthpiece and then it goes down through a circular hole in the wooden trunk. Then it is reversed at the lower end and goes upwards through another hole. All together the length of that channel is about 2.5 m, allowing the bassoon to play very low notes (**bassoon plays lower range**). Along the bassoon a series of holes and keys are mounted, allowing the playing of pretty fast notes (**bassoon plays some scales**). In the orchestra the low notes of the bassoons are often used to accentuate the rhythm of the music. And, because of the specific tone color, the bassoon is sometimes used for playing the parts describing grumpy old men.

The bassoon as well is part of a family of instruments but this family is not as big as the clarinets. In fact, only the contrabassoon (**show contrabassoon**) can regularly be found in symphonic repertoire. The contrabassoon sounds twice as low as the normal bassoon (**play the lower range contrabassoon**). These extreme low notes are often used in music for raising a sinister mood in music.

(Now the bassoons will play a duet and/or a trio, depending on the availability).

Andante

Bassoon 1

Bassoon 2

Contrabassoon

pomposo

mf

The musical score consists of three staves. The top two staves are for Bassoon 1 and Bassoon 2, both in B-flat major (indicated by a B-flat symbol) and 3/4 time. They play eighth-note patterns. The third staff is for the Contrabassoon, also in B-flat major and 3/4 time, playing a sustained note with dynamic *mf*, followed by a sixteenth-note pattern labeled "pomposo".

5 a tempo

mp

mp

mf

The musical score continues from measure 5. Bassoon 1 and Bassoon 2 play eighth-note patterns. Contrabassoon plays a sixteenth-note pattern starting with dynamic *mf*.

9

The musical score continues from measure 9. Bassoon 1 and Bassoon 2 play eighth-note patterns. Contrabassoon plays a sixteenth-note pattern ending with dynamic *rall.*

The horn

The horn is a clearly a brass instrument (**show horn**). Here sound is generated by a tiny air flow through the narrow space between the lips into the mouthpiece (**horn player makes glissando on a single mouthpiece**). When the mouthpiece is mounted on the horn a limited number of notes can be played, called natural harmonics (**horn plays harmonics/hunting call**). Furthermore, the instrument is equipped with valves, allowing the adding of some specific lengths of tubing. By controlling the valves, the resonance length of the tube is varied, allowing many more different notes to be played (**horn plays some scales**).

When all hoops of the horn are stretched, the total length of tubing reaches up to almost 4 m, thus the horn can play very low notes as well. The right hand of the player is partly in the bell of the horn (**show to the audience**) and the direction of the bell is rather backwards from the audience. All that results in the singular horn sound that is very suitable for performing as well the enchanting horn calls as the romantic lines in music.
(Now the horns will play a trio or quartet, depending on the availability).

Allegro $\text{♩} = 104$

Horn in F 1

Horn in F 2

Horn in F 3

This section contains three staves for Horns in F major. The first two staves begin with dynamic *f*, followed by *mp* and *f*. The third staff begins with *f* and has a measure number 4 above it. The music consists of eighth-note patterns.

5

This section continues the musical score for Horns in F major. It features three staves with dynamics *mf*, *fp*, *fp*, *f*, *p*, and *f*. The music includes various eighth-note and sixteenth-note patterns.

10

This section continues the musical score for Horns in F major. It features three staves with dynamics *f*, *f*, and *f*. The music includes eighth-note and sixteenth-note patterns.

 pp f mp fp f mp fp f

The trumpet

The trumpet is a brass instrument that is a lot smaller than the horn (**show trumpet**).

The resonance length of the tube is only around 1.5 m. The bell is directed straight into the audience, resulting in a clear and shining sound color. Three valves are used for expanding the number of different notes to be played (**trumpet plays some scales**). For playing very high parts in baroque music the smaller piccolo trumpet is used, suitable for playing very sparkling and virtuoso passages and solos.

The trumpet does not only play an important role in the symphony orchestra but also in the jazz orchestra or band and, together with the clarinets, in the military and marching bands. The clear tone of the trumpet is very suitable for the performance of the light and bright parts in music. And any call for action can well be boosted by the direct forward projection of the trumpet sound.

(Now the trumpet plays the solo, duet or trio depending on the availability).

Allegro molto $\text{♩.} = 166$

Trumpet

The musical score consists of three staves of music for the trumpet. The first staff begins with a tempo marking of **Allegro molto** and a quarter note duration of $\text{♩.} = 166$. The second staff starts at measure 7. The third staff starts at measure 14, with the instruction "molto rubato" above the notes. The music features various note heads, stems, and rests, with some notes connected by horizontal lines.

The trombone

The standard trombone is twice as long as the trumpet and the valves are replaced by a slide (**show trombone**). That enables not only the playing of notes at specific pitch but at every pitch in between (**trombone plays glissando**). And some trombones have been equipped with valves as well for a further extension of the tube length. Trombones are built in different sizes and now the most common trombones are the tenor trombone and the bass trombone (**show different trombones**).

Because of the different trombone sizes a broad spectrum of notes can be awaited from this trombone section. The tenor trombone can play the mellow mid-range parts and the bass trombone feels easy at the lower pitch, enriching the bass notes. And because the trombone sound is directed straight into the audience it delivers a welcome contribution when more sound volume is awaited.

(Now the trombones play the trio).

Moderato $\text{♩} = 96$

Trombone 1

Musical score for Trombones 1, 2, and 3 in 6/8 time, key signature of one flat. The tempo is Moderato ($\text{♩} = 96$).
Trombone 1: Starts with a rest followed by eighth-note pairs. Dynamics: mf .
Trombone 2: Enters with eighth-note pairs. Dynamics: mp .
Trombone 3: Enters with eighth-note pairs. Dynamics: mp .
Measure 8:

8

Trombone 1: Eighth-note pairs. Dynamics: f , mp .
Trombone 2: Eighth-note pairs. Dynamics: f , p .
Trombone 3: Eighth-note pairs. Dynamics: f , mp .

15

Musical score for Trombones 1, 2, and 3 in 6/8 time, key signature of one flat. The tempo is Moderato ($\text{♩} = 96$).
Trombone 1: Eighth-note pairs. Dynamics: f .
Trombone 2: Eighth-note pairs. Dynamics: f .
Trombone 3: Eighth-note pairs. Dynamics: f .

The tuba

The tuba is the largest brass instrument and has the lowest pitch of all (**show tuba**).

The length of the tube may stretch to up to 5.5 m and handling of the tuba calls for a robust player. Not only because of the enormous weight of the instrument but also for controlling the amount of air that is needed to play the instrument. With a deep breath the tuba player can make a lot of noise but after all; for a smooth performance of soft tones a very well skilled mastering of the instrument is crucial.

In the orchestra the tuba is the base of all produced sound and the reference for intonation for the other instruments. Concerning the rhythm in music the tuba often serves as the stable companion for the timing of the other instruments. From this it becomes clear that the tuba player has a key role in the orchestra.

(Now the tuba plays the piece below).

Allegro $\text{d} = 90$

Bass Tuba

p tweede maal *mf*

5

9

13

rall.

Percussion

At the very back of the orchestra we find the percussion section. Percussion instruments include an enormous wide variety (**play all percussion that is available**). There are percussion instruments that does not have a well-defined pitch like the bass drum, snare drum, triangle, cymbal, castanets etc. (**play these instruments in order when available**). And there are percussion instruments that have a pitch like the xylophone, vibraphone, marimba, glockenspiel, chimes and the timpani (**play these instruments in order when available**).

Percussion players master many different instruments. And when in a big symphonic piece many different percussion instruments are used; the players may move from one instrument to the other in a well-appointed choreography. Because of the nature of the instruments the exact timing of percussion notes is of major importance and for the players a very good perception of rhythm is of fundamental importance.

(Now the percussion section plays the piece below, eventually extended with more percussion).

Allegro moderato

Timpani

Finale

Now all instruments have been shown, the orchestra will play a short piece to illustrate the role of the different instruments. Try to locate the different elements of the music; the lines of the melody, the accompany notes and rhythm sounds. These elements travel from one instrument to the other during the performance, resulting in a constant change of the sound structure.

For a smooth performance of the music it is essential that all musicians start to play the piece at exact the same moment and play in the same tempo. And here the *conductor* appears. With that short stick or baton (**show baton**) and a suitable amount of body language the musicians get information on a range of details for a proper performance of the music. And now you will understand that when you visit a concert not only audible information but also the visual information of the whole concert contributes to this experience.

(Now the orchestra plays the Finale).

This musical score page contains two staves of music, one for the orchestra and one for the brass band.

Orchestra (Measures 19-25):

- Flute:** Rests throughout measure 19; dynamic **f** at the beginning of measure 25.
- Oboe:** Rests throughout measure 19; rests throughout measure 25.
- B♭ Clarinet:** Rests throughout measure 19; rests throughout measure 25.
- B. Cl. (Bass Clarinet):** eighth-note pattern starting in measure 19, dynamic **p** at the beginning of measure 25.
- Bassoon:** eighth-note pattern starting in measure 19, dynamic **p** at the beginning of measure 25.
- Horn:** eighth-note chords starting in measure 19, dynamic **pp** at the beginning of measure 25, dynamic **p** at the end of measure 25.
- C Trumpet:** rests throughout measure 19; rests throughout measure 25.
- Trombone:** eighth-note chords starting in measure 19, dynamic **pp** at the beginning of measure 25, dynamic **p** at the end of measure 25.
- Tuba:** eighth-note pattern starting in measure 19, dynamic **p** at the beginning of measure 25.
- Timpani:** eighth-note pattern starting in measure 19; rests throughout measure 25.

Brass Band (Measures 19-25):

- Horn (H. P.):** eighth-note chords starting in measure 19, dynamic **p** at the beginning of measure 25.
- Violin I (Vln. I):** eighth-note pattern starting in measure 19, dynamic **mf** at the beginning of measure 25, dynamic **f** at the end of measure 25.
- Violin II (Vln. II):** eighth-note pattern starting in measure 19, dynamic **mf** at the beginning of measure 25, dynamic **f** at the end of measure 25.
- Viola (Vla.):** eighth-note chords starting in measure 19, dynamic **pp** at the beginning of measure 25, dynamic **mf** at the end of measure 25.
- Cello (Cb.):** eighth-note pattern starting in measure 19, dynamic **p** at the beginning of measure 25.
- Bass (B. C.):** eighth-note pattern starting in measure 19, dynamic **p** at the beginning of measure 25.

This musical score page shows a complex arrangement of instruments. The top half features woodwind instruments (Flute, Oboe, Bassoon) and brass instruments (Trombone, Horn, Trombone, Tuba). The bottom half features brass instruments (Trombone, Horn, Tuba), percussion (Timpani), woodwind instruments (Clarinet, Bassoon), and strings (Violin I, Violin II, Cello, Double Bass). The score includes dynamic markings like *p*, *mp*, *mfp*, and *mf*, as well as performance instructions like *trombone* and *arco*.
