The short Exercises published some Time since, under the Title of *L'Amico del Principiante*, having met with a favorable Reception; The Author has been induced to publish this little Work as a sequel, and if the Pupil be well acquainted with the above Book, together with the Observations at the End thereof; the Exercises in This, will prove to be not only further instructive, but also more entertaining.

The relative Distances in every Key, whether Major or Minor, being readily known; the Solfacing Syllables will become familiar, and the Ear will reject a false Syllable, by the Habit of hearing Fa, as a Semitone above Mi; and Ut, as a Semitone above Si: and that this may be invariably the Case; Ut, as a Key Note (in Major Keys) will constantly follow the Modulation, if the sign thereof appears. See N^o. 1. and 15. Yet it will not always be necessary in sudden Transitions to change the place of Ut, see N^o. 8. The judicious Teacher will discover in *L'Amico del Principiante* a regular Path traced out for his Pupil; in which, should he instruct him to tread with Attention, pointing out to him what is most needful to be retained in Memory; the Art of Singing at Sight will certainly follow. To promote this End, the same Regularity will be found in this Work; taking progressively the most usual Major Keys, and the attendant Minors which naturally arise out of them. Thus also any Exercise may be lengthened at Pleasure, by adding One or more of a relative Key, then ending with the First, in the way of Rondo: But it is particularly recommended to Learners, that whatever Piece they may choose for Exercise whether Major or Minor; always to begin by Singing the Scale of that Key; & in slow Time generally; sustaining and Swelling the Tones throughout; for by the frequent use of the Scale, the Ear will become more correct, and the perfect Sound of every Tone, and Semitone in the Octave be acquired.

It is certainly difficult to remove Old established Customs, however irrational they may be; and those who have been in the Habit of Singing Do, for the Key Note, may not be willing to change it for Ut; But, why not practise upon every Vowel, for the sake of obtaining a good Intonation? The Vowel O, is in Sol, and by using Ut, instead of Do, all the Vowels are brought into Practice, A, in Fa, & La. E, in Re. I, in Mi and Si. O, in Sol. U, in Ut; which Syllables should always be sung according to Italian Pronunciation. By this Method every Note in the Octave has its appropriate Syllable; Mi, will be the greater 3^d to the Key in the lower Tetrachord; Si, the greater 3^d to the Fifth of the Key in the upper Tetrachord. (The Octave being a Compound of the Two) thus also, the Difficulty attendant on Singing by Hexachords is effectually removed.

Those Movements which have no Sign whereby to regulate their Quickness, should be sung slow, untill the Intonation is made perfect; then the Motion may be increased gradually, according to the ability of the Pupil, and Character of the Music; moreover, to arrive at a tolerable degree of Proficiency, they should frequently be sung without the assistance of an Instrument.
